Class *Book*
The Memorial & Library Asso.
WESTERLY, R. I.

Presented in memory of the third
NATHAN FELLOWS DIXON,
United States Senator, 1889-95,
By Grace McClure Dixon,
NOV. 8TH, 1898.

THE

CENSUS OF MASSACHUSETTS:

1885.

PREPARED UNDER THE DIRECTION OF

CARROLL D. WRIGHT,

CHIEF OF THE BUREAU OF STATISTICS OF LABOR.

VOLUME I.

POPULATION AND SOCIAL STATISTICS.

PART 2.

BOSTON:
WRIGHT & POTTER PRINTING COMPANY, STATE PRINTERS,
18 POST OFFICE SQUARE.
1888.

TABLE OF CONTENTS.

Page

Analysis of tabular presentations for Part 2 of Volume I. Population and Social Statistics, xvii–cxxxi

TABULAR PRESENTATIONS.

[In the tabular presentations, the names of counties are printed in "CAPITAL" letters; the names of cities in "SMALL CAPITAL" letters, and the names of towns in "Roman" letters.]

CLASSIFIED OCCUPATIONS. BY TOWNS, 1–38

[Classified occupations by counties, cities, and towns, and for the State, representing a division of the people, by sex, into 22 classes of occupations, with a showing for the State only of classified occupations by percentages.]

Explanatory notes, 3
Towns in Barnstable county, 4, 5
Towns in Berkshire county, 4–9
Cities and towns in Bristol county, 8, 9
Towns in Dukes county, 10, 11
Cities and towns in Essex county, 10–13
Towns in Franklin county, 12–15
Cities and towns in Hampden county, 14–17
Cities and towns in Hampshire county, 16–19
Cities and towns in Middlesex county, 18–25
Towns in Nantucket county, 24, 25
Towns in Norfolk county, 24–27
Cities and towns in Plymouth county, 26–29
Cities and towns in Suffolk county, 28, 29
Cities and towns in Worcester county, 28–35
Recapitulation. The counties, 34, 35
Recapitulation. The State, 36
Classified occupations by percentages. For the State, 37, 38

PRINCIPAL OCCUPATIONS. BY TOWNS, 39–408

[Principal occupations for males and females, classified as to age periods and place of birth, for each city and town in the State.]

Explanatory notes, 41
Towns in Barnstable county, 42–55
Towns in Berkshire county, 54–81
Cities and towns in Bristol county, 80–105
Towns in Dukes county, 104–109
Cities and towns in Essex county, 108–153
Towns in Franklin county, 152–173
Cities and towns in Hampden county, 172–195
Cities and towns in Hampshire county, 196–215
Cities and towns in Middlesex county, 214–283

PRINCIPAL OCCUPATIONS. BY TOWNS — Con.

Page
Towns in Nantucket county, 282–285
Towns in Norfolk county, 284–313
Cities and towns in Plymouth county, 312–337
Cities and towns in Suffolk county, 336–351
Cities and towns in Worcester county, 350–408

OCCUPATIONS BY NAME. FOR THE STATE, 409–738

[In four parts, comprising first, occupations in detail, by sex; second, occupations by age periods and place of birth; third, occupations of aliens, in detail, and fourth, occupations of aliens, by place of birth, the first two of which relate to the occupations of the entire population and the last two to the occupations of aliens as a whole and illiterate aliens.]

Explanatory notes, 411
Occupations in detail, by sex. For the State, 413–531
- Government, 413–415
- Professional, 415–418
- Domestic service, 418, 419
- Personal service, 419–421
- Trade, 421–448
- Transportation, 448–451
- Agriculture, 451, 452
- The Fisheries, 452
- Manufactures, 452–514
- Mining, 514
- Laborers, 514
- Apprentices, 514–516
- Children at work, 516
- Scholars, 517
- Students, 517
- Retired, 517–524
- Not gainful, etc., 524
- Not productive, 524
- Unemployed twelve months, 524–526
- Dependents, 526, 527
- At home, 527
- Not given, 527
- Recapitulation, 528–531

Occupations by age periods and place of birth. For the State, 532–664
- Government, 532–535
- Professional, 534–539
- Domestic service, 538–543
- Personal service, 542, 543
- Trade, 544–555
- Transportation, 554–559
- Agriculture, 558–561
- The Fisheries, 560, 561
- Manufactures, 560–605
- Mining, 604–607

VOLUME I.

POPULATION AND SOCIAL STATISTICS.

PART 2.

ANALYSIS.

Part 1 of this volume contains the results of the Decennial Census of 1885, and relates to the whole population. The tabular presentations in Part 1, drawn from Schedule No. 1 of the Census, are as follows:

Population and Sex.
Population: By Towns, Alphabetically.
Villages: Alphabetically.
Villages: By Towns.
Population for 1875 and 1885: Increase and Decrease. By Towns.
Population for 1875 and 1885: Increase and Decrease. By Sex.
Censuses of Population: 1765 to 1885. By Towns.
Notes. Dates of Incorporation, Changes in Name, Area, Boundaries, Population, etc., of Counties, Cities, and Towns.
Polls and Voters.
Families: Number and Average Size.
Size of Families.
Dwelling-houses: Number and Materials.
Color and Race: By Native and Foreign Born.
Conjugal Condition. Native and Foreign Born. By Age Periods.
Color and Race. Conjugal Condition. By Age Periods: Native and Foreign Born. For the State and Counties.
Ages.
Relation to Head of Family.
Place of Birth.
Parent Nativity.
Parent Nativity: By States and Countries.
Place of Birth and Parent Nativity of Persons 90 Years of Age and Over. For the State.

The tabular presentations contained in Part 1 comprehend that information which the public most naturally requires at an early date after the enumeration, and Part 1 was issued with as little delay as possible; the subjects considered in Part 2 require, however, the greatest time for preparation, and include those features of the enumeration which are valuable at all times and comprehend, in addition to the presentation of occupations, social statistics relating to classes or collections of individuals less than the whole population. This information, also drawn from Schedule No. 1 of the Census, is of a deeper sociological value than that contained in Part 1, and is presented under the following titles:

- Classified Occupations. By Towns.
- Principal Occupations. By Towns.
- Occupations by Name. For the State.
    - Occupations in Detail, by Sex.
    - Occupations by Age Periods and Place of Birth.
    - Occupations of Aliens, in Detail.
    - Occupations of Aliens, by Place of Birth.
- Children at Work.
- School Attendance.
- Schools and School Property.
- Libraries and Reading Rooms.
- Illiteracy.
- Married Women and Mothers: With Number of Children and Children Living.
- Prisoners and Convicts.
- Homeless Children and Paupers.
- Physical Condition.

Ample time has been taken for the preparation of this Part and this has been justified by reason of the value of the information it contains. The statistics consist largely of what may be designated as related statistics, involving correlated facts, the preparation of which takes great time. The object, therefore, has been completeness and not expedition. Some of the features contained in these presentations have been presented in preceding censuses, while some are entirely new. These features, old and new, will be pointed out as the analysis proceeds, either by comparison or otherwise, under each specified topic. It is confidently expected that the sociological value of the labor expended on the preparation of this Part will be more thoroughly appreciated through future comparisons than at present, although the immediate importance of the statistics presented cannot be ignored. Massachusetts aims in such matters to blaze the way for future statistical achievements. It is not the spirit of the government of the State to be content with following in ruts, and it only feels that it does its best work when it keeps reasonably abreast of the scientific demands of the day. These demands have in many respects been met under the present Census, so far as statistical science is concerned, and yet no one feels more keenly than the compiler the necessary omission of certain lines of statistics.

The first three divisions of this Part relate to the occupations of the people, as returned in the Census, and the tabular presentations in regard to them cover in all 738 pages, or more than one-half of the entire contents of this Part. The constantly increasing subdivision of labor, resulting in the creation of special branches of service, or parts of a trade or business, has made any statement of occupations in general terms of little value practically, and, in an economic sense, wholly inadequate for use in the compilation and proper classification of wage statistics. Statistics of occupations at the present day must possess the most specific detail, or they will not satisfy the demands of the inquirer. The absence in Censuses prior to 1875 of detailed information concerning occupations, arising in many cases from the use of indefinite terms rather than fully descriptive designations in their enumeration, led to an attempt in the State Census of 1875 to secure an accurate enumeration of the occupations of the people in detail, to the end that correct and sufficient data might be supplied to enable the Census Office to classify and condense, so far as might seem advisable, from an intelligent standpoint, rather than to receive and present aggregated results from the hands of the enumerators themselves; the component parts of these widely divergent classifications in such case would not be ascertainable, and, consequently, harmonious and definite results would not be possible.

The Enumerators in 1875 were carefully instructed as to the necessity of securing occupations in detail, and, as a result, the statistics concerning occupations comprised over 1,600 different designations, this being a marked step in advance of all previous occupation showings. In spite, however, of the care taken in the enumeration of occupations at that time, there were 35,349 persons whose occupations were returned as "not specified"; that is to say, were not given in detail, but were expressed by general or indefinite terms. Recognizing the deficiencies, in many ways, of the occupation classification of 1875, and realizing the many changes which have occurred in the intervening decade, the Census of 1885 went still further, with a view to the amplification of occupation designations expressive in themselves but capable of still further subdivision, as well as to make the enumeration of occupations exact in all its features, that is, to have the Enumerators return upon each population schedule an exact report of the work done by each person, by way of occupation. Following the plan pursued throughout the Census of 1885, the population schedules were carefully examined and in all cases where necessary returned to the Enumerator for correction, this examination applying not only to the inquiries concerning occupations, but to all the various points contained on the schedule. As a result of this minute classification of occupation details, covering over 17,000 designations, the Census Office has been able to present, first, a classified showing of occupations by towns; second, a presentation for each city and town in the Commonwealth of the principal occupations followed therein, and distributed according to age periods and place of birth; third, a detailed presentation of occupations, for the State, by sex, practically as enumerated; and fourth, a showing of occupations, for the State, comprehending age periods and place of birth as well as sex, together with special presentations of occupations in connection with other features of the Census relating to population. And yet, with this fullness of detail, even, many interesting and valuable features could not be presented for want of space. To fully answer all the demands for occupation statistics, at the present day, an entire volume could be devoted to the consideration of the occupations of the people, as called for and returned in the Census.

Classified Occupations (page 1). The first of the three divisions relating to occupations represents a division of the people into twenty-two classes, this presentation being by counties, cities, and towns. This classification of the population, as a whole, as regards occupations, comprehends the dependent and non-productive classes, including young persons at home, these classes, for Census purposes, being considered as forming a part of the showing of occupations. An explanation of the classification of the people as regards occupations, for these twenty-two divisions, is given on page 3 and need not be referred to here in detail. The results for the State, showing the number of persons returned for each of these classes of occupations, are given on page 36, and for convenience are reproduced in this analysis, together with the results shown in a corresponding table of percentages on page 37. The table follows:

Classified Occupations.	Number			Percentages		
	Males	Females	Both Sexes	Males	Females	Both Sexes
The State.	932,884	1,009,257	1,942,141	100.00	100.00	100.00
Government,	9,621	1,311	10,932	1.03	0.13	0.56

Personal service,	14,282	9,788	24,070	1.53	0.97	1.24
Trade,	94,936	11,837	106,773	10.18	1.17	5.50
Transportation,	48,675	143	48,818	5.22	0.02	2.51
Agriculture,	77,257	404	77,661	8.28	0.04	4.00
The Fisheries,	7,973	7	7,980	0.85	–	0.41
Manufactures,	281,822	112,762	394,584	30.21	11.17	20.32
Mining,	1,562	–	1,562	0.17	–	0.08
Laborers,	32,905	31	32,936	3.53	–	1.70
Apprentices,	5,183	495	5,678	0.56	0.05	0.29
Children at work,	1,907	1,133	3,040	0.20	0.11	0.16
Scholars,	164,469	167,115	331,584	17.63	16.56	17.07
Students,	4,561	2,581	7,142	0.49	0.26	0.37
Retired,	18,168	7,494	25,662	1.95	0.74	1.32
Not gainful, etc.,	108	102	210	0.01	0.01	0.01
Not productive,	13,945	10,267	24,212	1.50	1.02	1.25
Unemployed twelve months,	753	69	822	0.08	0.01	0.04
Dependents,	2,836	3,550	6,386	0.30	0.35	0.33
At home,	113,770	113,443	227,213	12.20	11.24	11.70
Not given,	10,023	29,892	39,915	1.07	2.96	2.05

From this table it is seen, for males, that 9,621, or 1.03 per cent of the entire male population, are engaged in the service of the national, state, city, or town government, or are in the service of the United States army or navy; that 16,555, or 1.77 per cent, are professional people, that is, are connected with religion, law, medicine, and similar pursuits, while 25,855, or 2.77 per cent, are engaged in domestic or personal service. The males engaged in trade number 94,936, or 10.18 per cent; those engaged in transportation number 48,675, or 5.22 per cent, while 77,257, or 8.28 per cent, are engaged in agriculture, and 7,973, or 0.85 per cent, are engaged in the fisheries. The whole number of males engaged in manufactures is 281,822, or 30.21 per cent; 1,562, or 0.17 per cent, are engaged in mining; 32,905, or 3.53 per cent, are returned as laborers, and 5,183, or 0.56 per cent, as apprentices. We find, also, that there are 164,469 males who are scholars and 4,561 who are students, representing 18.12 per cent of the whole number of males, and that there are 18,168 persons, or 1.95 per cent, who have retired from active pursuits. These persons classified as "retired" are either possessed of a competency, inherited or acquired, or, for some reason, do not need to be actively engaged in order to obtain a subsistence, as distinguished from those persons classified as "dependents," mostly in private families, who are more or less dependent upon relatives or friends for their support. The dependent males number 2,836 and represent less than one-third of one per cent of all the males. There are 13,945 males, or 1.50 per cent, returned as not productive, including those afflicted persons, homeless children, paupers, prisoners, and convicts, who by reason of their disabilities, etc., have no productive occupations, and 113,770 males, or 12.20 per cent, under ten years of age who are returned as "at home." There are, also, 10,023 males, or 1.07 per cent, whose occupation is "not given"; that is, young persons and adults of working age who, for some reason, have no occupation, or for whom no occupation is returned.

In a similar way, we find, for females, that 522,583, or 51.78 per cent of the whole number of females, are returned as being engaged in domestic service; this number including, of course, the large body of housewives and persons engaged in housework without fixed compensation. There are engaged in manufactures 112,762 females, or 11.17 per cent, while 167,115 are scholars and 2,581 are students, these last two classes constituting 16.82 per cent of the whole number of females. The females classified as "retired" number 7,494, or less than one per cent of the whole, while those classifed as "not productive" number 10,267, or a little more than one per cent of the entire female population. The young persons "at home" number 113,443, or 11.24 per cent, while the females for whom the occupation is "not given" number 29,892, or 2.96 per cent. A distribution of the entire population without regard to sex, both by number and by percentages, is shown in the table and need not be analyzed in detail, except to indicate that of the whole population 534,156, or 27.50 per cent, are engaged in domestic service; 394,584, or 20.32 per cent, are engaged in manufactures; 338,726, or 17.44 per cent, are scholars or students, while 227,213, or 11.70 per cent, are persons under ten years of age who are at home, the larger part being too young to go to school. The whole number of persons for whom no occupation is returned, and who are shown in the table as "not given," is 39,915, or a little more than two per cent of the entire population.

The classification of occupations in the present Census differs so materially in its results from the classification used in the Census of 1875 that any comparison in detail with the results for that Census would be of little value. This is due, largely, to a better enumeration in 1885, so far as occupations are concerned, in the sense that the exact details have been supplied, admitting of a more careful and harmonious distribution under the proper designations of occupations. For the convenience, however, of persons who may desire to examine the results for 1875 in connection with the returns for 1885, a table showing classified occupations for 1875 is subjoined.

CLASSIFIED OCCUPATIONS.	Males	Females	Both Sexes
THE STATE.	794,383	857,529	1,651,912

Scholars (including students),	142,781	140,003	282,784
Retired,	1,662	125	1,787
Not productive,	4,540	2,421	6,961
Occupation not given,	143,296	203,833	347,129

Concerning this table, it is proper to say that the large number of persons for whom no occupation was given include the dependents, young children at home, and those who for some reason have no occupation. In the returns for 1885, these persons are classified separately. In 1875 there was no separate classification made of those persons engaged in mining, the greater part of them being included under manufactures, mainly in the industries called "metals and metallic goods" and "stone," or were classified under "laborers."

Touching the change in classification for 1885 as compared with 1875, a single instance may be cited by way of illustration. In 1875 there were returned as laborers 51,954 males and 225 females, or a total of 52,179 persons who were so called, but without specification of the particular work done, in this total being included, of course, the large body of general or day laborers who cannot be otherwise classified. In 1885 there are returned 32,905 males and 31 females, or in all 32,936 persons, whose occupation is that of "laborer" only. These figures for 1885, when compared with the returns for 1875, indicate a loss of 36.67 per cent for males and 86.22 per cent for females, the fact being, however, that by a better and more exact return of the occupations in 1885, these persons have been classified properly, according to the particular kind of labor performed, under manufactures, trade, transportation, etc., as the case may be.

The great and abnormal increase in the number of women returned for the various classes of occupations in 1885 as compared with 1875 in many cases is also due doubtless to a better and more thorough classification of the people according to their proper occupation designations; a part of the increase is legitimate, but just how much it is not possible to say.

The distribution of the population in 1885 by percentages according to sex, for each class of occupations, is shown as follows:

Classified Occupations.	Percentages		
	Males	Females	Both Sexes
The State.	48.03	51.97	100.00
Government,	88.01	11.99	
Professional,	53.74	46.26	
Domestic service,	2.17	97.83	
Personal service,	59.34	40.66	
Trade,	88.91	11.09	
Transportation,	99.71	0.29	
Agriculture,	99.48	0.52	
The Fisheries,	99.91	0.09	
Manufactures,	71.42	28.58	
Mining,	100.00	–	
Laborers,	99.91	0.09	
Apprentices,	91.28	8.72	
Children at work,	62.73	37.27	
Scholars,	49.60	50.40	
Students,	63.86	36.14	
Retired,	70.80	29.20	
Not gainful, etc.,	51.43	48.57	
Not productive,	57.60	42.40	
Unemployed twelve months,	91.61	8.39	
Dependents,	44.41	55.59	
At home,	50.07	49.93	
Not given,	25.11	74.89	

The results here shown as regards the relative proportions of each sex engaged in the various kinds of service or pursuits are most interesting and suggestive. For instance, while of the entire population 48.03 per cent are males and 51.97 per cent are females, of all the persons in government service 88.01 per cent are males and 11.99 per cent are females. Of professional people 53.74 per cent are males and 46.26 per cent are females. Of all the persons engaged in domestic service 2.17 per cent are males and 97.83 per cent are females, whereas in personal service the percentage of males is 59.34 and that of females, 40.66.

In trade 88.91 per cent are males and 11.09 per cent are females, while for transportation, agriculture, and the fisheries, respectively, practically all the persons so employed are males, being in each case over 99 per cent. In manufactures 71.42 per cent of all the persons are males and 28.58 per cent are females. In mining all the persons are males, and for those returned as laborers 99.91 per cent are males and but 0.09 per cent are females. The percentages for apprentices are 91.28 for males and 8.72 per cent for females. The distribution of scholars as regards sex is practically even, while of students 63.86 per cent are males and 36.14 per cent are females. Of those for whom the occupation is "not given" 25.11 per cent are males and 74.89 per cent are females, the preponderance of females for this class being caused by the large number of young ladies or daughters living at home without remunerative occupation. The other percentages shown in the table and not analyzed in detail are correspondingly indicative.

If we subtract from the large number of persons returned as being engaged in domestic service, those who are returned as being housewives or engaged in housework without fixed compensation, we can compile a table which will present, briefly, the number engaged in remunerative occupations and the number of persons returned in those other classes of occupations which together comprehend all but five per cent of the population. This table follows:

Occupations.	Number			Percentages		
	Males	Females	Both Sexes	Males	Females	Both Sexes
THE STATE.	932,884	1,009,257	1,942,141	100.00	100.00	100.00
Remunerative occupations, .	604,161	213,147	817,308	64.76	21.12	42.08
Housewives, ...	13	372,612	372,625	–	36.92	19.19
Housework, ...	77	88,985	89,062	0.01	8.82	4.59
Scholars and students, . .	169,030	169,696	338,726	18.12	16.81	17.44
At home, ...	113,770	113,443	227,213	12.20	11.24	11.70
All other persons,. . .	45,833	51,374	97,207	4.91	5.09	5.00

Analyzing these results we find that out of a population of 1,942,141 there are 817,308 persons, representing 42.08 per cent, who are engaged in remunerative occupations, and that of this number 604,161 are males and 213,147 are females, the males constituting 64.76 per cent of the total males and the females 21.12 per cent of the total females. We find, also, that the housewives number 372,625, of which all but 13 are females.

The number of female housewives represent 36.92 per cent of the whole number of females. By housewives are meant the female heads of the household, that is, the wife or some person in the family who has general charge of the domestic affairs. For those engaged in housework without fixed compensation, we find there are 89,062 persons, 77 of these being males and the balance females. Of the total population, 338,726, or 17.44 per cent, are either scholars or students, the number of males and females for those classes being practically the same.

Principal Occupations (page 39) is the second general division of occupations and constitutes a detailed showing, by towns, of the principal occupations of the people, classified as to age periods and place of birth, and has been compiled to cover, so far as practicable, the leading occupations followed in each particular city or town. This table comprehends a more detailed classification of occupations than the preceding presentation by towns for classified occupations, and in the consideration and use of any information contained therein reference should be made to the explanatory text on page 41 immediately preceding its presentation. This table supplies for each city and town a most comprehensive insight into the character and composition of the various classes of persons engaged in its industries, and will be found of great service in the consideration of the details of occupations for the various localities. It shows at a glance the relative importance of industries in towns and the comparative importance as regards other towns having the same or similar industries. The presentation by age periods and place of birth enables the reader to ascertain quickly the difference, if any, in these respects, between any class of workers in different parts of the State or in the various towns in the same locality.

The table could have easily been made to cover twice the space it occupies, or even more, and then, in many instances, it would have failed to answer the requirements of the public for more detailed information as regards particular towns. The table has been carefully and judiciously prepared, however, and the information contained therein is all that could be presented without encroaching upon the space allotted for other presentations.

Occupations by Name (page 409) is the third and last general division for occupations, and the tabular presentations shown thereunder are for the State only, and comprise the following subdivisions:

Occupations in Detail, by Sex.
Occupations by Age Periods and Place of Birth.
Occupations of Aliens, in Detail.
Occupations of Aliens, by Place of Birth.

The first two relate to the occupations of the entire population, and the last two to the occupations of aliens. Each subdivision will be considered in detail in its order.

As has been already stated in a general way, the work of enumerating the occupations of the people in the Census of 1885 was instituted with a view to obtaining exact and definite information. For this purpose the Enumerators were especially instructed and cautioned as to the necessity of making their returns in accordance with the actual facts, so far as could be ascertained, concerning the occupation of each individual enumerated, following the plan, as comprehended in the printed instructions, of ascertaining, first, the general name of the occupation; second, the particular branch followed; third, the material worked upon; fourth, whether an employer or a person employed, and fifth, as regards persons engaged in trade, as to whether in a wholesale or retail business.

The necessity for such a classification is apparent to all who have had occasion in the past to make use of such data, and the uses to which it may be put, now that such classification in great measure has been ascertained, are many and varied. If the printed results derived therefrom will not answer all requirements, it should be borne in mind that the necessity of considering space somewhat must enter into all Census presentations, although the space allotted to the presentation of occupations has been ample, to say the least, exceeding largely the original expectations of the Census Office. The work of enumerating and tabulating occupation returns in accordance with the plan as outlined has been almost stupendous, but has been carried through without thought or fear of failure, and the results fully warrant the cost and the trouble. A classification of occupations in great detail has been secured, and if not perfect and in harmony in all its parts, the way has been opened and the work of the future considerably shortened and made comparatively easy. The results of this extended classification of occupations are contained in the presentation of "Occupations in Detail, by Sex" beginning on page 413, and in the consideration of the same reference should be made to the explanatory text on page 411.

As is there stated, there has been no suppression of fact, nor indeed was any attempt towards condensation contemplated, the object being to obtain rather as minute and detailed a classification as possible. It constitutes a complete picture of the population, irrespective of locality, and comprehends all classes of people, both old and young, the entire population, for Census purposes, being supposed to be occupied. It is possible, in this extended classification, that duplications of designations of occupations may occur, that is, two or more designations may have been given to the same mechanical operation, as the occupations are based upon the returns for individuals, and not establishments, and no attempt has been made to bring them to a uniform, or classified establishment basis, except only so far as to avoid manifest duplications.

In considering the results as shown in this or in any of the occupation tables, it should be remembered that these are the occupations as they were returned by the people themselves; that is, they are the occupations considered to be their chief occupation or principal means of securing a livelihood, and may not represent, in any case, the true number of persons actually engaged in particular pursuits. They represent the number only as returned in the Census and taken from the population schedules.

Any attempt at analyzing or presenting fully in this analysis the results as shown in this or the succeeding table, showing occupations by age periods and place of birth, would be futile. The tables in themselves are analyses, and from them may be derived much information that is interesting, instructive, and extremely valuable, and not heretofore shown in or contemplated by previous Census publications. The large number of occupations followed by women at the present time as compared with the comparatively small circles of employment of a few years ago is aptly illustrated in these tables, and, so far as this State is concerned, the inquiry so frequently made concerning the occupations of women can be readily answered. In many other ways, also, the value of the tables will be demonstrated as the results are brought out in one way and another.

The recapitulation on pages 528–531 of the showing of "Occupations in Detail, by Sex" presents the results by the minor subdivisions of classes of occupations, and from this recapitulation we can consider briefly the composition of each class, without entering into a discussion of the specific details, by showing the distribution into minor subdivisions of classes, both by number and percentages, in a series of tables. The first of these tables comprehends the government and professional classes.

OCCUPATIONS.	NUMBER			PERCENTAGES		
	Males	Females	Both Sexes	Males	Females	Both Sexes
GOVERNMENT.	9,621	1,311	10,932	100.00	100.00	100.00
National government,	2,613	240	2,853	27.16	18.31	26.10
State government,	868	618	1,486	9.02	47.14	13.59
City and town government,	5,479	453	5,932	56.95	34.55	54.26
Army,	254	–	254	2.64	–	2.33
Navy,	407	–	407	4.23	–	3.72
PROFESSIONAL.	16,555	14,250	30,805	100.00	100.00	100.00
Religion,	3,026	408	3,434	18.28	2.86	11.15
Law,	2,239	8	2,247	13.52	0.06	7.29
Medicine,	3,812	424	4,236	23.03	2.98	13.75
Literature,	990	423	1,413	5.98	2.97	4.59
Art,	749	543	1,292	4.52	3.81	4.19
Music,	1,557	2,065	3,622	9.41	14.49	11.76
Amusements,	610	162	772	3.68	1.14	2.51
Education,	1,576	10,094	11,670	9.52	70.83	37.88
Science,	1,996	123	2,119	12.06	0.86	6.88

Analyzing this table we find that there are 9,621 males and 1,311 females returned as being in government service. Of the whole number of males so engaged we find that there are 2,613, or 27.16 per cent, in the service of the national government; 868 males, or 9.02 per cent, in the service of the state government, and 5,479, or 56.95 per cent, in the service of city or town governments. The small number remaining represent 661 persons, or 6.87 per cent, in the service of the army or navy. For females we find that of the whole number in government service there are 240, or 18.31 per cent, in the service of the national government; 618, or 47.14 per cent, in the service of the state government, and 453, or 34.55 per cent, in the service of city or town governments.

For professional persons there are 16,555 males and 14,250 females. Of the whole number of males in professional pursuits, 3,026, or 18.28 per cent, are engaged in pursuits pertaining to religion; 2,239, or 13.52 per cent, in law, and 3,812, or 23.03 per cent, in medicine. There are also 1,996 males, or 12.06 per cent, engaged in scientific pursuits; 1,576 males, or 9.52 per cent, in education, and 1,557, or 9.41 per cent, in music. For females 10,094, or 70.83 per cent, are engaged in educational pursuits and 2,065, or 14.49 per cent, in music. The females returned under these two subdivisions represent 85.32 per cent of all the females engaged in professional pursuits.

It has already been shown that there are in all 534,156 persons, representing 27.50 per cent of the entire population, who are engaged in domestic service, 11,573 being males and 522,583 being females. A distribution of this class of persons by minor subdivisions is shown in the following table, the results for housewives and persons engaged in housework without fixed compensation being given separately.

OCCUPATIONS.	NUMBER			PERCENTAGES		
	Males	Females	Both Sexes	Males	Females	Both Sexes
DOMESTIC SERVICE.	11,573	522,583	534,156	100.00	100.00	100.00
Boarding and lodging, . . .	7,648	7,328	14,976	66.08	1.40	2.80
Domestic service (private families), ...	3,925	515,255	519,180	33.92	98.60	97.20
Housewives, . . .	13	372,612	372,625	0.11	71.30	69.76
Housework, . . .	77	88,985	89,062	0.67	17.03	16.68
Housekeepers, . . .	25	4,901	4,926	0.22	0.94	0.92
Other persons, . . .	3,810	48,757	52,567	32.92	9.33	9.84

Considering this table we find for males that 7,648, or 66.08 per cent, are engaged in boarding and lodging; that is, hotel, boarding-house, or restaurant and saloon service. In domestic service for private families there are 3,925 males, or 33.92 per cent. Of the females of this class 7,328 only, or 1.40 per cent, are in boarding and lodging, while 515,255, or 98.60 per cent, are in domestic service for private families; this last number is subdivided into 372,612 housewives, or 71.30 per cent of the whole number of females in this class, 88,985 persons engaged in housework without fixed compensation, or 17.03 per cent, 4,901 housekeepers, or 0.94 per cent, and 48,757 other persons engaged in domestic service for private families, or 9.33 per cent. Under "Personal Service" comprehending 24,070 persons, or 14,282 males and 9,788 females, there is no classified subdivision of occupations.

The persons engaged in trade and transportation number, respectively, 106,773 and 48,818. The distribution of these two classes of occupations is shown in the following table, together with the distribution of the 77,661 persons engaged in agriculture.

OCCUPATIONS.	NUMBER			PERCENTAGES		
	Males	Females	Both Sexes	Males	Females	Both Sexes
TRADE.	94,936	11,837	106,773	100.00	100.00	100.00
Merchants and dealers, . .	33,555	1,357	34,912	35.34	11.46	32.70
Salesmen and saleswomen, . .	14,978	3,828	18,806	15.78	32.34	17.61
Accountants, bookkeepers, clerks, etc., ...	29,108	5,784	34,892	30.66	48.86	32.68
Agents, bankers, brokers, etc., .	8,192	197	8,389	8.63	1.67	7.86
Messengers, porters, etc., . .	9,103	671	9,774	9.59	5.67	9.15
TRANSPORTATION.	48,675	143	48,818	100.00	100.00	100.00
Carriers on roads, . . .	27,972	28	28,000	57.47	19.58	57.36
Carriers on steam railroads, .	15,292	108	15,400	31.41	75.52	31.54
Carriers on seas and rivers, . .	5,411	7	5,418	11.12	4.90	11.10
AGRICULTURE.	77,257	404	77,661	100.00	100.00	100.00
Agriculture, ...	76,896	395	77,291	99.53	97.77	99.52
Care of animals, etc., . . .	361	9	370	0.47	2.23	0.48

The division of the persons represented by these three classes into the minor classifications of occupations both as regards number and percentages is plainly shown in the preceding table, and need not be analyzed in detail.

Of the males engaged in agriculture 36,234 are returned as farmers, 1,647 of these having also some other business, and 35,518 as farm laborers. Of the 404 females engaged in agriculture 305 are returned as farmers, 14 as farm laborers, 35 as florists, and 20 as seed farm employés, etc.

The persons engaged in manufactures number in all 394,584, and represent 20.32 per cent of the entire population. Of this number 281,822 are males representing 30.21 per cent of the entire male population, and 112,762 are females representing 11.17 per cent of all the females. Of the 83 manufacturing industries of the Commonwealth but a comparatively few represent or include large aggregations of forces. For instance, the industries called boots and shoes, building, clothing, cotton goods, machines and machinery, metals and metallic goods, and woollen goods represent 271,421 people, or 68.78 per cent of all the persons engaged in manufactures.

If to these industries just named we add those industries in each of which there is engaged at least one per cent of all the persons returned in manufactures, we have included in 17 out of the 83 industries over 85 per cent (85.89) of the productive force engaged in the purely manufacturing interests of the Commonwealth. The industries so designated are shown in the following table :

INDUSTRIES.	NUMBER			PERCENTAGES		
	Males	Females	Both Sexes	Males	Females	Both Sexes
MANUFACTURES.	281,822	112,762	394,584	100.00	100.00	100.00
Boots and shoes, ...	48,013	14,390	62,403	17.04	12.76	15.82
Building, ...	48,808	19	48,827	17.32	0.02	12.37
Carriages and wagons, . .	5,323	43	5,366	1.89	0.04	1.36
Clothing, ...	5,732	27,564	33,296	2.03	24.44	8.44
Cotton goods, ...	26,844	31,521	58,365	9.52	27.95	14.79
Food preparations, . . .	6,400	738	7,138	2.27	0.66	1.81
Furniture, ...	7,841	606	8,447	2.78	0.54	2.14
Leather, ...	9,777	149	9,926	3.47	0.13	2.52
Machines and machinery, . .	15,658	93	15,751	5.56	0.08	3.99
Metals and metallic goods, .	27,755	1,766	29,521	9.85	1.57	7.48
Paper and paper goods, . .	4,680	3,781	8,461	1.66	3.35	2.14
Printing, publishing, and bookbinding, ...	6,475	2,349	8,824	2.30	2.08	2.24
Rubber and elastic goods, .	3,029	2,147	5,176	1.07	1.90	1.31
Stone, ...	4,430	2	4,432	1.57	–	1.12
Straw and palm leaf goods,	1,388	3,311	4,699	0.49	2.94	1.19
Wooden goods, ...	5,014	124	5,138	1.78	0.11	1.30
Woollen goods, ...	14,108	9,150	23,258	5.01	8.12	5.90
Other manufactures, . .	40,547	15,009	55,556	14.39	13.31	14.08

The textile industries of the State represent about one-fourth of the entire manufacturing population, or 99,746 persons, of which 49,927 are males and 49,819 are females. The number returned for each industry is shown in detail in the following table :

INDUSTRIES.	Males	Females	Both Sexes
Textile Industries.	49,927	49,819	99,746
Carpetings, ...	1,298	1,591	2,889
Cordage and twine, ...	1,101	756	1,857
Cotton goods, ...	26,844	31,521	58,365
Cotton, woollen, and other textiles, ...	28	8	36
Flax, hemp, and jute goods, ...	304	205	509
Hosiery and knit goods, ...	981	2,406	3,387
Linen, ...	336	462	798
Mixed textiles, ...	3	43	46
Print works, dye works, and bleacheries, ...	3,230	551	3,781
Silk and silk goods, ...	554	1,414	1,968
Woollen goods, ...	14,108	9,150	23,258
Worsted goods, ...	1,140	1,712	2,852

The scholars and students number in all 338,726, the distribution by sex being practically even, as shown in the following table:

OCCUPATIONS.	NUMBER			PERCENTAGES		
	Males	Females	Both Sexes	Males	Females	Both Sexes
SCHOLARS AND STUDENTS.	169,030	169,696	338,726	100.00	100.00	100.00
Scholars (public schools), .	154,456	149,595	304,051	91.38	88.16	89.76
Scholars (private schools), .	10,013	17,520	27,533	5.92	10.32	8.13
Students, ...	4,561	2,581	7,142	2.70	1.52	2.11

Of the whole number of scholars and students without regard to sex 304,051, or 89.76 per cent, are scholars attending the public schools, 27,533, or 8.13 per cent, are scholars attending private schools, and 7,142, or 2.11 per cent, are students in colleges or following special branches of study. Considered as regards sex, we find that 91.38 per cent of the males and 88.16 per cent of the females attend the public schools, while 5.92 per cent of the males and 10.32 per cent of the females attend private schools.

The remaining classes of occupations have no classified subdivisions, but have been previously considered in connection with the analysis of "Classified Occupations."

The second presentation under the third general division of occupations relates to "Occupations by Age Periods and Place of Birth," and begins on page 532. It is a presentation of occupations for the State, on a less comprehensive basis, so far as details are concerned, than the table showing occupations in detail by sex. It represents, however, the larger and more important divisions of occupations without regard to the specific details, and follows closely the classification of occupations used in the preceding table (page 413), so that by reference to that table one may easily determine the specific details included in the occupation designations used in this table. In addition to sex as previously shown, the occupations are considered as regards age periods and place of birth. In the classification by place of birth, the native born persons are subdivided into those born in Massachusetts, those born in any of the other New England States, and those born in any other States or in the territories; for the foreign born the principal foreign countries are shown in the body of the table, and in subsequent recapitulations the occupations of persons born in any foreign country not previously shown are presented as regards each country, so that the occupation of each and every person is properly presented and classified according to their particular place of birth.

In the consideration of this table we reproduce from the recapitulation on page 629, showing classified occupations by age periods, a series of tables, subdivided into sections for convenience of handling, both by number and percentages. The first of these tables showing the distribution by age periods of the first six classes is as follows:

Age Periods.	Government	Professional	Domestic Service	Personal Service	Trade	Transportation
The State.	10,932	30,805	534,156	24,070	106,773	48,818
10 to 13 years,	–	–	393	–	–	–
14 to 19 years,	316	1,508	34,568	1,579	16,264	3,452
20 to 29 years,	2,352	11,460	132,309	6,655	33,769	17,075
30 to 39 years,	2,874	7,743	122,153	5,907	23,796	13,031
40 to 49 years,	2,665	5,051	101,042	4,680	16,322	8,442
50 to 59 years,	1,592	2,862	73,705	3,238	9,802	4,547
60 to 79 years,	1,101	2,115	65,661	1,984	6,673	2,250
80 years and over,	31	62	4,288	22	143	20
Age unknown,	1	4	37	5	4	1

The distribution by percentages according to age periods for these six classes is shown in the following table:

Age Periods.	Government	Professional	Domestic Service	Personal Service	Trade	Transportation
The State.	100.00	100.00	100.00	100.00	100.00	100.00
10 to 13 years,	–	–	0.07	–	–	–
14 to 19 years,	2.89	4.89	6.47	6.56	15.23	7.07
20 to 29 years,	21.52	37.20	24.77	27.65	31.63	34.98
30 to 39 years,	26.29	25.14	22.87	24.54	22.29	26.69
40 to 49 years,	24.38	16.40	18.92	19.45	15.29	17.29
50 to 59 years,	14.56	9.29	13.80	13.45	9.18	9.32
60 to 79 years,	10.07	6.87	12.29	8.24	6.25	4.61
80 years and over,	0.28	0.20	0.80	0.09	0.13	0.04
Age unknown,	0.01	0.01	0.01	0.02	–	–

From these two tables we find for each of these six classes that the majority of the persons are between 20 and 50 years of age, the persons between these ages representing for government 72.19 per cent, for professional 78.74 per cent, for domestic service 66.56 per cent, for personal service 71.64 per cent, for trade 69.21 per cent, and for transportation 78.96 per cent. We find, also, that the persons from 50 to 79 years of age in government service constitute 24.63 per cent of the whole, those in professional service 16.16 per cent, those in domestic service 26.09 per cent, those in personal service 21.69 per cent, those in trade 15.43 per cent, and those in transportation 13.93 per cent. There are also engaged in trade 15.23 per cent of persons who are from 14 to 19 years of age.

As has been previously mentioned the larger part of the persons engaged in domestic service are housewives or persons engaged in housework without fixed compensation. The distribution of these two classes by age periods, as well as of all other persons engaged in domestic service, is shown in the following table:

AGE PERIODS.	NUMBER			PERCENTAGES		
	House-wives	House-work	Other Persons	House-wives	House-work	Other Persons
THE STATE.	372,625	89,062	72,469	100.00	100.00	100.00
10 to 13 years,	1	392	–	–	0.44	–
14 to 19 years,	2,661	20,604	11,303	0.71	23.13	15.60
20 to 29 years,	70,450	28,248	33,611	18.91	31.72	46.38
30 to 39 years,	97,914	11,840	12,399	26.28	13.29	17.11
40 to 49 years,	85,920	7,365	7,757	23.06	8.27	10.70
50 to 59 years,	62,455	6,846	4,404	16.76	7.69	6.08
60 to 79 years,	50,384	12,381	2,896	13.52	13.90	4.00
80 years and over,	2,824	1,381	83	0.76	1.55	0.11
Age unknown,	16	5	16	–	0.01	0.02

Of all the housewives as above shown 18.91 per cent are between 20 and 29 years of age, 26.28 per cent are from 30 to 39 years of age, 23.06 per cent are from 40 to 49 years of age, 16.76 per cent are from 50 to 59 years of age, and 13.52 per cent are from 60 to 79 years of age. Of all the persons engaged in housework without fixed compensation, that is, daughters and relatives living at home, 23.13 per cent are from 14 to 19 years of age, 31.72 per cent are from 20 to 29 years of age, and 13.29 per cent are from 30 to 39 years of age. The persons from 60 to 79 years of age represent 13.90 per cent, showing the presence of mothers in the homes of married sons and daughters. For the other persons engaged in domestic service with remuneration, 46.38 per cent are from 20 to 29 years of age.

A similar table is given representing the six classes of occupations which constitute the actual productive energy of the Commonwealth, as follows:

AGE PERIODS.	Agriculture	The Fisheries	Manufactures	Mining	Laborers	Apprentices
THE STATE.	77,661	7,980	394,584	1,562	32,936	5,678
14 to 19 years,	9,548	583	67,958	147	2,333	4,644
20 to 29 years,	15,796	2,853	131,910	518	8,083	1,018
30 to 39 years,	11,415	1,921	82,788	387	6,466	12
40 to 49 years,	11,546	1,387	57,619	268	6,464	4
50 to 59 years,	11,829	762	34,419	163	5,096	–
60 to 79 years,	16,588	466	19,497	78	4,383	–
80 years and over,	926	8	365	1	105	–
Age unknown,	13	–	28	–	6	–

The distribution by percentages for these classes is shown in the following table:

Age Periods.	Agriculture	The Fisheries	Manufactures	Mining	Laborers	Apprentices
The State.	100.00	100.00	100.00	100.00	100.00	100.00
14 to 19 years,	12.29	7.31	17.22	9.41	7.08	81.79
20 to 29 years,	20.34	35.75	33.43	33.16	24.54	17.93
30 to 39 years,	14.70	24.07	20.98	24.78	19.63	0.21
40 to 49 years,	14.87	17.38	14.60	17.16	19.63	0.07
50 to 59 years,	15.23	9.55	8.73	10.44	15.47	–
60 to 79 years,	21.36	5.84	4.94	4.99	13.31	–
80 years and over,	1.19	0.10	0.09	0.06	0.32	–
Age unknown,	0.02	–	0.01	–	0.02	–

Analyzing this percentage table we find for persons engaged in agriculture a very even distribution for the age periods from 14 to 49 years of age, these age periods comprehending 62.20 per cent of the whole number. There are also 15.23 per cent from 50 to 59 years of age, and 21.36 per cent from 60 to 79 years of age. In the fisheries 35.75 per cent of all the persons are from 20 to 29 years of age, 24.07 per cent are from 30 to 39 years of age, and 17.38 per cent are from 40 to 49 years of age, or 77.20 per cent between 20 and 49 years of age.

In manufactures 17.22 per cent of all the persons are from 14 to 19 years of age, 33.43 per cent from 20 to 29 years of age, 20.98 per cent from 30 to 39 years of age, 14.60 per cent from 40 to 49 years of age, or 86.23 per cent less than 50 years of age. The persons engaged in manufactures from 50 to 59 years of age constitute 8.73 per cent of the whole number, those from 60 to 79 years of age 4.94 per cent, and those 80 years of age and over 0.09 per cent.

The results for persons engaged in mining do not differ materially from those in manufactures, there being 84.51 per cent less than 50 years of age as against 86.23 per cent in manufactures. For laborers, however, we find that those under 50 years of age constitute but 70.88 per cent of the entire number, 15.47 per cent being from 50 to 59 years of age and 13.31 per cent from 60 to 79 years of age. Of the apprentices 81.79 per cent are from 14 to 19 years of age and 17.93 per cent from 20 to 29 years of age, a few persons from 30 to 49 years of age being also returned as apprentices.

Corresponding presentations by age periods concerning "children at work" and "scholars and students" are not given here in detail, as special presentations are made for these two classes of people (see pages 739 and 785) and will be considered in their order. The class of persons who were returned as being "at home" include all the children who are too young to go to school, as well as those children under 10 years of age who for some reason are not returned as being at school during the Census year. The six remaining classes, which, together with scholars and students and children at home, constitute the non-productive element of the population, are shown in the following table:

Age Periods.	Retired	Not Gainful, etc.	Not Productive	Unemployed Twelve Months	Dependents	Not Given
The State.	25,662	210	24,212	822	6,386	39,915
Under 10 years,	–	–	2,463	–	–	–
10 to 13 years,	–	–	733	–	–	1,175
14 to 19 years,	4	18	1,736	55	38	11,428
20 to 29 years,	122	52	4,008	191	80	10,828
30 to 39 years,	411	26	3,331	103	87	4,545
40 to 49 years,	1,070	19	3,161	92	156	2,889
50 to 59 years,	2,994	19	2,667	139	552	2,368
60 to 79 years,	15,959	63	4,889	222	3,709	5,215
80 years and over,	5,101	13	1,206	20	1,763	1,442
Age unknown,	1	–	18	–	1	25

This table is succeeded as in other cases by the following table of percentages:

Age Periods.	Retired	Not Gainful, etc.	Not Productive	Unemployed Twelve Months	Dependents	Not Given
The State.	100.00	100.00	100.00	100.00	100.00	100.00
Under 10 years,	–	–	10.17	–	–	–
10 to 13 years,	–	–	3.03	–	–	2.94
14 to 19 years,	0.02	8.57	7.17	6.69	0.60	28.63
20 to 29 years,	0.47	24.76	16.55	23.24	1.25	27.13
30 to 39 years,	1.60	12.38	13.76	12.53	1.36	11.39
40 to 49 years,	4.17	9.05	13.06	11.19	2.44	7.24
50 to 59 years,	11.67	9.05	11.02	16.91	8.64	5.93
60 to 79 years,	62.19	30.00	20.19	27.01	58.08	13.07
80 years and over,	19.88	6.19	4.98	2.43	27.61	3.61
Age unknown,	–	–	0.07	–	0.02	0.06

The natural concentration upon the older age periods for the retired and dependent classes is observed, 93.74 per cent of the retired persons being 50 years of age and over and of the dependent persons 94.33 per cent.

The "not productive" class, which includes the pauper and criminal classes as well as afflicted persons having no occupations, is made up of 10.17 per cent under 10 years of age, 10.20 per cent from 10 to 19 years of age, 43.37 per cent from 20 to 49 years of age, 11.02 per cent from 50 to 59 years of age, 20.19 per cent from 60 to 79 years of age, and 4.98 per cent 80 years of age and over. Of the persons for whom no occupation is given 2.94 per cent are from 10 to 13 years of age, 28.63 per cent from 14 to 19 years of age, and 27.13 per cent from 20 to 29 years of age, 58.70 per cent being less than 30 years of age.

Taking into consideration each class of occupations separately by place of birth we can present a similar series of tables showing numbers and percentages. From the consideration of these place of birth tables, the presence of the immigrant population in the various classes of occupations can be determined.

For convenience of comparison we present from Part 1, a table showing the distribution of the total population in 1885 by place of birth, as follows:

PLACE OF BIRTH.	Number	Percentages
THE STATE.	1,942,141	100.00
Native Born.	1,415,274	72.87
Massachusetts,	1,117,440	57.54
Other New England States,	216,725	11.16
Other States,	81,109	4.17
Foreign Born.	526,867	27.13
Ireland,	244,629	12.60
Canada (English),	15,859	0.82
Canada (French),	64,503	3.32
England,	56,924	2.93
Scotland,	15,970	0.82
Nova Scotia,	40,839	2.10
Prince Edward Island,	6,809	0.35
New Brunswick,	16,449	0.85
Germany,	23,115	1.19
Sweden,	9,436	0.49
Portugal,	6,118	0.31
Other Countries,	26,216	1.35

The first of these place of birth tables applies to the first six classes of occupations, the number table being as follows:

PLACE OF BIRTH.	Government	Professional	Domestic Service	Personal Service	Trade	Transportation
THE STATE.	10,932	30,805	534,156	24,070	106,773	48,818
Native Born.	8,765	26,997	328,657	13,467	85,158	33,043
Massachusetts,	5,904	18,373	228,417	7,920	62,455	22,410
Other New England States,	2,203	5,960	75,123	3,403	17,414	8,410
Other States,	658	2,664	25,117	2,144	5,289	2,223
Foreign Born.	2,167	3,808	205,499	10,603	21,615	15,775
Ireland,	1,153	964	111,967	5,410	8,679	9,132
Canada (English),	67	206	5,780	267	887	589
Canada (French),	49	350	16,265	691	1,629	1,540
England,	256	617	17,607	933	2,781	933
Scotland,	61	132	5,391	255	776	237
Nova Scotia,	200	271	16,802	787	1,806	1,408
Prince Edward Island,	29	32	3,152	109	193	156
New Brunswick,	90	139	6,432	349	966	495
Germany,	90	435	8,149	435	1,194	221
Sweden,	24	66	3,662	135	217	163
Portugal,	24	22	2,059	196	190	242
Other Countries,	124	574	8,233	1,036	2,297	659

Reducing these numbers to percentages we have the following results:

PLACE OF BIRTH.	Government	Professional	Domestic Service	Personal Service	Trade	Transportation
THE STATE.	100.00	100.00	100.00	100.00	100.00	100.00
Native Born.	80.18	87.64	61.53	55.95	79.76	67.69
Massachusetts,	54.01	59.64	42.76	32.90	58.49	45.91
Other New England States,	20.15	19.35	14.07	14.14	16.31	17.23
Other States,	6.02	8.65	4.70	8.91	4.96	4.55
Foreign Born.	19.82	12.36	38.47	44.05	20.24	32.31
Ireland,	10.55	3.13	20.96	22.48	8.13	18.71
Canada (English),	0.61	0.67	1.08	1.11	0.83	1.21
Canada (French),	0.45	1.14	3.04	2.87	1.53	3.15
England,	2.34	2.00	3.30	3.88	2.60	1.91
Scotland,	0.56	0.43	1.01	1.06	0.73	0.49
Nova Scotia,	1.83	0.88	3.15	3.27	1.69	2.88
Prince Edward Island,	0.27	0.10	0.59	0.45	0.18	0.32
New Brunswick,	0.82	0.45	1.20	1.45	0.90	1.01
Germany,	0.82	1.41	1.53	1.81	1.12	0.45
Sweden,	0.22	0.22	0.69	0.56	0.20	0.33
Portugal,	0.22	0.07	0.38	0.81	0.18	0.50
Other Countries,	1.13	1.86	1.54	4.30	2.15	1.35

Analyzing the results by percentages we find that of those in government service 80.18 per cent are native born and 19.82 per cent are foreign born. The persons born in Massachusetts who are engaged in government service represent 54.01 per cent of the whole number, while those born in Ireland constitute 10.55 per cent. Of the professional people 87.64 per cent are native born and 12.36 per cent are foreign born, 59.64 per cent of the whole number having been born in Massachusetts.

Of the persons engaged in domestic service 61.53 per cent are native born and 38.47 per cent are foreign born, while for persons engaged in personal service we find that 55.95 per cent are native born and 44.05 per cent are foreign born. Of all the persons engaged in trade, 79.76 per cent are native born, 58.49 per cent having been born in Massachusetts, while for transportation the native born persons constitute 67.69 per cent and the foreign born persons 32.31 per cent. Attention may be called, also, to the concentration on the foreign born for domestic and personal service and for transportation. The percentage of foreign born for each of these three classes exceeds considerably the percentage of foreign born in the entire population, that being, as previously shown, 27.13 per cent.

The following table presents a classification under three heads of persons engaged in domestic service, namely, housewives, persons engaged in housework, and other persons in domestic service, the last named class of persons being so engaged with remuneration.

PLACE OF BIRTH.	NUMBER			PERCENTAGES		
	House-wives	House-work	Other Persons	House-wives	House-work	Other Persons
THE STATE.	372,625	89,062	72,469	100.00	100.00	100.00
Native Born.	228,454	71,390	28,813	61.31	80.16	39.76
Massachusetts, ...	152,805	57,411	18,201	41.01	64.46	25.12
Other New England States, .	58,318	10,190	6,615	15.65	11.44	9.13
Other States, ...	17,331	3,789	3,997	4.65	4.26	5.51
Foreign Born.	144,171	17,672	43,656	38.69	19.84	60.24
Ireland, ...	77,563	8,329	26,075	20.82	9.35	35.98
Canada (English), . . .	3,780	625	1,375	1.01	0.70	1.90
Canada (French), . . .	13,788	1,749	728	3.70	1.96	1.00
England, ...	13,689	1,859	2,059	3.67	2.09	2.84
Scotland, ...	4,084	568	739	1.10	0.64	1.02
Nova Scotia, ...	9,651	1,616	5,535	2.59	1.81	7.64
Prince Edward Island, . .	1,545	257	1,350	0.41	0.29	1.86
New Brunswick, ...	4,160	770	1,502	1.12	0.87	2.07
Germany, ...	6,510	618	1,021	1.75	0.69	1.41
Sweden, ...	2,131	252	1,279	0.57	0.28	1.77
Portugal, ...	1,561	211	287	0.42	0.24	0.40
Other Countries, . . .	5,709	818	1,706	1.53	0.92	2.35

Of the whole number of housewives, as above shown, 61.31 per cent are native born and 38.69 per cent are foreign born; of the persons engaged in housework 80.16 per cent are native born and 19.84 per cent are foreign born, 64.46 per cent having been born in Massachusetts, while of the other persons engaged in domestic service, we find that 39.76 per cent are native born and 60.24 per cent are foreign born. Considering in turn the persons engaged in the purely productive occupations, we have the results shown in the following table:

PLACE OF BIRTH.	Agri-culture	The Fisheries	Manu-factures	Mining	Laborers	Appren-tices
THE STATE.	77,661	7,980	394,584	1,562	32,936	5,678
Native Born.	59,476	4,146	238,076	521	10,980	4,450
Massachusetts, ...	48,272	3,555	171,093	364	8,451	3,819

Other Countries,	0.85	7.50	1.70	7.24	2.53	1.73

These six classes of persons constitute the real workers in the Commonwealth, and their distribution by place of birth becomes of value and of interest. From the percentage table we find that of all the persons engaged in agriculture 76.58 per cent are native born and 23.42 per cent are foreign born. The persons engaged in agriculture who were born in Massachusetts constitute 62.15 per cent of the whole number, those born in the other New England States 11.05 per cent, and those born in Ireland 12.58 per cent. For the fisheries we find that 51.95 per cent are native born and 48.05 per cent are foreign born, the persons of Massachusetts birth representing 44.55 per cent, those born in Nova Scotia 16.40 per cent, and those born in Portugal (including the Western Islands) 9.32 per cent.

In manufactures we find that 60.34 per cent of all the persons engaged therein are native born and 39.66 per cent are foreign born. The persons engaged in manufactures who were born in Massachusetts represent 43.36 per cent, those born in the other New England States 12.90 per cent, and those born in Ireland 14.92 per cent.

For mining we find that about two-thirds of all the persons so engaged are foreign born, the exact percentage being 66.65. The persons born in Ireland represent 32.52 per cent, the French Canadians 8.45 per cent, and the persons born in Massachusetts 23.30 per cent.

The classification of laborers according to native and foreign born presents practically the same results as just shown for mining. The percentage of persons born in Ireland, however, is particularly noticeable, being 50.46 per cent, or over one-half of the whole number of laborers, while those born in Massachusetts constitute 25.66 per cent.

For the apprentices but 21.63 per cent are foreign born, 78.37 per cent being native born. Those born in Massachusetts represent 67.26 per cent of the whole number and those born in Ireland 6.01 per cent.

The classification by place of birth of the retired, dependent, and other non-productive classes is given in the following table:

PLACE OF BIRTH.	Retired	Not Gainful, etc.	Not Productive	Un-employed Twelve Months	Dependents	Not Given
THE STATE.	25,662	210	24,212	822	6,386	39,915
Native Born.	19,782	143	16,500	453	2,961	33,462
Massachusetts, ...	14,215	86	12,823	353	1,950	25,524
Other New England States, .	4,858	35	2,307	74	844	5,604
Other States, ...	709	22	1,370	26	167	2,334
Foreign Born.	5,880	67	7,712	369	3,425	6,453

Portugal, ...	35	–	48	2	34	107
Other Countries, . . .	215	4	304	22	117	505

The following table gives the percentages for the same classes:

PLACE OF BIRTH.	Retired	Not Gainful, etc.	Not Productive	Un-employed Twelve Months	Dependents	Not Given
THE STATE.	100.00	100.00	100.00	100.00	100.00	100.00
Native Born.	77.09	68.10	68.15	55.11	46.37	83.83
Massachusetts, ...	55.40	40.95	52.96	42.95	30.54	63.94
Other New England States, .	18.93	16.67	9.53	9.00	13.22	14.04
Other States, ...	2.76	10.48	5.66	3.16	2.61	5.85
Foreign Born.	22.91	31.90	31.85	44.89	53.63	16.17
Ireland, ...	14.00	11.90	20.78	25.06	36.86	6.23
Canada (English), . . .	0.26	0.95	0.71	0.37	0.53	0.61
Canada (French), . . .	1.62	2.38	1.56	3.41	6.05	1.79
England, ...	2.62	12.86	2.98	4.87	2.82	1.85
Scotland, ...	0.98	1.43	0.78	2.19	1.14	0.54
Nova Scotia, ...	0.82	0.48	1.25	1.58	1.13	1.66
Prince Edward Island, . .	0.06	–	0.22	0.12	0.22	0.26
New Brunswick, ...	0.25	–	0.83	0.73	0.47	0.87
Germany, ...	1.25	–	0.94	3.28	1.72	0.56
Sweden, ...	0.08	–	0.35	0.36	0.33	0.27
Portugal, ...	0.13	–	0.20	0.24	0.53	0.27
Other Countries, . . .	0.84	1.90	1.25	2.68	1.83	1.26

From this table it is seen that 77.09 per cent of the retired persons are native born and 22.91 per cent are foreign born, 55.40 per cent having been born in Massachusetts and 14.00 per cent in Ireland. Of the persons classified as "not gainful, etc." and "not productive," over two-thirds are native born, 40.95 per cent of the "not gainful, etc.," and 52.96 per cent of the "not productive," having been born in Massachusetts. Of the persons who were unemployed twelve months 55.11 per cent are native born and 44.89 per cent are foreign born. Of the dependents, 53.63 per cent are foreign born and 46.37 per cent are native born, the dependents born in Massachusetts constituting 30.54 per cent and the dependents born in Ireland 36.86 per cent. Of the persons for whom no occupation was given 83.83 per cent are native born and but 16.17 per cent are foreign born, 63.94 per cent having been born in Massachusetts.

Of the persons returned as being "at home," that is, young persons under 10 years of age not at school, 95.11 per cent are native born and 4.89 per cent are foreign born, 90.21 per cent having been born in Massachusetts. The results for this class of persons are shown in the following table:

PLACE OF BIRTH.	Number	Percentages
THE STATE.	227,213	100.00
Native Born.	216,111	95.11
Massachusetts,	204,973	90.21
Other New England States,	7,080	3.12
Other States,	4,058	1.78
Foreign Born.	11,102	4.89
Ireland,	1,569	0.69
Canada (English),	493	0.22
Canada (French),	3,259	1.43
England,	1,501	0.66
Scotland,	466	0.21
Nova Scotia,	1,084	0.48
Prince Edward Island,	232	0.10
New Brunswick,	561	0.25
Germany,	567	0.25
Sweden,	313	0.14
Portugal,	144	0.06
Other Countries,	913	0.40

We have considered thus far the distribution of persons engaged in the various classes of occupations according to their particular place of birth. It is desirable as well to ascertain the distribution by occupations of persons born in Massachusetts, of all the native born, and of all the foreign born, as representing distinctive classes or groups of people. The distribution by number on such a basis is shown in the following table:

CLASSIFIED OCCUPATIONS.	Born in Massachusetts	Other Native Born	Total Native Born	Total Foreign Born	Aggregates
THE STATE.	1,117,440	297,834	1,415,274	526,867	1,942,141
Government,	5,904	2,861	8,765	2,167	10,932
Professional,	18,373	8,624	26,997	3,808	30,805
Domestic service,	228,417	100,240	328,657	205,499	534,156
Personal service,	7,920	5,547	13.467	10,603	24,070
Trade,	62,455	22,703	85,158	21,615	106,773
Transportation,	22,410	10,633	33,043	15,775	48,818
Agriculture,	48,272	11,204	59,476	18,185	77,661
The Fisheries,	3,555	591	4,146	3,834	7,980
Manufactures,	171,093	66,983	238,076	156,508	394,584
Mining,	364	157	521	1,041	1,562
Laborers,	8,451	2,529	10,980	21,956	32,936
Apprentices,	3,819	631	4,450	1,228	5,678
Children at work,	1,583	372	1,955	1,085	3,040
Scholars,	270,864	32,549	303,413	28,171	331,584
Students,	4,036	2,722	6,758	384	7,142
Retired,	14,215	5,567	19,782	5,880	25,662
Not gainful, etc.,	86	57	143	67	210
Not productive,	12,823	3,677	16,500	7,712	24,212
Unemployed twelve months,	353	100	453	369	822
Dependents,	1,950	1,011	2,961	3,425	6,386
At home,	204,973	11,138	216,111	11,102	227,213
Not given,	25,524	7,938	33,462	6,453	39,915

Reducing these figures to percentages we have the results classified according to occupations for each class or group contrasted with the percentages showing the distribution of the population as a whole, as follows :

CLASSIFIED OCCUPATIONS.	Born in Massachusetts	Other Native Born	Total Native Born	Total Foreign Born	Aggregates
THE STATE.	100.00	100.00	100.00	100.00	100.00
Government,	0.53	0.96	0.62	0.41	0.56
Professional,	1.65	2.90	1.91	0.72	1.59
Domestic service,	20.44	33.66	23.22	39.00	27.50
Personal service,	0.71	1.86	0.95	2.01	1.24
Trade,	5.59	7.62	6.02	4.10	5.50
Transportation,	2.01	3.57	2.33	2.99	2.51
Agriculture,	4.32	3.76	4.20	3.45	4.00
The Fisheries;	0.32	0.20	0.29	0.73	0.41
Manufactures,	15.31	22.49	16.82	29.71	20.32
Mining,	0.03	0.05	0.04	0.20	0.08
Laborers,	0.76	0.85	0.78	4.17	1.70
Apprentices,	0.34	0.21	0.31	0.23	0.29
Children at work,	0.14	0.13	0.14	0.21	0.16
Scholars,	24.24	10.93	21.44	5.35	17.07
Students,	0.36	0.91	0.48	0.07	0.37
Retired,	1.27	1.87	1.40	1.12	1.32
Not gainful, etc.,	0.01	0.02	0.01	0.01	0.01
Not productive,	1.15	1.23	1.17	1.46	1.25
Unemployed twelve months,	0.03	0.03	0.03	0.07	0.04
Dependents,	0.17	0.34	0.21	0.65	0.33
At home,	18.34	3.74	15.27	2.11	11.70
Not given,	2.28	2.67	2.36	1.23	2.05

In the column headed "Aggregates" in this table of percentages, we have the results concerning the whole population as distributed by occupations, showing 27.50 per cent of the population as being engaged in domestic service, 20.32 per cent in manufactures, 17.07 per cent as scholars, and 11.70 per cent as young persons at home. Analyzing the results for persons born in Massachusetts, we find that 20.44 per cent are in domestic service, 5.59 per cent in trade, 15.31 per cent in manufactures, 24.24 per cent are scholars, and 18.34 per cent are young persons at home. For persons who are native born but who were born outside of Massachusetts, that is, "other native born," we find that 33.66 per cent are engaged in domestic service, 7.62 per cent in trade, 22.49 per cent in manufactures, 10.93 per cent are scholars, and 3.74 per cent only are young persons at home.

Taking the native born as a class, including those born in Massachusetts and those born in other parts of the United States, we find that 23.22 per cent are persons engaged in domestic service, 6.02 per cent in trade, 4.20 per cent in agriculture, 16.82 per cent in manufactures, 21.44 per cent are scholars, and 15.27 per cent are young persons at home.

Analyzing in the same way the results for the foreign born as a class, we have 39.00 per cent engaged in domestic service, 4.10 per cent in trade, 2.99 per cent in transportation, 3.45 per cent in agriculture, 29.71 per cent in manufactures, 4.17 per cent are laborers, 5.35 per cent only are scholars, and 2.11 per cent young persons at home. The housewives and persons engaged in housework without fixed compensation constitute 18.81 per cent of all the persons born in Massachusetts, 30.09 per cent of all the other native born, 21.19 per cent of all the total native born as a class, 30.72 per cent of the total foreign born, and 23.77 per cent of the entire population.

Before leaving the discussion of occupations as regards place of birth, a word should be said in reference to the make-up of the table under consideration, that is, the showing of occupations by age periods and place of birth. In this table, as has been already stated, the principal foreign countries are presented in detail in the general showing, the results for the remaining countries being given in one column as "other countries." In subsequent recapitulations, however, an extended classification of these other countries is made on pages 634–653, and is followed by a detailed showing of occupations for each of these countries, this detailed showing beginning on page 652 and extending to page 664.

From the results of the State Census of 1875, and as published in a subsequent report of the Bureau, the population was divided into its productive and non-productive elements, that is, the number who might be called the workers as distinguished from the non-workers.

This classification showed that in 1875 there were 966,849, or 58.52 per cent of the entire population, who were non-workers, or, as it was termed, the dependent class in Massachusetts. The productive class, on the other hand, meaning those "who get a money return for their labors and who are the support of the preceding described dependent class," numbered 685,063, or 41.48 per cent.

The entire product of manufactures, agriculture, the fisheries, and mining for the year ending May 1, 1875, reached a value of $643,478,277, this figure showing an increase on a gold basis of 82.00 per cent since 1865. "This immense value was produced," the Report says, "by the productive labors of 450,742 persons, of whom 70,945 were engaged in agriculture. The products of agriculture were worth $41,521,799, or an average to each person engaged of $585.26. The remaining 379,797 persons were represented by products worth $601,956,478, or $1,584.94 to each individual."

In the division of the population into its productive and non-productive elements, there were added to the 450,742 persons engaged in purely productive industries 234,321 persons who were engaged in government and professional service, in domestic service, in trade and transportation, etc., making a total as previously stated of 685,063 workers, this total including persons engaged "in all kinds of business calculated to supply those so employed with a livelihood."

The results as ascertained in the Census of 1885 may be similarly classified, the workers or productive element being as follows:

Government and professional,	41,737
Domestic and personal service,	96,539
Trade and transportation,	155,591
Agriculture,	77,661
The Fisheries,	7,980
Manufactures,	394,584
Mining,	1,562
Laborers,	32,936
Apprentices,	5,678
Children at work,	3,040
Total,	817,308

The non-workers or non-productive element in 1885 comprises the following classes of persons:

At home,	227,213
Scholars and students,	338,726
Retired,	25,662
Not gainful, etc.,	210
Not productive,	24,212
Unemployed twelve months,	822
Dependents,	6,386
Not given,	39,915
Housewives and housework,	461,687
Total,	1,124,833

The workers in 1885 number 817,308 and constitute 42.08 per cent of the entire population, while the non-workers are 1,124,833 in number;

or 57.92 per cent of the population, the percentages for 1875, as already stated, being 41.48 per cent for the workers and 58.52 per cent for the non-workers. The results, then, as demonstrated in 1875 and 1885, are practically the same, there being a variation of but six-tenths of one per cent between the two calculations.

The total value in 1885 of the products of manufactures (including mining), agriculture, and the fisheries is $728,852,994, a distribution of this total product into its three parts being shown in the following statement, together with the total persons so engaged, and the average value of product to a person.

OCCUPATIONS.	Total Persons	Total Value of Product	Average Value of Product to a Person
THE STATE.	480,225	$728,852,994	$1,517.73
Manufactures,	394,584	674,634,269	1,709.74
Agriculture,	77,661	47,756,033	614.93
The Fisheries,	7,980	6,462,692	809.86

The results shown in this table indicate that 480,225 persons are returned in the Census of 1885 as being engaged in manufactures, agriculture, and the fisheries. These 480,225 persons constitute but a part, or 58.76 per cent, of all the workers, as shown in the detailed statement already presented on page xliv of this analysis. The average value of product to a person is $1,517.73. For manufactures there are 394,584 persons engaged therein, the total value of product being $674,634,269 and the average value of product to a person being $1,709.74. The details for agriculture and the fisheries, respectively, are also shown in the table, the average value of product to a person being $614.93 for agriculture and $809.86 for the fisheries.

It is interesting to know the distribution of the workers and the non-workers both by age periods and by place of birth, the distribution by age periods being shown in the following table:

AGE PERIODS.	NUMBER		PERCENTAGES	
	Workers	Non-workers	Workers	Non-workers
THE STATE.	817,308	1,124,833	100.00	100.00
Under 10 years,	11	360,169	–	32.02
10 to 13 years,	3,029	138,035	0.37	12.27
14 to 19 years,	119,635	103,099	14.64	9.17
20 to 29 years,	265,100	119,650	32.44	10.64
30 to 39 years,	168,739	118,480	20.64	10.53
40 to 49 years,	122,205	100,715	14.95	8.95
50 to 59 years,	78,714	78,046	9.63	6.94
60 to 79 years,	58,031	92,823	7.10	8.25
80 years and over,	1,766	13,750	0.22	1.22
Age unknown,	78	66	0.01	0.01

From this table we find for the workers that 119,635, or 14.64 per cent of the whole number of workers, are from 14 to 19 years of age, 556,044, or 68.03 per cent, are from 20 to 49 years of age, while those 50 years of age and over number 138,511, or 16.95 per cent. Analyzing the results concerning the non-workers we find that 360,169, or 32.02 per cent, are under 10 years of age, 138,035, or 12.27 per cent, are from 10 to 13 years of age, and 103,099, or 9.17 per cent, from 14 to 19 years of age. The number under 20 years of age constitutes over one-half the entire number of non-workers. The non-workers between 20 and 50 years of age number 338,845, or 30.12 per cent, while the number of those 50 years of age and over is 184,619, or 16.41 per cent of the whole number.

If we consider these two classes according to their particular place of birth we have the following results:

PLACE OF BIRTH.	NUMBER		PERCENTAGES	
	Workers	Non-workers	Workers	Non-workers
THE STATE.	817,308	1,124,833	100.00	100.00
Native Born.	515,847	899,427	63.12	79.96
Massachusetts,	372,400	745,040	45.57	66.24
Other New England States,	106,147	110,578	12.99	9.83
Other States,	37,300	43,809	4.56	3.89
Foreign Born.	301,461	225,406	36.88	20.04
Ireland,	138,236	106,393	16.91	9.46
Canada (English),	8,912	6,947	1.09	0.62
Canada (French),	37,375	27,128	4.57	2.41
England,	32,916	24,008	4.03	2.13
Scotland,	8,962	7,008	1.10	0.62
Nova Scotia,	24,110	16,729	2.95	1.49
Prince Edward Island,	4,056	2,753	0.49	0.24
New Brunswick,	8,836	7,613	1.08	0.68
Germany,	13,027	10,088	1.59	0.90
Sweden,	5,779	3,657	0.71	0.32
Portugal,	3,809	2,309	0.47	0.21
Other Countries,	15,443	10,773	1.89	0.96

Briefly analyzed, this table shows for the workers that 515,847, or 63.12 per cent, are native born and 301,461, or 36.88 per cent, are foreign born. For the non-workers there are 899,427, or 79.96 per cent, who are native born and 225,406, or 20.04 per cent, who are foreign born. Those born in Massachusetts represent 45.57 per cent of the whole number of workers and 66.24 per cent of the whole number of non-workers, while those born in Ireland, for instance, represent 16.91 per cent of the total workers and 9.46 per cent of the total non-workers. The results for the other places of birth are shown in detail in the table.

The last two presentations under the general division of "Occupations by Name" comprehend the occupations of aliens. In the Census, by aliens are meant all male persons of foreign birth, 21 years of age and over, who have not been naturalized. The first of these presentations relates to the occupations of aliens in detail, and the second to a classification of aliens according to their place of birth. In both of these presentations, in addition to the total number of aliens returned for each occupation designation, there is given also the number of illiterate aliens. In Part 1, in connection with the general consideration of the subjects of place of birth and relation to head of family, are given special showings relating to aliens, presenting in the one case their distribution by place of birth and in the other the relationship which they bear to the head of the family in which they reside. In both of these presentations, the aliens are classified as regards age periods and are considered in the analysis for that Part in connection with the subject of "Polls and Voters."

In 1875 there were reported 79,136 aliens; in 1885 they are 99,131 in number. The presence in our midst of so large a body of adult males having no political franchise, and the discussion which has arisen as to the ultimate outcome of unrestricted immigration, make any statistical presentation concerning our alien population of great value at this time, particularly as regards the classes of occupations into which they have entered. For these reasons especial pains has been taken in the preparation of the occupation showings to make them as full and explicit as possible for this class of persons.

From the recapitulation to the first of these tables on page 683 we draw an epitomized statement as to the general classes of occupations in which they are found, both as regards the aliens as a whole and the illiterate aliens.

Classified Occupations.	Number		Percentages	
	Total Aliens	Illiterate Aliens	Total Aliens	Illiterate Aliens
The State.	99,131	27,199	100.00	100.00
Government,	232	31	0.23	0.11
Professional,	1,068	86	1.08	0.32
Domestic service,	1,848	203	1.86	0.75
Personal service,	2,246	429	2.26	1.58
Trade,	6,510	1,193	6.57	4.39
Transportation,	7,783	2,305	7.85	8.47
Agriculture,	9,139	3,190	9.22	11.73
The Fisheries,	2,742	854	2.77	3.14
Manufactures,	51,824	11,438	52.28	42.05
Mining,	695	270	0.70	0.99
Laborers,	10,716	5,253	10.81	19.31
Apprentices,	127	3	0.13	0.01
Scholars,	30	–	0.03	–
Students,	83	–	0.08	–
Retired,	1,325	666	1.34	2.45
Not gainful, etc.,	16	2	0.02	0.01
Not productive,	946	348	0.95	1.28
Unemployed twelve months,	131	44	0.13	0.16
Dependents,	1,010	646	1.02	2.38
Not given,	660	238	0.67	0.87

Considering first the total aliens we find of the 99,131 that 51,824, or 52.28 per cent, are engaged in the manufacturing industries of the Commonwealth and that 10,716, or 10.81 per cent, are laborers. There are also 6,510, or 6.57 per cent, engaged in trade, 7,783, or 7.85 per cent, in transportation, and 9,139, or 9.22 per cent, in agriculture. Taking in the same way the illiterate aliens as a class, we find that 11,438, or 42.05 per cent of the whole number of illiterate aliens (27,199), are engaged in manufactures and 5,253, or 19.31 per cent, are laborers. Those engaged in trade number 1,193, or 4.39 per cent, those engaged in transportation 2,305, or 8.47 per cent, and those engaged in agriculture 3,190, or 11.73 per cent.

Of the laborers who are aliens 1,092 are city and town laborers, of which 573 are illiterate aliens; 8,984 are general laborers, of which 4,338 are illiterate, and 640 are water works laborers, wood choppers, wood sawyers, etc., of which 342 are illiterate.

Considering the large number of aliens and illiterate aliens in manufactures as regards their distribution in the various industries, we have results as shown in the following table:

INDUSTRIES.	Total Aliens	Illiterate Aliens
MANUFACTURES.	51,824	11,438
Boots and shoes,	4,496	1,241
Brick, tiles, and sewer pipe,	1,176	688
Building,	9,975	1,776
Carriages and wagons,	679	73
Clothing,	1,365	165
Cotton goods,	7,379	2,318
Food preparations,	1,601	313
Furniture,	1,325	242
Leather,	1,950	497
Machines and machinery,	2,117	286
Metals and metallic goods,	5,274	948
Paper and paper goods,	1,203	366
Print works, dye works, and bleacheries,	765	214
Rubber and elastic goods,	824	70
Stone,	1,319	217
Wooden goods,	719	96
Woollen goods,	3,413	830
Other manufactures,	6,244	1,098

The industries designated by name in this table comprehend 45,580, or 87.95 per cent of the whole number of aliens engaged in manufactures, and 10,340, or 90.40 per cent of all the illiterate aliens in manufactures. Analyzing the results concerning the number of aliens engaged in the principal industries in detail, we find that of the total aliens in manufactures there are 4,496, or 8.67 per cent, in the industry called boots and shoes; 9,975, or 19.25 per cent, in building; 7,379, or 14.24 per cent, in cotton goods; 5,274, or 10.18 per cent, in metals and metallic goods, and 3,413, or 6.58 per cent, in woollen goods. Considering the illiterate aliens in these same industries, we find that there are 1,241, or 10.85 per cent of all the illiterate aliens in manufactures, in boots and shoes; 1,776, or 15.53 per cent, in building; 2,318, or 20.26 per cent, in cotton goods; 948, or 8.29 per cent, in metals and metallic goods, and 830, or 7.26 per cent, in woollen goods.

Of the total number of aliens returned for each class of occupations, it is interesting to compare the percentages of those returned as being illiterate, as regards the illiterates as a whole, and as to the percentages in the respective occupations. This is done in the following table:

CLASSIFIED OCCUPATIONS.	Percentages of Illiterate Aliens of Total Aliens
THE STATE.	27.44
Government,	13.36
Professional,	8.05
Domestic service,	10.98
Personal service,	19.10
Trade,	18.33
Transportation,	29.62
Agriculture,	34.91
The Fisheries,	31.15
Manufactures,	22.07
Mining,	38.85
Laborers,	49.02
Apprentices,	2.36
Scholars,	–
Students,	–
Retired,	50.26
Not gainful, etc.,	12.50
Not productive,	36.79
Unemployed twelve months,	33.59
Dependents,	63.96
Not given,	36.06

Analyzing this table we find that 27.44 per cent of all the aliens are illiterate, that of the aliens engaged in government service 13.36 per cent are illiterate, and of the aliens engaged in professional pursuits 8.05 per cent are illiterate. Of the aliens engaged in agriculture 34.91 per cent are illiterate, and of the aliens engaged in the fisheries 31.15 per cent are illiterate. Of the aliens engaged in the manufacturing industries of the Commonwealth 22.07 per cent are illiterate, the percentages of illiterate aliens in the principal industries being 27.60 for boots and shoes, 17.80 for building, 31.41 for cotton goods, 17.97 for metals and metallic goods, and 24.32 for woollen goods. Of the aliens engaged in mining 38.85 per cent are illiterate, and of the laborers who are aliens 49.02 per cent are illiterate. The retired aliens who are illiterate represent 50.26 per cent of all the retired aliens, while 63.96 per cent of the dependent aliens are illiterate. The distribution of the aliens according to place of birth is shown in Part 1, but is reproduced in this analysis in connection with a similar presentation for the illiterate aliens, as follows:

PLACE OF BIRTH.	NUMBER		PERCENTAGES	
	Total Aliens	Illiterate Aliens	Total Aliens	Illiterate Aliens
THE STATE.	99,131	27,199	100.00	100.00
British America,	33,754	9,945	34.05	36.56
British America, *n. s.*,	6	2	0.01	0.01
Canada (English),	3,181	282	3.21	1.03

Nova Scotia,	8,703	538	8.78	1.98
Prince Edward Island,	1,303	41	1.32	0.15
British Possessions, Other	376	41	0.38	0.15
China,	347	78	0.35	0.29
Europe,	14,578	3,493	14.71	12.84
Austria,	411	72	0.42	0.26
Denmark,	292	29	0.30	0.11
France,	641	59	0.65	0.22
Germany,	4,473	252	4.51	0.92
Italy,	1,874	997	1.89	3.66
Norway,	457	46	0.46	0.17
Poland,	385	147	0.39	0.54
Portugal,	2,175	1,506	2.19	5.54
Russia,	539	152	0.54	0.56
Sweden,	2,889	190	2.91	0.70
Other parts,	442	43	0.45	0.16
Great Britain,	13,937	685	14.06	2.52
England,	10,502	588	10.59	2.16
Scotland,	3,262	81	3.29	0.30
Wales,	173	16	0.18	0.06
Ireland,	35,600	12,875	35.91	47.34
Other Countries,	539	82	0.54	0.30

A distribution of the total aliens according to place of birth, as indicated in this table, shows that 33,754, or 34.05 per cent, were born in British America, 17,292, or 17.44 per cent of all the aliens, having been born in Canada of French extraction and 3,181, or 3.21 per cent, in Canada of English parentage, while those born in Nova Scotia number 8,703 and represent 8.78 per cent. The aliens born in Europe number 14,578 and constitute 14.71 per cent of the whole number, the distribution into the various countries being shown in the table. The aliens of English birth are 10,502 in number, representing 10.59 per cent, and those born in Ireland 35,600, or 35.91 per cent.

Taking the results for illiterate aliens in the same way we find that 9,945, or 36.56 per cent, were born in British America, 8,862, or 32.58 per cent, being Canadians of French extraction and 282, or 1.03 per cent, being Canadians of English parentage. Those born in Nova Scotia number 538 and represent 1.98 per cent. The illiterate aliens who were born in Europe number 3,493 persons, or 12.84 per cent of all the illiterate aliens. The illiterate aliens born in England number 588 and represent 2.16 per cent, while those born in Ireland are 12,875 in number and constitute 47.34 per cent of all the illiterate aliens.

The percentages of illiterate aliens of total aliens for each place of birth are shown in the following table :

Place of Birth.	Percentages of Illiterate Aliens of Total Aliens
The State.	27.44
British America,	29.46
British America, *n. s.*,	33.33
Canada (English),	8.87
Canada (French),	51.25
New Brunswick,	5.54
Newfoundland,	13.83
Nova Scotia,	6.18
Prince Edward Island,	3.15
British Possessions, Other	10.90
China,	22.48
Europe,	23.96
Austria,	17.52
Denmark,	9.93
France,	9.20
Germany,	5.63
Italy,	53.20
Norway,	10.07
Poland,	38.18
Portugal,	69.24
Russia,	28.20
Sweden,	6.58
Other parts,	9.73
Great Britain,	4.91
England,	5.60
Scotland,	2.48
Wales,	9.25
Ireland,	36.17
Other Countries,	15.21

From this table it is seen that 51.25 per cent of the French Canadian aliens are illiterate, that 53.20 per cent of the aliens who were born in Italy are illiterate, and 69.24 per cent of those born in Portugal. Of the aliens born in Ireland 36.17 per cent are illiterate.

The distribution of aliens by place of birth according to classes of occupations is shown on pages 722–725 for total aliens and on pages 734–737 for illiterate aliens. A presentation of illiterate aliens by place of birth, degree of illiteracy, and age periods is also given on pages 1136 and 1137, and in connection with the general subject of illiteracy the illiteracy of aliens is further analyzed.

Special presentations of occupations are also given for "Children at Work" (page 739), "School Attendance" (page 785), and in connection with the subject of "Illiteracy" (page 987).

Children at Work (page 739). This is a presentation which gives by cities and towns the number of children under 14 years of age who are returned in the Census as being either at work only or at work and at school. The children who are returned as being "at work only" represent the number for whom a negative answer was given with regard to their attendance at school the required twenty weeks preceding the first of May, 1885. A certain part of these children may have attended school a part of the year possibly, but not twenty weeks as required by law, while some may not have attended school at all. The children who are returned as being "at work and at school" include those attending the required twenty weeks, but having in addition some remunerative occupation. In the consideration of children at work, in either case, none but those engaged in remunerative occupations have been taken.

The number of children at work in 1875 and 1885 is shown, for the State, in the following table:

Sex.	1875			1885		
	At Work Only	At Work and At School	Total Children At Work	At Work Only	At Work and At School	Total Children At Work
THE STATE.	8,616	4,649	13,265	1,399	1,641	3,040
Males, ...	4,397	2,976	7,373	842	1,065	1,907
Females, ...	4,219	1,673	5,892	557	576	1,133

From this table it is seen that the whole number of children at work in 1885 is 3,040, of which 1,907 are males and 1,133 are females, these children being all under 14 years of age and including 11 under 10 years of age. In 1875 the whole number of children at work was 13,265, of which 7,373 were males and 5,892 were females. The children returned in 1875 represent those at work who were under 15 years of age; of this number 248 were under 10 years of age, 139 of these being males and 109 being females. The difference in the classification of ages in 1885 as compared with 1875 is due to a change in the laws concerning the employment of children, the age limit at the time of taking the Census in 1885 being "under 14 years of age" and in 1875 "under 15 years of age."

If we compare the total number of children at work in 1885 with the total number of children at work in 1875 we find that there has been a decrease in ten years of 77.08 per cent, the decrease for males being 74.14 per cent and for females 80.77 per cent. This in itself is a very creditable showing and indicates the wise provisions of law which have been placed upon the statute books, and the efforts which have been made for the prevention of the illegal employment of children in our factories and workshops.

The number of children in 1885 who are at work only constitute 46.02 per cent of all the children at work, whereas in 1875 they constituted 64.95 per cent. A comparison of the number in 1885 for this class of persons with the number in 1875 shows the percentage of decrease to be 83.76 per cent, the decrease for females representing 86.80 per cent and for males 80.85 per cent.

The children at work and at school in 1885 number 1,641 and represent 53.98 per cent of all the children at work. In 1875 they numbered 4,649 and represented 35.05 per cent only of all the children then at work. There has been a decrease during the decade in the number of children at work and at school of 64.70 per cent.

The percentages of children "at work only" and "at work and at school" of the total children at work are shown in detail by sex in the following table:

Sex.	1875			1885		
	At Work Only	At Work and At School	Total Children At Work	At Work Only	At Work and At School	Total Children At Work
The State.	64.95	35.05	100.00	46.02	53.98	100.00
Males,	59.64	40.36		44.15	55.85	
Females,	71.61	28.39		49.16	50.84	

Following the presentation of "Children at Work" by towns, there is given a showing by occupations and place of birth in detail, in this presentation none being included, as has been already stated, who are not engaged in remunerative occupations. This table is in turn followed by two presentations, one showing the classification of the children at work by occupations only and the other as regards place of birth. From the recapitulation to the first of the last two tables referred to we bring forward a summary by classified occupations for the children at work only and for the children at work and at school. This table follows:

Classified Occupations.	At Work Only			At Work and At School		
	Males	Females	Both Sexes	Males	Females	Both Sexes
The State.	842	557	1,399	1,065	576	1,641
Government,	–	–	–	1	–	1
Professional,	1	–	1	2	–	2
Domestic service,	26	136	162	6	97	103
Personal service,	28	17	45	51	28	79
Trade,	193	44	237	139	41	180
Transportation,	9	–	9	5	–	5
Agriculture,	133	–	133	153	–	153
The Fisheries,	8	1	9	3	–	3
Manufactures,	395	352	747	686	405	1,091
Mining,	1	–	1	–	–	–
Laborers,	17	–	17	14	–	14
Apprentices,	31	7	38	5	5	10

Of the children at work in the manufacturing industries, as above shown, 1,091 are at work and at school and 747 are at work only; of those engaged in trade and in domestic service the larger number are at work only, and of those engaged in agriculture the larger number are at work and at school.

In the following table is presented a classification of all the children at work by occupations, including a distribution by percentages.

Classified Occupations.	Total Children At Work			Percentages		
	Males	Females	Both Sexes	Males	Females	Both Sexes
The State.	1,907	1,133	3,040	100.00	100.00	100.00
Government,	1	–	1	0.05	–	0.03
Professional,	3	–	3	0.16	–	0.10
Domestic service,	32	233	265	1.68	20.57	8.72
Personal service,	79	45	124	4.14	3.97	4.08
Trade,	332	85	417	17.41	7.50	13.72
Transportation,	14	–	14	0.73	–	0.46
Agriculture,	286	–	286	15.00	–	9.41
The Fisheries,	11	1	12	0.58	0.09	0.39
Manufactures,	1,081	757	1,838	56.69	66.81	60.46
Mining,	1	–	1	0.05	–	0.03
Laborers,	31	–	31	1.62	–	1.02
Apprentices,	36	12	48	1.89	1.06	1.58

If we analyze this table by sex we find that of the 1,907 males 1,081, or 56.69 per cent, are engaged in manufactures, 332, or 17.41 per cent, are engaged in trade, and 286, or 15.00 per cent, are engaged in agriculture. There are also 79 males, or 4.14 per cent, engaged in personal service. Of the females 757, or 66.81 per cent, are engaged in manufactures, 233, or 20.57 per cent, are engaged in domestic service, 45, or 3.97 per cent, are engaged in personal service, and 85, or 7.50 per cent, are engaged in trade. For the children at work without regard to sex, 1,838, or 60.46 per cent, are engaged in manufactures, 265, or 8.72 per cent, in domestic service, 124, or 4.08 per cent, in personal service, 417, or 13.72 per cent, in trade, and 286, or 9.41 per cent, in agriculture. Of the 265 engaged in domestic service, 250 are in the service of private families. For trade we find that 341 out of 417 are engaged or classified as messengers, porters, etc., and comprise mostly errand, office, and cash boys and girls. Of the 286 engaged in agriculture 269 are returned as farm laborers. Of the 1,838 engaged in manufactures 125 are found in the industry called boots and shoes, 1,130 in that of cotton goods, and 205 in that of woollen goods, besides 184 in the other textile industries. The whole number of children at work in the textile industries as a whole is 1,519, of which 862 are males and 657 are females, or more than one-half of all the children at work. Of the 1,130 children at work in the cotton goods industry 648 are males and 482 are females.

The following statement indicates briefly the principal occupations of the children at work, a separate presentation of occupations being made for each sex.

OCCUPATIONS.	Number of Persons
Males.	1,907
Servants (in families),	23
Bootblacks,	11
Sweepers and cleaners (in mills),	60
Peddlers,	9
Salesmen,	7
Clerks,	40
Bundle boys,	10

France,	1	–	1
Italy,	16	5	21
Newfoundland,	–	1	1
Poland,	3	3	6
Russia,	1	2	3
Wales,	–	2	2
American citizens born abroad,	2	1	3

Considering the children at work according to their place of birth, we find that 1,955, or 64.31 per cent, are native born and 1,085, or 35.69 per cent, are foreign born. Of the native born 1,583 were born in Massachusetts, 220 in other New England States, and 152 in other parts of the United States. Of the foreign born 536 are French Canadians, 192 were born in Ireland, and 112 were born in England. Of the males 1,264, or 66.28 per cent, are native born and 643, or 33.72 per cent, are foreign born, while for the females 691, or 60.99 per cent, are native born and 442, or 39.01 per cent, are foreign born.

A presentation is also made (page 769) for the children at work by place of birth and by parent nativity, and in this table is given the parent nativity of the children born in Massachusetts, of the children born in other New England States, in other States, and for the foreign born by their exact place of birth. This table is followed also by a presentation of the children at work by parent nativity only. From the showing of parent nativity only, we find that of the total children at work who are native born, or 1,955 in number, 214 have both parents born in Massachusetts, 758 have both parents born in Ireland, 218 have French Canadian parents, and 79 have both parents born in England. Of the foreign born 242 have both parents born in Ireland, 532 have French Canadian parents, and 64 have both parents born in England. Taking the total children at work without regard to whether they are native or foreign born, we find out of 3,040 that 1,000 have both parents born in Ireland, 750 have French Canadian parents, 143 have both parents born in England, and 92 have both parents born in Germany. The parent nativity of 59 children is returned as "unknown."

From the recapitulation to this table, on pages 778 and 779, we bring forward, for the total children at work, a condensed statement as to their parent nativity, according as to whether one or both parents are native born, are foreign born, or the nativity of their parents is unknown.

In this summarized statement, as in the detail table itself, the parentage is indicated by the use of italic letters, as follows: — *n*, for native born; *f*, for foreign born, and *unk*, when the parentage is unknown.

PARENT NATIVITY.	Native Born	Foreign Born	Total
THE STATE.	1,955	1,085	3,040
Both parents, *n*,	414	–	414
Father, *n*, mother, *f*,	70	3	73
Father, *n*, mother, *unk*,	4	–	4
Father, *f*, mother, *n*,	103	–	103
Both parents, *f*.	1,275	1,079	2,354
Father, *f*, mother, *unk*,	1	2	3
Father. *unk*, mother, *n*,	21	–	21
Father, *unk*, mother, *f*,	8	1	9
Both parents, *unk*,	59	–	59

From this table is compiled a summary giving the number having purely native parentage, the number having purely foreign parentage, the number having mixed parentage, and the number for whom the nativity of one or both parents is unknown, the distribution on this basis being also expressed by percentages.

PARENT NATIVITY.	NUMBER			PERCENTAGES		
	Native Born	Foreign Born	Total	Native Born	Foreign Born	Total
THE STATE.	1,955	1,085	3,040	100.00	100.00	100.00
Native parentage, . . .	414	–	414	21.17	–	13.62
Foreign parentage, . . .	1,275	1,079	2,354	65.22	99.44	77.43
Mixed parentage, . . .	173	3	176	8.85	0.28	5.79
Unknown parentage, . .	93	3	96	4.76	0.28	3.16

Considering this table we find for the 3,040 children at work that 414, or 13.62 per cent, are of native parentage, 2,354, or 77.43 per cent, are of foreign parentage, 176, or 5.79 per cent, have mixed parentage, while for 96, or 3.16 per cent, the parentage is unknown in the case of one or both parents.

The number of illiterate children at work is shown on pages 780–784, classified by occupations and place of birth, and by occupations and place of birth separately. From the results shown in these tables we find that 413, or 13.59 per cent of the total number of children at work, are illiterate. Of the illiterate children at work 24 are found in domestic service, 25 in personal service, 28 in agriculture, and 322 in manufactures. As regards place of birth 103 are native born and 310 are foreign born. The illiterate children at work of native birth constitute 5.27 per cent of the total children at work who are native-born, and the illiterate children at work of foreign birth represent 28.57 per cent of the total children at work who are foreign born. Of the native born 73 were born in Massachusetts, 18 in New England, and 12 in other parts of the United States. Of the foreign born 19 were born in Ireland, 248 are French Canadians, and 11 were born in the Western Islands.

SCHOOL ATTENDANCE (page 785) is a presentation by towns showing a classification by age periods and by sex for those attending public and private schools and for students. In 1875 the presentation for school attendance was made from the answers to an inquiry as to attendance at school for at least three months during the year ending May 1, 1875. In the Census of 1885, however, the results are based upon the answers made to the inquiry concerning occupations, but without specification being made as to the amount of schooling received during the Census year. In all the presentations relating to school attendance, the totals for "Public School" include the "children at work and at school," drawn from the preceding showing (page 739) relating to "Children at Work."

From the recapitulation for the State, on page 810, we first derive a table which shows the classification of school attendance by sex as regards those attending public and private schools and for students, as follows:

Classification of Scholars and Students.	Males	Females	Both Sexes
THE STATE.	170,095	170,272	340,367
Scholars (public school),	155,521	150,171	305,692
Scholars (private school),	10,013	17,520	27,533
Students,	4,561	2,581	7,142

From this table it is seen that of the 340,367 persons returned, 305,692, or 89.81 per cent, attend the public schools, 27,533, or 8.09 per cent, private schools, while 7,142, or 2.10 per cent, are returned as students either in colleges or pursuing special branches of study. Concerning the distribution by sex, we find that of those attending public schools there are 5,350 more males than there are females; of those attending private schools, there is a larger number of females, or 7,507 more than the number returned for males, while for students the males predominate, there being 4,561 males to 2,581 females. In a grand total of 340,367, however, there is the slight excess of 177 only in favor of the females, the whole number of males being 170,095 and the whole number of females being 170,272. In 1875 there were 282,784 persons attending school, of which 142,781 were males and 140,003 were females.

Classifying all the scholars and students according to age periods, we have the following results:

Age Periods.	Males	Females	Both Sexes
THE STATE.	170,095	170,272	340,367
Under 5 years,	258	253	511
5 to 9 years,	65,753	64,240	129,993
10 to 13 years,	68,724	68,640	137,364
14 to 19 years,	31,876	34,679	66,555
20 years and over,	3,484	2,460	5,944

Of the whole total, or 340,367, the table shows that 511, or 0.15 per cent, are under 5 years of age; 129,993, or 38.19 per cent, are from 5 to 9 years of age; 137,364, or 40.36 per cent, are from 10 to 13 years of age; 66,555, or 19.55 per cent, are from 14 to 19 years of age, and 5,944, or 1.75 per cent, are 20 years of age and over. From the returns made to the Board of Education, as published in their report for 1885–86, it is stated that there were in the various cities and towns in the State, May 1, 1885, between 5 and 15 years of age, 348,903 persons. The report also states the number attending the public schools under 5 years of age as 1,433 and the number over 15 years of age as 27,972.

The whole number attending academies and private schools for the year is given in the same report as 37,393.

The distribution by age periods in 1875 is shown in the following table, the difference in the age classification precluding any extended comparison.

AGE PERIODS.	Males	Females	Both Sexes
THE STATE.	142,781	140,003	282,784
Under 5 years,	718	551	1,269
5 to 10 years,	65,320	62,636	127,956
10 to 15 years,	63,141	63,471	126,612
Above 15 years,	13,602	13,345	26,947

On pages 812 and 813 is presented, for the State, a table showing school attendance by kind of schools, the essential parts of which are reproduced as follows:

KIND OF SCHOOLS.	Males	Females	Both Sexes
PUBLIC SCHOOLS.	155,521	150,171	305,692
City and town public schools,	154,959	149,410	304,369
Industrial and reform schools,	515	103	618
State normal schools,	47	658	705
PRIVATE SCHOOLS.	10,013	17,520	27,533
Academies,	566	481	1,047
Boarding schools,	43	91	134
Convent schools,	208	445	653
Kindergarten,	150	167	317
Parochial schools,	3,757	7,639	11,396
Private farm schools,	19	–	19
Private schools,	4,795	8,019	12,814
Private instruction (governess or tutor),	78	104	182
Schools for the afflicted,	179	191	370
Scientific schools,	113	3	116
Seminaries,	105	380	485
STUDENTS.	4,561	2,581	7,142
Students:			
Agricultural colleges,	382	–	382
Art,	33	105	138
At home,	44	45	89
Colleges,	2,552	948	3,500
Commercial colleges,	167	26	193
Dentistry,	52	–	52
Divinity,	164	–	164
Law,	331	1	332
Medicine,	335	45	380
Music,	100	1,010	1,110
Music and painting,	2	54	56
Painting,	11	159	170
Other students,	388	188	576

In addition to this table (reproduced above), there is a table which presents by sex and by kind of schools a classification in detail by age periods and by place of birth. From this table we draw two analysis tables relating to the distribution by age periods and by place of birth. The first of these tables is as follows:

AGE PERIODS.	Public Schools	Private Schools	Students	Aggregates
THE STATE.	305,692	27,533	7,142	340,367
1 to 4 years,	366	144	1	511
5 to 9 years,	120,661	9,315	17	129,993
10 to 13 years,	126,993	10,299	72	137,364
14 to 19 years,	56,971	6,926	2,658	66,555
20 to 29 years,	687	806	4,178	5,671
30 to 39 years,	13	36	174	223
40 to 49 years,	1	4	38	43
50 to 59 years,	–	3	3	6
60 to 79 years,	–	–	1	1

The general features of this table have already been pointed out. The distribution by age periods for each class of persons is fully shown in the table. The second table relating to place of birth follows:

PLACE OF BIRTH.	Public Schools	Private Schools	Students	Aggregates
THE STATE.	305,692	27,533	7,142	340,367
Native Born.	281,057	23,468	6,758	311,283
Massachusetts,	251,699	20,065	4,036	275,800
Other New England States,	18,653	1,689	1,052	21,394
Other States,	10,705	1,714	1,670	14,089
Foreign Born.	24,635	4,065	384	29,084
Ireland,	4,402	882	46	5,330
Canada (English),	1,383	102	53	1,538
Canada (French),	4,464	2,144	28	6,636
England,	4,330	273	53	4,656
Scotland,	1,106	43	12	1,161
Nova Scotia,	2,953	149	33	3,135
Prince Edward Island,	500	28	8	536
New Brunswick,	1,391	74	16	1,481
Germany,	1,446	65	12	1,523
Sweden,	714	11	4	729
Portugal,	156	15	2	173
Other Countries,	1,790	279	117	2,186

The native born persons attending the public schools number 281,057, or 91.94 per cent of the whole number, and the foreign born 24,635, or 8.06 per cent, while of those attending private schools 23,468, or 85.24 per cent, are native born and 4,065, or 14.76 per cent, are foreign born. Of the 4,065 foreign born, 882 were born in Ireland and 2,144 in Canada of French extraction. Of the whole number of students 6,758 are native born and but 384 foreign born, a large part of the students born in "Other Countries" being American citizens born abroad.

SCHOOLS AND SCHOOL PROPERTY (page 819). Under this caption is presented the information contained in the Census returns relating, first, to the number and value of public school buildings, together with the value of school property contained therein and used for educational purposes; second, the number and value of buildings owned, and the number of buildings or parts of buildings hired, and used for the accommodation of private schools, incorporated and unincorporated, and the value of school property contained in said private schools, and third, the names of the private schools, with the dates of establishment and incorporation. The presentations, which are three in number, give the details, as enumerated above, by cities and towns, and in the use of the figures presented reference should be made to the head-notes and foot-notes explanatory of the returns for the various cities and towns.

The first summary which is here presented epitomizes the general information as regard public and private schools, both for 1885 and 1875, as follows:

CLASSIFICATION OF SCHOOLS.	NUMBER OF SCHOOL BUILDINGS			VALUE	
	Total	Owned	Hired	Buildings Owned	School Property
1875.					
Public schools,	3,317	3,317	–	$18,972,086	$937,725
Private schools,	303	276	27	$4,073,608	$344,171
Incorporated,	131	130	1	3,809,983	316,470
Unincorporated,	172	146	26	263,625	27,701
1885.					
Public schools,	3,439	3,439	–	$23,222,781	$1,042,428
Private schools,	541	447	94	$9,717,327	$1,652,508
Incorporated,	382	367	15	8,808,557	1,489,230
Unincorporated,	159	80	79	908,770	163,278

It should be stated that all the values given in the tables for 1885 are combustible values, that is, the amount that might be claimed from an insurance company to replace the buildings, etc., if destroyed by fire. By "school property" is meant maps, globes, pianos, chemical and other scientific apparatus, and such miscellaneous books of reference as do not form a library; that is, the value of all material in the school buildings used for educational purposes. The value of the furniture is included in the value of the buildings. The values given in this table for 1875 are gold values.

The number of public school buildings owned in 1885 is 3,439 and the buildings are valued at $23,222,781, the value of the school property contained therein being $1,042,428. In 1875 there were 3,317 public school buildings, valued at $18,972,086 and the value of school property was placed at $937,725.

The school buildings owned by incorporated private schools in 1885 number 367 and are valued at $8,808,557; there are, besides, 15 hired buildings. The value of school property for the incorporated private schools is $1,489,230. In 1875 the incorporated private schools owned but 130 school buildings, valued at $3,809,983, and had school property to the value of $316,470.

For the unincorporated private schools in 1885, there are returned 80 school buildings owned, the value being given as $908,770, and 79 buildings hired, besides 91 hired rooms, 22 parts of buildings, and 58 schools kept in private dwelling-houses. The value of all the school property contained in these unincorporated private schools is returned as $163,278. In 1875 there were 146 school buildings owned by unincorporated private schools and 26 buildings hired. The value of the buildings owned in 1875 was $263,625 and the value of school property $27,701.

The value of all the school buildings owned by private schools is $9,717,327 in 1885 as against $4,073,608 in 1875, and for school property, $1,652,508 in 1885 and $344,171 in 1875, these figures showing a marked gain in 1885 as compared with 1875.

The public school buildings are classified according to the grade or grades of schools taught in them, not only as regards number but as to the value of the buildings and of the school property. The recapitulation showing this classification for the State is as follows:

KIND OF SCHOOL BUILDINGS.	Number of School Buildings	VALUE	
		Buildings	Property
THE STATE.	3,439	$23,222,781	$1,042,428
Primary,	1,139	5,989,460	152,752
Primary and intermediate,	31	115,210	5,892
Primary and middle,	4	64,000	525
Primary and grammar,	285	2,189,539	101,213
Primary and sub-grammar,	3	15,600	900
Primary and high,	2	12,300	610
Primary and mixed,	5	12,550	1,400
Primary, intermediate, and grammar,	75	457,725	27,283
Primary, intermediate, and high,	1	5,000	160
Primary, grammar, and high,	22	281,250	19,183
Primary, intermediate, grammar, and high,	1	17,700	700
Sub-primary, primary, intermediate, and grammar,	1	15,000	600
Intermediate and grammar,	5	10,700	1,225
Intermediate and high,	1	10,000	500
Intermediate, grammar, and high,	18	147,000	11,500
Middle,	3	28,800	375
Middle and grammar,	1	27,000	200
Grammar,	448	8,404,712	337,418
Grammar and high,	33	345,150	31,212
Grammar and mixed,	16	22,900	1,350
High,	113	1,825,252	189,016
High and Latin,	8	1,260,100	47,010
Graded,	1	5,500	50
Mixed,	1,204	1,329,446	78,194
Mixed and introductory,	1	3,000	100
Mixed and high,	1	7,000	700
Normal and training,	6	70,875	5,750
State Normal,	9	430,012	20,860
State Normal Art,	1	90,000	5,000
Free college,	1	30,000	750

The classification of the information concerning private schools according to the kind of school is shown in the following table. The exhibit for colleges and universities, under incorporated schools, is particularly gratifying, the value of buildings owned being $5,041,454 and of school property $1,127,900.

Kind of Schools.	Number of Schools	School Buildings			Value	
		Total	Owned	Hired	Buildings Owned	School Property
Incorporated.	96	382	367	15	$8,808,557	$1,489,230
Kindergarten,	1	1	1	–	8,117	251
Academies, seminaries, etc.,	70	196	188	8	3,083,015	288,164
Colleges and universities,	17	157	150	7	5,041,454	1,127,900
Music and art,	2	4	4	–	215,000	45,000
For the afflicted and dependent,	6	24	24	–	460,971	27,915
Unincorporated.	252	159	80	79	$908,770	$163,278
Kindergarten,	27	8	–	8	80	3,228
Private,	89	15	1	14	545	3,997
Academies, seminaries, etc.,	101	112	67	45	772,845	115,483
Commercial and business,	18	7	–	7	1,300	20,350
Music and art,	7	4	2	2	32,000	12,750
Oratory and languages,	5	2	–	2	–	2,300
For the afflicted and dependent,	5	11	10	1	102,000	5,170

From the recapitulation to the showing of private schools by name, giving the number of schools established in each specified year, the following statement as to the number established in each decade is presented.

Decades of Years.	Incorporated Private Schools	Unincorporated Private Schools	Total Private Schools
THE STATE.	96	252	348
1631 to 1640,	1	–	1
1761 to 1770,	1	–	1
1771 to 1780,	1	–	1
1781 to 1790,	2	–	2
1791 to 1800,	5	–	5
1801 to 1810,	5	–	5
1811 to 1820,	1	1	2
1821 to 1830,	8	1	9
1831 to 1840,	7	3	10
1841 to 1850,	7	6	13
1851 to 1860,	8	14	22
1861 to 1870,	19	41	60
1871 to 1880,	21	94	115
1881 to 1885,	10	91	101
Not given,	–	1	1

Of the whole number of private schools shown in this table, 60 were established from 1861 to 1870, 115 from 1871 to 1880, and 101 from 1881 to 1885, 216 having been established since 1871, of which 31 are incorporated and 185 are unincorporated schools.

LIBRARIES AND READING ROOMS (page 845). The returns concerning libraries and reading rooms have been carefully tabulated with a view to the presentation in detail of the facts obtained through the Census in regard to them. The tabular presentations are divided into two parts, all the information concerning libraries being first presented and being followed by the information concerning reading rooms. In the consideration or in the use of these statistics reference should be made to the explanatory text on page 847.

Four towns, namely, Washington, in the county of Berkshire, Seekonk, in the county of Bristol, Gosnold, in the county of Dukes, and Millis, in the county of Norfolk, make no return of either libraries or reading rooms.

The first table concerning libraries gives the number and value of books, and the circulation for the year ending June 30, 1885, for the various libraries in the cities and towns of the Commonwealth, these libraries being classified as explained on page 847.

This table is followed by two short tables, in the first of which is presented by towns the libraries reporting endowment funds, giving the amount of the fund and the annual income from the same; in the second table is given by towns the number of libraries owning or hiring buildings, together with the value of buildings when owned, and the annual rental when hired. A classification of the libraries returned in 1885 and 1875 is presented in the following table:

KIND OF LIBRARIES.	NUMBER OF LIBRARIES	
	1885	1875
THE STATE.	2,371	1,875
Secular.	703	507
City public,	32	172
Town public,	209

Artistic,	1	
Law,	15	
Medical,	12	
Reference,	5	
Institution,	20	
Hospital,	11	5
Religious.	1,668	1,368
Church,	33	65
Church and Sunday school,	13	
Sunday school,	1,583	1,276
Association,	39	27

In 1885 there are, as is shown in the table, 2,371 libraries, of which 703 are secular and 1,668 are religious libraries. In 1875 there were 1,875 libraries, of which 507 were secular and 1,368 were religious, showing an increase during the decade of 496 libraries, the increase for the secular libraries being 196 and for religious libraries 300.

The principal results shown in the three tables previously described are brought forward into a form easy for comparison, similar results for 1875 being supplied wherever possible. This comparison table follows:

Classification.	1885			1875		
	Secular Libraries	Religious Libraries	Total Libraries	Secular Libraries	Religious Libraries	Total Libraries
Total number of libraries,	703	1,668	2,371	507	1,368	1,875
Number of Books.

Value of buildings, .	$2,139,650	$50,000	$2,189,650	$2,347,794	$200,893	$2,548,687
Buildings Hired.						
Libraries making return, .	80	3	83	–	–	–
Annual rental, . . .	$18,145	$1,860	$20,005	–	–	–

Considering the number of books contained in the libraries in 1885, we find a grand total of 5,876,856, of which 4,542,072 are bound books, 1,298,739 are pamphlets, and 36,045 are manuscripts. This number of books is contained in 2,368 libraries, three libraries making no return for this inquiry. In 1875 the total number of books was returned as being 3,482,658, of which 2,771,012 were bound books, the balance being returned as pamphlets, including manuscripts.

As regards the value of books 2,353 libraries make a return in 1885, the value of books in these libraries being placed at $5,888,952. In 1875 there was no return for the value of books.

The libraries making a return in 1885 as regards circulation number 2,021, and they report a total circulation during the year ending June 30, 1885, of 9,342,924 books, 8,619,068 being for home use and 723,856 for library use. In 1875 the total circulation reported was 7,976,128.

Of the 2,371 libraries in the State, but 200 make a return as to endowment funds, the total amount of the endowment funds being $3,281,486. In 1875 the total value (in gold) of the endowment funds was returned at $1,102,701, the number of libraries making such a return not being stated. The annual income from endowment funds is given in 1885 as being $164,221, and applies to 203 libraries. The total annual income from endowment funds in 1875, reduced to a gold basis, was $82,713.

For buildings owned, but 89 libraries make a return in 1885, the value of the buildings being stated as $2,189,650. The value of the library buildings owned in 1875 was (in gold) $2,548,687. The total value of the annual rentals paid in 1885 for library buildings which are hired is $20,005, this amount being returned by 83 libraries. No information was given in 1875 as to buildings hired.

The presentation of libraries by name is given on pages 902–969, the table comprehending, in addition to the name of the library, the year in which it was opened, its means of support, and the number of hours open daily and weekly. From the recapitulation to this table (page 966) we draw the following summary showing the number of libraries opened by decades of years.

DECADES OF YEARS.	Secular Libraries	Religious Libraries	Total Libraries
THE STATE.	703	1,668	2,371
1631 to 1640,	1	–	1
1761 to 1770,	1	–	1
1771 to 1780,	3	–	3
1781 to 1790,	–	1	1
1791 to 1800,	5	5	10
1801 to 1810,	5	6	11
1811 to 1820,	8	65	73
1821 to 1830,	20	199	219
1831 to 1840,	17	271	288
1841 to 1850,	34	218	252
1851 to 1860,	79	162	241
1861 to 1870,	132	177	309
1871 to 1880,	247	239	486
1881 to 1887,	113	113	226
Not given,	38	212	250

The first of the tables devoted to reading rooms gives by towns the value of reading room fixtures, the amount of reading matter, and the number of persons using the reading rooms, this last point being for the year ending June 30, 1885. From the recapitulation by kind of reading rooms on page 974 is obtained the following table for 1885, as compared with a similar presentation for 1875.

KIND OF READING ROOMS.	NUMBER OF READING ROOMS	
	1885	1875
THE STATE.	194	111
Secular.	172	104
City public,	31	53
Town public,	59	
Other public,	5	
Association,	46	23
Public school,	2	4
Private school,	13	
College,	9	3
Scientific,	1	20
Artistic,	1	
Law,	1	
Medical,	4	
Hospital,	–	1
Religious.	22	7
Church,	1	3
Association,	21	4

From this table we find that there are 194 reading rooms returned in 1885 as against 111 in 1875. Of the reading rooms returned in 1885, 172 are secular and 22 are religious; in 1875 the secular reading rooms numbered 104 and the religious reading rooms 7. Following the recapitulation just referred to is presented a tabular statement showing the number of reading rooms connected with libraries, which for convenience of reference is reproduced in this analysis.

KIND OF READING ROOMS.	Connected with Libraries	Not Connected with Libraries	Total Number of Reading Rooms
THE STATE.	161	33	194
Secular.	146	26	172
City public,	31	–	31
Town public,	58	1	59
Other public,	3	2	5
Association,	32	14	46
Public school,	–	2	2
Private school,	10	3	13
College,	5	4	9
Scientific,	1	–	1
Artistic,	1	–	1
Law,	1	–	1
Medical,	4	–	4
Religious.	15	7	22
Church,	–	1	1
Association,	15	6	21

Of the 194 reading rooms 161 are connected and 33 are not connected with libraries. Of the secular reading rooms 146 are connected and 26 are not connected with libraries, 15 of the 22 religious reading rooms being also connected with libraries.

Considering the principal points contained in the detailed presentation by towns as to reading room fixtures, reading matter, and the use of reading rooms, a presentation similar to that used in the analysis of libraries may be made for reading rooms. In this table is presented the information, as returned for reading rooms, concerning endowment funds and buildings owned and hired, these points not being shown in detail by towns. The figures contained in this statement apply only to the returns for 1885, corresponding statistics for 1875 not having been ascertained. The table follows:

CLASSIFICATION.	Secular Reading Rooms	Religious Reading Rooms	Total Reading Rooms
Total number of reading rooms,	172	22	194
Value of Reading Room Fixtures.			
Reading rooms making return,	96	18	114
Value of reading room fixtures,	$24,925	$3,915	$28,840
Newspapers and Periodicals.			
Reading rooms making return,	157	22	179
Number of newspapers and periodicals,	7,186	1,130	8,316
Works of Reference.			
Reading rooms making return,	55	11	66
Number of works of reference,	8,105	1,227	9,332
Persons using Reading Rooms.			
Reading rooms making return,	107	12	119
Number of males returned,	1,077,970	344,951	1,422,921
Number of females returned,	222,224	–	222,224
Number of persons for whom the sex is not returned,	458,365	3,750	462,115
Total persons,	1,758,559	348,701	2,107,260
Amount of Endowment Fund.			
Reading rooms making return,	6	1	7
Amount of fund,	$31,512	$500	$32,012
Annual Income from Fund.			
Reading rooms making return,	5	1	6
Annual income from fund,	$1,106	$21	$1,127
Buildings Owned.			
Reading rooms making return,	1	–	1
Value of buildings,	$500	–	$500
Buildings Hired.			
Reading rooms making return,	11	6	17
Annual rental,	$3,336	$2,750	$6,086

Analyzing this statement we find that 114 reading rooms return a value of reading room fixtures of $28,840, the value of reading room fixtures for secular reading rooms being $24,925 and for religious reading rooms $3,915 ; 179 reading rooms report that there are 8,316 newspapers and periodicals on file, while 66 make a return of works of reference to the number of 9,332, in each case being returned mostly by secular reading rooms. The number of newspapers and periodicals, as returned, does not represent necessarily the number of different newspapers and periodicals, but the number of copies, including duplicates, usually kept on file for the use of readers, the same newspapers and periodicals being naturally included in the files of the various reading rooms.

In answer to the inquiry as to the number of persons using the reading rooms during the year ending June 30, 1885, 119 reading rooms make a return, the total number of persons being 2,107,260. Of this number 1,422,921 are males, 222,224 are females, while for 462,115 persons the sex is not returned. Seven reading rooms only, six secular and one religious, make a return of endowment funds, the total value of these funds being $33,012 ; of this amount the income is returned for but $22,012, the amount of the annual income being $1,127.

According to the returns there is but one reading room domiciled in its own building, the value of this building being returned as $500 ; 17 reading rooms hire buildings, however, and pay an aggregate annual rental of $6,086.

A showing similar to that of libraries by name is made for reading rooms and comprehends practically the same class of information. This table is given on pages 976–986, and from the recapitulation showing the number of reading rooms opened in years specified the following results by decades of years may be presented.

DECADES OF YEARS.	Secular Reading Rooms	Religious Reading Rooms	Total Reading Rooms
THE STATE.	172	22	194
1801 to 1810,	1	–	1
1811 to 1820,	1	–	1
1821 to 1830,	2	–	2
1841 to 1850,	4	–	4
1851 to 1860,	8	3	11
1861 to 1870,	34	3	37
1871 to 1880,	53	3	56
1881 to 1887,	52	10	62
Not given,	17	3	20

In the inquiries pertaining to reading rooms information was sought as to the seating capacity of the reading rooms and their average use daily during the Census year. The inquiries concerning these points are generally answered, this information being shown in the following table :

Kind of Reading Rooms.	Total Number of Reading Rooms	Seating Capacity			Average Daily Use		
		Number of Reading Rooms making return	Total Seating Capacity	Average Seating Capacity	Number of Reading Rooms making return	Total Number using Reading Rooms Daily	Average Number using Reading Rooms Daily
The State.	194	178	10,651	59.84	132	8,221	62.28
Secular.	172	157	9,276	59.08	115	6,833	59.42
City public, ...	31	31	2,422	78.13	25	2,547	101.88
Town public, . . .	59	55	2,344	42.62	38	1,851	48.71
Other public, . . .	5	5	325	65.00	5	114	22.80
Association, . . .	46	41	3,235	78.90	31	1,063	34.29
Public school, . .	2	2	40	20.00	1	100	100.00
Private school, . .	13	11	290	26.36	7	438	62.57
College, ...	9	6	250	41.67	4	355	88.75
Scientific, . . .	1	1	100	100.00	1	25	25.00
Artistic, ...	1	1	30	30.00	–	–	–
Law, ...	1	1	75	75.00	1	100	100.00
Medical, ...	4	3	165	55.00	2	240	120.00
Religious.	22	21	1,375	65.48	17	1,388	81.65
Church, ...	1	1	25	25.00	1	40	40.00
Association, . . .	21	20	1,350	67.50	16	1,348	84.25

The total seating capacity of 178 reading rooms, as returned, is 10,651, the average seating capacity for each reading room being 59.84. The average seating capacity of city public reading rooms is 78.13 and for secular association reading rooms 78.90. Under average daily use we find for 132 reading rooms that in the aggregate 8,221 persons used them daily, the average number using them being 62.28 for each reading room. The average number using city public reading rooms daily is 101.88.

Illiteracy (page 987). One of the most important uses of the Census is the opportunity which it affords for ascertaining positively, once in ten years at least, the amount of illiteracy among the people. In the consideration of this question it is necessary to know not alone the number of persons 10 years of age and over who are so affected, but to ascertain as well their degree of illiteracy, that is, to what extent they are illiterate. For this purpose the illiterates in the State are classified in the Census according to the number who *cannot read* but can write; the number who *cannot write* but can read, and the number who *can neither read nor write*. It is essential to know also the ages of the illiterates so as to determine accurately the percentages of illiterate young and old persons; what part also are foreign born and what countries supply the greater proportions of these persons; how many are native born and what proportion were born in Massachusetts, and how many of these are of native or foreign parentage; to show among what class or classes of workers or non-workers illiteracy predominates, and to ascertain as well if it is on the increase or decrease when compared with preceding Census enumerations. These and many other points need to be brought out fully in order to arrive at a true estimate as to the condition of the Commonwealth in this respect.

Having made a careful enumeration of the illiterates as regards these points it is easy to determine the preventable and non-preventable elements of illiteracy. That is, we can determine the exact proportion which can be reached and overcome by the adoption of the proper methods for its suppression, as well as the part which is necessarily unavoidable and beyond statutory regulation.

The presentation of the results for illiteracy in the present Census is most complete as to detail and most conclusive as to the facts presented. The comparative prevalence of illiteracy in the cities and towns in the State is fully shown in two tables, the first of which (page 991) relates to the total number of illiterates, without regard to the degree of illiteracy; this table also contains the percentages of the illiterates, for each sex, of the total population 10 years of age and over in each town. The second table (page 1002) supplies a classification of the illiterates by cities and towns according to the number for each degree of illiteracy, and also shows a distribution of the illiterates, for each degree of illiteracy, by age periods and sex, with a still further subdivision as to whether born in Massachusetts, in other parts of the United States, or whether foreign born. Besides these two town showings, a very complete presentation of illiteracy is made, for the State, as regards place of birth, parent nativity, occupations, language, and color and race, together with a special showing for illiterate aliens.

The facts presented in the several tables referred to will be brought out successively in comparison with similar results in the State Census of 1875, so far as ascertained.

The first point to be considered in the analysis of illiteracy is to ascertain what percentage of the population 10 years of age and over is illiterate, both for the native born and for the foreign born. This is shown in the following table, in conjunction with a similar statement for 1875:

CLASSIFICATION.	1885			1875		
	Males	Females	Both Sexes	Males	Females	Both Sexes
Population 10 Years of Age and Over.	751,747	830,214	1,581,961	625,819	687,800	1,313,619
Native born, ...	518,511	559,357	1,077,868	439,128	475,055	914,183
Foreign born, . . .	233,236	270,857	504,093	186,691	212,745	399,436
Number of Illiterates.	45,550	76,713	122,263	41,120	63,393	104,513
Native born, ...	6,735	7,163	13,898	5,877	6,273	12,150
Foreign born, . . .	38,815	69,550	108,365	35,243	57,120	92,363
Percentages of Illiterates of Population 10 Years of Age and Over.	6.06	9.24	7.73	6.57	9.22	7.96
Native born, ...	1.30	1.28	1.29	1.34	1.32	1.33
Foreign born, . . .	16.64	25.68	21.50	18.88	26.85	23.12

Analyzing this table we find that the population 10 years of age and over in 1885 is 1,581,961; of this number 122,263 are returned as being illiterate, representing 7.73 per cent of the population 10 years of age and over. In 1875 the population 10 years of age and over numbered 1,313,619, the number of illiterates being 104,513 and constituting 7.96 per cent of the population 10 years of age and over. These figures show a slight decrease in the percentage of illiterates considered as regards population, although there is an increase in the number of illiterates in 1885 as compared with 1875 of 17,750.

The native born illiterates in 1885 number 13,898, or 1.29 per cent of the native born population 10 years of age and over. In 1875 there were 12,150 native born illiterates, or 1.33 per cent of the native born population 10 years of age and over.

The foreign born illiterates, on the other hand, in 1885 number 108,365, these foreign born illiterates representing 21.50 per cent of the foreign born population 10 years of age and over. In 1875 the foreign born illiterates numbered 92,363 and represented 23.12 per cent of the foreign born persons 10 years of age and over.

Considered as regards sex we find that the percentage of illiterate males is less than that for illiterate females, both in 1885 and in 1875. Of the native born illiterates there is a slight excess in the percentage for males as compared with females, while for the foreign born the difference in the percentages is largely in favor of the males. The foreign born illiterate males in 1885 represent 16.64 per cent of the foreign born males 10 years of age and over and the foreign born illiterate females 25.68 per cent of the foreign born females 10 years of age and over. In 1875 the percentages were, respectively, 18.88 for males and 26.85 for females.

Of the total population 48.03 per cent are males and 51.97 per cent are females. In 1875 the males represented 48.09 per cent of the whole population and the females 51.91 per cent. Of the population 10 years of age and over in 1885 the males constitute 47.52 per cent and the females 52.48 per cent, while in 1875 the males represented 47.64 per cent and the females 52.36 per cent. In the following table the illiterates are distributed by sex for 1875 and 1885, giving also the percentages for total population and population 10 years of age and over.

Sex.	Total Population	Population 10 Years of Age and Over	Illiterates		
			Native Born	Foreign Born	Total
1885.	100.00	100.00	100.00	100.00	100.00
Males,	48.03	47.52	48.46	35.82	37.26
Females,	51.97	52.48	51.54	64.18	62.74
1875.	100.00	100.00	100.00	100.00	100.00
Males,	48.09	47.64	48.37	38.16	39.34
Females,	51.91	52.36	51.63	61.84	60.66

The percentages for native born illiterates indicate a distribution similar to that for the population as a whole, and differ only slightly from the percentages shown for the population 10 years of age and over. For the foreign born illiterates, however, the percentages show for both 1875 and 1885 a great preponderance of the females, very nearly two-thirds of all the foreign born illiterates being of that sex. Of the total foreign born population in 1875 and 1885 the females represent a trifle less than 54 per cent, and the same is, also, true concerning the foreign born population 10 years of age and over.

The greater part of the illiterates are foreign born, as is graphically shown in the following table of percentages:

Native and Foreign Born.	1885			1875		
	Males	Females	Both Sexes	Males	Females	Both Sexes
THE STATE.	100.00	100.00	100.00	100.00	100.00	100.00
Native born, ...	14.79	9.34	11.37	14.29	9.90	11.63
Foreign born, ...	85.21	90.66	88.63	85.71	90.10	88.37

Of the male illiterates in 1875 and 1885, over 85 per cent are foreign born and over 90 per cent of the female illiterates are found among the foreign born. Of all the illiterates, without regard to sex, over 88 per cent are foreign born.

The following table shows the increase from 1875 to 1885 for the total population, for the population 10 years of age and over, and for the illiterates, as regards both the native born and the foreign born.

Sex, and Native and Foreign Born.	Increase from 1875 to 1885:					
	Total Population		Population 10 Years of Age and Over		Number of Illiterates	
	Number	Percentages	Number	Percentages	Number	Percentages
THE STATE.	290,229	17.57	268,342	20.43	17,750	16.98
Native born, ...	182,266	14.78	163,685	17.91	1,748	14.39
Foreign born, ...	107,963	25.77	104,657	26.20	16,002	17.33
Males.	138,501	17.44	125,928	20.12	4,430	10.77
Native born, ...	89,980	15.04	79,383	18.08	858	14.60
Foreign born, ...	48,521	24.75	46,545	24.93	3,572	10.14
Females.	151,728	17.69	142,414	20.71	13,320	21.01
Native born, ...	92,286	14.54	84,302	17.75	890	14.19
Foreign born, ...	59,442	26.68	58,112	27.32	12,430	21.76

Analyzing this table we find that there has been an increase in the total population of 17.57 per cent, an increase in the population 10 years of age and over of 20.43 per cent, while the illiterates have increased but 16.98 per cent. Taking the native born we find that the total population for this class has increased 14.78 per cent, the population 10 years of age and over 17.91 per cent, while the native born illiterates have increased but 14.39 per cent. Analyzing in the same way the foreign born as a class it is seen that there has been an increase in the total foreign born population of 25.77 per cent, an increase in the foreign population 10 years of age and over of 26.20 per cent, while the foreign born illiterates have increased but 17.33 per cent.

The results shown in this table for the illiterates as a class indicate most conclusively a relative decrease within the ten years in the number of the illiterates as compared both with the increase in total population and the increase in the population 10 years of age and over.

Comparing the results shown for each sex we find for males that the total male population has increased 17.44 per cent, the male population 10 years of age and over 20.12 per cent, while the increase in illiterate males has been but 10.77 per cent. The relative increase for native born males has been practically the same as for native born persons without regard to sex, the percentages of increase for this class being 15.04 for total population, 18.08 for population 10 years of age and over, and 14.60 for the illiterates. For the foreign born males, however, an increase is shown in the total population for this class of 24.75 per cent and in the population 10 years of age and over of 24.93 per cent, whereas the illiterates have increased but 10.14 per cent.

The females, on the other hand, show an increase in the number of illiterates of 21.01 per cent as compared with an increase of 17.69 per cent in the total female population, and of 20.71 per cent in the female population 10 years of age and over. This excess of increase for illiterate females as compared with the increase in the total female population and the female population 10 years of age and over is apparent only and disappears when considered as regards the native and foreign born illiterate females separately, there having been in each case a relative decrease in illiteracy as compared with the increase in the population for each class. Considering the percentages in detail, we find for the native born females that the increase in illiteracy has been 14.19 per cent as against an increase in the native female population of 14.54 per cent, and in the native female population 10 years of age and over of 17.75 per cent. For the foreign born females we find that the foreign female population has increased 26.68 per cent, the foreign female population 10 years of age and over 27.32 per cent, while the illiterates have increased 21.76 per cent.

The concentration of the illiterates in cities and towns on the basis of the number returned in 1885 is shown in the following table, the illiteracy in the 23 cities and in 27 towns being shown in detail and the illiteracy for the remainder of the towns in the State being summarized only.

23 cities, shown in detail,	. . . . . .	883,860	71,393	8.08
27 towns, shown in detail,	. . . . . .	171,035	20,093	11.75
298 towns, not shown,	. . . . . .	527,066	30,777	5.84

The number of illiterates shown in the 50 cities and towns named in the preceding table constitute about three-fourths of all the illiterates, while the population 10 years of age and over represented by these cities and towns is about two-thirds of the entire population 10 years of age and over in the State. The percentage of illiteracy in the cities is 8.08 per cent as against 11.75 per cent in the 27 towns named and 5.84 per cent in the remaining towns. The illiterates in all the towns as a whole, as distinct from illiterates in cities, constitute 7.29 per cent of the population 10 years of age and over in the towns.

Having considered the distribution of the illiterates in the cities as compared with the towns in the State, it is interesting to know in what towns the percentage which the illiterates in 1885 bear to the total population 10 years of age and over is the greatest. This is shown in the following table, the order of towns being based upon the percentages of illiterates.

Cities and Towns, and Specified Percentages of Illiteracy.	Counties	Population 10 Years of Age and Over	Illiterates

Cummington,	Hampshire,	660	2	0.30
Chilmark,	Dukes,	360	1	0.28

Recapitulating the totals shown in the preceding table for the specified percentages of illiteracy, we have the following results, to which is added the number of towns reporting each of the specified percentages of illiteracy:

SPECIFIED PERCENTAGES OF ILLITERACY.	Number of Towns	Population 10 Years of Age and Over	ILLITERATES	
			Number	Percentages
THE STATE.	348	1,581,961	122,263	7.73
20 per cent and over,	6	62,259	13,029	20.93
15 and under 20 per cent,	11	60,849	10,386	17.07
10 and under 15 per cent,	40	175,442	20,744	11.82
5 and under 10 per cent,	137	913,923	65,985	7.22
Less than 5 per cent,	154	369,488	12,119	3.28

Analyzing these results, we find that the 6 towns showing 20 per cent and over of illiterates represent 3.93 per cent of the population 10 years of age and over and 10.66 per cent of all the illiterates in the State; that the 11 towns having 15 and under 20 per cent of illiteracy represent 3.85 per cent of the population 10 years of age and over and 8.49 per cent of the illiterates; that the 40 towns having 10 and under 15 per cent represent 11.09 per cent of the population 10 years of age and over and 16.97 per cent of the illiterates; that the 137 towns having 5 and under 10 per cent represent 57.77 per cent of the population 10 years of age and over and 53.97 per cent of the illiterates, while the 154 towns having less than 5 per cent represent 23.36 per cent of the population 10 years of age and over and 9.91 per cent of the illiterates, these percentages being shown in the following table:

Specified Percentages of Illiteracy.	Percentages of —	
	Population 10 Years of Age and Over	Illiterates
The State.	100.00	100.00
20 per cent and over,	3.93	10.66
15 and under 20 per cent,	3.85	8.49
10 and under 15 per cent,	11.09	16.97
5 and under 10 per cent,	57.77	53.97
Less than 5 per cent,	23.36	9.91

Considering the illiterates according to the degree of illiteracy, we have a distribution for 1875 and for 1885 as shown in the following table, the distribution for 1875 being without regard to sex.

Degree of Illiteracy.	1885			1875
	Males	Females	Both Sexes	Both Sexes
The State.	45,550	76,713	122,263	104,513
Cannot read,	94	39	133	307
Cannot write,	7,992	17,368	25,360	26,656
Neither read nor write,	37,464	59,306	96,770	77,550

This table is succeeded by another table in which the distribution is given by percentages.

Degree of Illiteracy.	1885			1875
	Males	Females	Both Sexes	Both Sexes
The State.	100.00	100.00	100.00	100.00
Cannot read,	0.21	0.05	0.11	0.29
Cannot write,	17.54	22.64	20.74	25.51
Neither read nor write,	82.25	77.31	79.15	74.20

Analyzing these tables we find for 1885 that 133 persons only are returned as not being able to read although they claim the ability to write; they represent but 0.11 per cent of all the illiterates. In spite of the apparent anomaly presented by this class of illiterates a few are always returned in every Census, there being 307 so returned in 1875, representing 0.29 per cent of all the illiterates for 1875. The persons in 1885 who cannot write but can read number 25,360, or 20.74 per cent of the whole number of illiterates, while in 1875 they numbered 26,656 and represented 25.51 per cent of the total illiterates. The third and last class of illiterates are those who can neither read nor write, that is, are totally illiterate. This class in 1885 numbers 96,770 and constitutes 79.15 per cent of all the illiterates. The number in 1875 for this class was 77,550, comprising 74.20 per cent of all the illiterates in 1875.

Comparing the number of illiterates returned for each degree with the population 10 years of age and over, we can determine what relation they bear to the population 10 years of age and over, for each degree and by sex, this being shown in the following table:

DEGREE OF ILLITERACY.	1885			1875
	Males	Females	Both Sexes	Both Sexes
THE STATE.	6.06	9.24	7.73	7.96
Cannot read,	0.01	–	0.01	0.02
Cannot write,	1.06	2.09	1.60	2.03
Neither read nor write,	4.98	7.14	6.12	5.90

The illiterates who cannot write but can read constitute in 1885 but 1.60 per cent of the population 10 years of age and over as against 2.03 per cent in 1875. The totally illiterate, or those who can neither read nor write, represent 6.12 per cent in 1885 as compared with 5.90 per cent in 1875.

The distribution of the illiterates by age periods makes a comparison possible of the young persons who are illiterate with the adult population that is illiterate; the first class constituting an element in our population which it is possible to remove, while the latter class may be said to be beyond the pale of restrictive or corrective measures. This classification as regards the native and foreign born illiterates of each sex is shown for 1885 and for 1875 in the following table, the distribution by age periods for each year being given separately, owing to a difference in the classification of age periods.

AGE PERIODS.	MALES		FEMALES		BOTH SEXES	
	Native Born	Foreign Born	Native Born	Foreign Born	Native Born	Foreign Born
1885.	6,735	38,815	7,163	69,550	13,898	108,365
10 to 13 years,	1,363	795	977	722	2,340	1,517
14 to 19 years,	1,105	3,198	915	3,052	2,020	6,250
20 to 29 years,	1,337	7,410	1,610	9,488	2,947	16,898
30 to 49 years,	1,640	14,904	2,194	28,224	3,834	43,128
50 years and over,	1,284	12,490	1,465	28,056	2,749	40,546
Age unknown,	6	18	2	8	8	26
1875.	5,877	35,243	6,273	57,120	12,150	92,363
10 to 15 years,	1,701	1,464	1,353	1,523	3,054	2,987
16 to 19 years.	823	1,697	859	2,175	1,682	3,872
20 to 21 years,	200	638	267	1,024	467	1,662
Above 21 years,	3,153	31,444	3,794	52,398	6,947	83,842

A table is also presented showing this distribution by percentages, as follows:

Age Periods.	Males		Females		Both Sexes	
	Native Born	Foreign Born	Native Born	Foreign Born	Native Born	Foreign Born
1885.	100.00	100.00	100.00	100.00	100.00	100.00
10 to 13 years,	20.24	2.05	13.64	1.04	16.84	1.40
14 to 19 years,	16.41	8.24	12.77	4.39	14.53	5.77
20 to 29 years,	19.85	19.09	22.48	13.64	21.20	15.59
30 to 49 years,	24.35	38.40	30.63	40.58	27.59	39.80
50 years and over,	19.06	32.17	20.45	40.34	19.78	37.42
Age unknown,	0.09	0.05	0.03	0.01	0.06	0.02
1875.	100.00	100.00	100.00	100.00	100.00	100.00
10 to 15 years,	28.94	4.15	21.57	2.67	25.14	3.23
16 to 19 years,	14.01	4.82	13.69	3.81	13.84	4.19
20 to 21 years,	3.40	1.81	4.26	1.79	3.84	1.80
Above 21 years,	53.65	89.22	60.48	91.73	57.18	90.78

The difference in the classification of age periods in 1885 as compared with 1875, on account of changes in the laws since 1875 concerning the ages of children at work and for attendance at school, makes any comparative showing in detail impossible. We can, however, indicate for each Census year the number under 20 years of age and the number 20 years of age and over, the aggregated results on this basis being shown in the following table:

Age Periods.	Males		Females		Both Sexes	
	Native Born	Foreign Born	Native Born	Foreign Born	Native Born	Foreign Born
1885.						
Number.	6,735	38,815	7,163	69,550	13,898	108,365
Under 20 years,	2,468	3,993	1,892	3,774	4,360	7,767
20 years and over,	4,261	34,804	5,269	65,768	9,530	100,572
Age unknown,	6	18	2	8	8	26
Percentages.	100.00	100.00	100.00	100.00	100.00	100.00
Under 20 years,	36.65	10.29	26.41	5.43	31.37	7.17
20 years and over,	63.26	89.66	73.56	94.56	68.57	92.81
Age unknown,	0.09	0.05	0.03	0.01	0.06	0.02
1875.						
Number.	5,877	35,243	6,273	57,120	12,150	92,363
Under 20 years,	2,524	3,161	2,212	3,698	4,736	6,859
20 years and over,	3,353	32,082	4,061	53,422	7,414	85,504
Percentages.	100.00	100.00	100.00	100.00	100.00	100.00
Under 20 years,	42.95	8.97	35.26	6.48	38.98	7.42
20 years and over,	57.05	91.03	64.74	93.52	61.02	92.58

Of the native born illiterates returned in 1885, numbering 13,898, 4,360, or 31.37 per cent, are less than 20 years of age, while 9,530, or

68.57 per cent, are 20 years of age and over. In 1875 there were 4,736, or 38.98 per cent of the total native born illiterates, under 20 years of age and 7,414, or 61.02 per cent, 20 years of age and over.

Of the foreign born illiterates, numbering 108,365 in 1885, there are 7,767, or 7.17 per cent, under 20 years of age. In 1875 there were 6,859, or 7.42 per cent of the foreign born illiterates, under 20 years of age. The number 20 years of age and over in 1885 is 100,572, representing 92.81 per cent of all the foreign born illiterates, while in 1875 the number was 85,504, or 92.58 per cent. Generally speaking, the distribution as regards each sex presents the same results, as is plainly set forth in the table. In 1885 there are 34 illiterate persons returned for whom the age is unknown.

Eliminating the classification by native and foreign born, and considering the distribution by age periods for the illiterates as a whole, both by number and percentages, we have the following results:

AGE PERIODS.	NUMBER OF ILLITERATES			PERCENTAGES OF ILLITERATES		
	Males	Females	Both Sexes	Males	Females	Both Sexes
1885.	45,550	76,713	122,263	100.00	100.00	100.00
10 to 13 years, ...	2,158	1,699	3,857	4.74	2.21	3.16

Above 21 years, . . .	34,597	56,192	90,789	84.13	88.64	86.87

To bring these figures to a basis for comparison of the results for 1885 with those for 1875, as was done in the case of the native and foreign born illiterates, the following table has been prepared:

AGE PERIODS.	NUMBER OF ILLITERATES			PERCENTAGES OF ILLITERATES		
	Males	Females	Both Sexes	Males	Females	Both Sexes
1885.	45,550	76,713	122,263	100.00	100.00	100.00
Under 20 years, ...	6,461	5,666	12,127	14.19	7.38	9.93
20 years and over, . . .	39,065	71,037	110,102	85.76	92.61	90.05
Age unknown, ...	24	10	34	0.05	0.01	0.02
1875.	41,120	63,393	104,513	100.00	100.00	100.00
Under 20 years, ...	5,685	5,910	11,595	13.83	9.32	11.09
20 years and over, . . .	35,435	57,483	92,918	86.17	90.68	88.91

Considering this table we find in 1885 that 12,127, or 9.93 per cent, are under 20 years of age and that 110,102, or 90.05 per cent, are 20 years of age and over. In 1875 there were 11,595 illiterate persons under 20 years of age, this number constituting 11.09 per cent of all the illiterates; those 20 years of age and over in 1875 numbered 92,918, or 88.91 per cent of all the illiterates.

Of the illiterate males in 1885, 6,461, or 14.19 per cent, are under 20 years of age and 39,065, or 85.76 per cent, are 20 years of age and over. For the females there are 5,666, or 7.38 per cent, under 20 years of age and 71,037, or 92.61 per cent, 20 years of age and over. In 1875 the illiterate males under 20 years of age represented 13.83 per cent of all the illiterate males, and those 20 years of age and over 86.17 per cent. The illiterate females in 1875 comprised 9.32 per cent under 20 years of age and 90.68 per cent 20 years of age and over.

It has been determined thus far in the analysis of illiteracy that there is a very large excess of foreign born illiterates over native born illiterates and that two-thirds of the foreign born illiterates are females, over 64 per cent being females as against 54 per cent of females in the foreign born population 10 years of age and over. In other words, the excess of females among the foreign born illiterates is about ten per cent greater than the excess of females in the population 10 years of age and over.

It has been further shown that about one-sixth (16.64 per cent) of the foreign born male population 10 years of age and over is illiterate and that over one-fourth (25.68 per cent) of the foreign born female population 10 years of age and over is illiterate. The increase in the number of illiterates from 1875 to 1885 as compared with the increase of population 10 years of age and over within the same period shows, also, a relative decrease in illiteracy, except in the case of illiterate females, for whom there is an apparent slight increase, but which disappears when considered separately as regards the native and foreign born females who are illiterate.

Considered also as to the distribution by age periods, it has been shown that a little over one-third of the native born illiterate males are under 20 years of age and about one-fourth of the native born illiterate females; of the foreign born illiterate males, also, about one-tenth are under 20 years of age, while for the same class of illiterate females one-twentieth only are under 20 years of age. Of the illiterates as a whole, a little over one-fifth cannot write but can read, while not quite four-fifths are totally illiterate, that is, can neither read nor write, there being, also, about one-tenth of one per cent of all the illiterates who say they can write but cannot read.

The percentage tables on pages 1060 and 1061 present very clearly and in great detail the essential results concerning the general distribution by degree of illiteracy and by age periods, these points being also classified as regards sex and a division of the illiterates made according as they were born in Massachusetts or in other parts of the United States, or are foreign born. For this last division concerning native and foreign born, the third percentage table shows for each of the classes named the relation which the illiterates for each age period bear to the population for that age period. The general results shown in these tables have been already analyzed; the specific details for each degree and for each age period are so concisely shown by sex and by nativity in the tables themselves that an extended analysis does not seem necessary. It may be said incidentally, however, that, as presented in the second table of percentages (page 1061), of all the illiterates, without regard to sex or degree, 6.79 per cent were born in Massachusetts and 4.58 per cent in other parts of the United States, the foreign born representing, as already shown, 88.63 per cent. The illiterates born in Massachusetts constitute but 1.03 per cent, however, of the population 10 years of age and over born in Massachusetts and the illiterates born in other parts of the United States but 2.03 per cent of the population 10 years of age and over born in other parts of the United States, while the foreign born illiterates constitute, as previously stated, 21.50 per cent of the foreign born population 10 years of age and over.

From the table beginning on page 1062, showing, for the State, illiteracy by place of birth, degree of illiteracy, and age periods, the following results as regards the place of birth of the illiterates, without regard to the degree of illiteracy, are derived, and are brought into comparison in the same table with a similar statement for 1875.

PLACE OF BIRTH.	1885			1875

From this showing a condensed table is made for 1885, giving the principal places of birth of the illiterates in a form convenient for analysis. This table follows:

PLACE OF BIRTH.	NUMBER			PERCENTAGES		
	Males	Females	Both Sexes	Males	Females	Both Sexes
THE STATE.	45,550	76,713	122,263	100.00	100.00	100.00
Native Born.	6,735	7,163	13,898	14.79	9.34	11.37
Massachusetts,	4,403	3,894	8,297	9.67	5.08	6.79

Scotland,	106	476	582	0.23	0.62	0.47
Sweden,	223	345	568	0.49	0.45	0.46
Other Countries,	1,158	1,540	2,698	2.54	2.01	2.21

The general distribution of the illiterates by native and foreign born has already been determined and analyzed. From the preceding table, however, it is possible to ascertain the distribution of the illiterates by states and countries, and from this table it is seen that the native born comprise 8,297 illiterates born in Massachusetts, representing 6.79 per cent of all the illiterates, 2,266, or 1.85 per cent, born in other New England States, and 3,335, or 2.73 per cent, in other parts of the United States. Of those born in New England 384 are natives of Connecticut, 451 of Maine, 283 of New Hampshire, 377 of Rhode Island, and 771 of Vermont. Of those born in other parts of the United States 223 were born in Maryland, 1,330 in New York, 182 in North Carolina, and 981 in Virginia, leaving a balance of 619 who were born in other States or in the territories.

Considering the foreign born illiterates we find that 24,190, or 19.78 per cent of all the illiterates, are French Canadians, while 67,169, or 54.94 per cent of all the illiterates, were born in Ireland. The distribution of the illiterates by sex for these two places of birth shows that there are 12,478 males, representing 27.39 per cent of all the illiterate males, who are French Canadians and 19,157 males, or 42.06 per cent of all the illiterate males, who were born in Ireland, while for the females 11,712, or 15.27 per cent of all the illiterate females, are French Canadians and 48,012, or 62.59 per cent, were born in Ireland. That is to say, these two nativities alone comprise nearly three-fourths of all the illiterates in Massachusetts.

Analyzing the results for these two nativities according to age periods we find that for the French Canadians 5,196, or 21.48 per cent of all the illiterates of this place of birth, are under 20 years of age, while those under 20 years of age who were born in Ireland number 1,142 and represent but 1.70 per cent of all the illiterates born in Ireland. Of the population 10 years of age and over of French Canadian extraction the persons under 20 years of age constitute 25.57 per cent, while of all the persons 10 years of age and over who were born in Ireland the persons born in Ireland under 20 years of age represent 6.15 per cent. The distribution by age periods for these two places of birth is shown in the table which follows :

AGE PERIODS.	BORN IN CANADA (FRENCH)			BORN IN IRELAND		
	Males	Females	Both Sexes	Males	Females	Both Sexes
THE STATE.	12,478	11,712	24,190	19,157	48,012	67,169
10 to 13 years, ...	569	503	1,072	78	83	161
14 to 19 years, ...	2,261	1,863	4,124	322	659	981
20 to 29 years, ...	3,099	2,921	6,020	2,103	4,188	6,291
30 to 49 years, ...	4,066	4,042	8,108	7,925	19,940	27,865
50 years and over, . . .	2,483	2,383	4,866	8,716	23,134	31,850
Age unknown, ...	–	–	–	13	8	21

If we extend the consideration of the illiterate persons under 20 years of age as regards those having Canada (French) or Ireland parentage, we have results as shown in the following table:

Age Periods.	Canada (French) Parentage			Ireland Parentage		
	Males	Females	Both Sexes	Males	Females	Both Sexes
The State.	13,777	13,075	26,852	20,345	50,321	70,666
10 to 13 years, ...	900	745	1,645	378	329	707
14 to 19 years, ...	2,665	2,232	4,897	562	891	1,453
20 to 29 years, ...	3,422	3,305	6,727	2,475	4,961	7,436
30 to 49 years, ...	4,297	4,396	8,693	8,175	20,839	29,014
50 years and over, ...	2,493	2,397	4,890	8,744	23,294	32,038
Age unknown, ...	–	–	–	11	7	18

Of the illiterate persons having French Canadian parentage, irrespective of their place of birth, we find that 6,542, or 24.36 per cent, are under 20 years of age, the percentage of those born in Canada of French extraction being, as already stated, 21.48. Of the illiterate persons having Ireland parentage, that is, both parents born in Ireland, 2,160, or 3.06 per cent, are under 20 years of age, the percentage for illiterate persons of this age who were born in Ireland being 1.70.

The results as regards these two classes of illiterate persons have been drawn from the tables beginning on pages 1070 and 1082 showing, respectively, illiteracy by place of birth and parent nativity, and by parent nativity and age periods. From these tables it is possible also to derive a table in which is shown briefly the composition of the illiterates as regards parentage. This table follows:

Parent Nativity.	Males	Females	Both Sexes
The State.	45,550	76,713	122,263
Massachusetts parentage, ...	1,494	1,045	2,539
New England States parentage, ...	351	386	737
Other States parentage, ...	796	1,305	2,101
Other native parentage, ...	351	284	635
Ireland parentage, ...	20,345	50,321	70,666
Canada (English) parentage, ...	316	317	633
Canada (French) parentage, ...	13,777	13,075	26,852
England parentage, ...	736	1,809	2,545
Scotland parentage, ...	110	482	592
Nova Scotia parentage, ...	619	906	1,525
New Brunswick parentage, ...	132	130	262
Newfoundland parentage, ...	52	80	132
Prince Edward Island parentage, ...	26	80	106
Germany parentage, ...	390	774	1,164
France parentage, ...	106	103	209
Italy parentage, ...	1,115	700	1,815
Other Countries parentage, ...	3,156	3,020	6,176
Other foreign parentage, ...	385	719	1,104
Mixed parentage, ...	440	467	907
Unknown parentage, ...	853	710	1,563

Considering this table we find that of all the illiterates but 2,539, or 2.08 per cent, are of Massachusetts parentage, that is, having both parents born in Massachusetts. The illiterates having both parents born in the other New England States number 737, those having both parents born in other States 2,101, and those having other native parentage, that is, one parent born in Massachusetts and one parent born in the other New England States, for instance, number 635. The illiterates having both parents born in Ireland (Ireland parentage) number 70,666 and represent 57.80 per cent of all the illiterates, while those having French Canadian parents number 26,852 and represent 21.96 per cent.

From the recapitulation to the second table we bring forward the following results in brief form, as regards parent nativity, for the native born illiterates and for the foreign born illiterates. The italic abbreviations used to denote parent nativity are as follows: — *n*, for native born; *f*, for foreign born, and *unk*, for unknown.

PARENT NATIVITY.	NATIVE BORN ILLITERATES			FOREIGN BORN ILLITERATES		
	Males	Females	Both Sexes	Males	Females	Both Sexes
THE STATE.	6,735	7,163	13,898	38,815	69,550	108,365
Both parents, *n*,	2,985	2,989	5,974	7	31	38
Father, *n*, mother, *f*,	177	176	353	10	26	36
Father, *n*, mother, *unk*,	61	42	103	1	–	1
Father, *f*, mother, *n*,	216	239	455	37	26	63
Both parents, *f*,	2,735	3,296	6,031	38,530	69,220	107,750
Father, *f*, mother, *unk*,	12	5	17	11	7	18
Father, *unk*, mother, *n*,	80	75	155	1	1	2
Father, *unk*, mother, *f*,	4	11	15	3	13	16
Both parents, *unk*,	465	330	795	215	226	441

From the same recapitulation we also derive a table showing parent nativity for all the illiterates, as follows:

PARENT NATIVITY.	TOTAL ILLITERATES		
	Males	Females	Both Sexes
THE STATE.	45,550	76,713	122,263
Both parents, *n*,	2,992	3,020	6,012
Father, *n*, mother, *f*,	187	202	389
Father, *n*, mother, *unk*,	62	42	104
Father, *f*, mother, *n*,	253	265	518
Both parents, *f*,	41,265	72,516	113,781
Father, *f*, mother, *unk*,	23	12	35
Father, *unk*, mother, *n*,	81	76	157
Father, *unk*, mother, *f*,	7	24	31
Both parents, *unk*,	680	556	1,236

Bringing the results shown in these two tables to a form which will show those having purely native parentage, those having purely foreign parentage, and those having either mixed or unknown parentage, we obtain the following table:

Parent Nativity.	Native Born Illiterates		Foreign Born Illiterates		Total Native Born Illiterates	Total Foreign Born Illiterates	Total Illiterates
	Males	Females	Males	Females			
The State.	6,735	7,163	38,815	69,550	13,898	108,365	122,263
Native parentage,	2,985	2,989	7	31	5,974	38	6,012
Foreign parentage,	2,735	3,296	38,530	69,220	6,031	107,750	113,781
Mixed parentage,	393	415	47	52	808	99	907
Unknown parentage,	622	463	231	247	1,085	478	1,563

Of the 5,974 native born illiterates having native parentage, that is, both parents native born, 2,985 are males and 2,989 are females. There are, besides, 38 foreign born illiterates, 7 males and 31 females, of native parentage. Taking the results shown in the above table for the native born illiterates, the foreign born illiterates, and for all the illiterates, and reducing them to percentages, we have a table as follows:

Parent Nativity.	Percentages of —		
	Total Native Born Illiterates	Total Foreign Born Illiterates	Total Illiterates
The State.	100.00	100.00	100.00
Native parentage,	42.98	0.04	4.92
Foreign parentage,	43.40	99.43	93.06
Mixed parentage,	5.81	0.09	0.74
Unknown parentage,	7.81	0.44	1.28

From this table it is seen that of the native born illiterates 42.98 per cent are of native parentage, that is, have both parents native born, and 43.40 per cent are of foreign parentage, or have both parents foreign born. Those having mixed parentage, or one parent native born and one parent foreign born, represent 5.81 per cent of all the native born illiterates and those having unknown parentage, that is, persons for whom no information is returned as regards the place of birth of one or both parents, represent 7.81 per cent. Of the foreign born illiterates 99.43 per cent are of foreign parentage. Considering the total illiterates, without regard to native or foreign born, we find that 4.92 per cent only are of native parentage, while 93.06 per cent are of foreign parentage.

From the table beginning on page 1088, showing illiteracy by occupations in detail, we draw forward the recapitulation by classified occupations, as follows:

Classified Occupations.	Males	Females	Both Sexes
The State.	45,550	76,713	122,263
Government,	68	22	90
Professional,	121	9	130
Domestic service,	398	58,714	59,112
Personal service,	699	2,119	2,818
Trade,	1,694	239	1,933

Considering the distribution of the illiterates by classified occupations, we find that of the illiterate males 17,486, or 38.39 per cent, are engaged in manufactures and 7,623, or 16.73 per cent, are laborers. There are, also, 5,692 illiterate males engaged in agriculture, representing 12.50 per cent, and 3,193, or 7.01 per cent, engaged in transportation. Of the illiterate females, 58,714, or 76.54 per cent, are engaged in domestic service and 8,398, or 10.95 per cent, are engaged in manufactures.

To show briefly the principal occupations followed by the illiterate males and females, respectively, the following table has been prepared.

Occupations.	Native Born Illiterates	Illiterates Born in Ireland	Illiterates Born in Canada (French)	Other Foreign Born Illiterates	Total Illiterates
Males.	6,735	19,157	12,478	7,180	45,550

The value of this table is readily seen. Taking the illiterate males engaged in manufactures, for instance, we find that 1,455 are native born, 5,700 were born in Ireland, 7,728 are French Canadians, and 2,603 were born in foreign countries not specified. In the same way, for the illiterate males who are laborers, we find that 699 are native born, 4,832 were born in Ireland, 1,212 were born in Canada of French extraction, and 880 were born in foreign countries not specified. Analyzing the results shown for illiterate females engaged in domestic service, we find that 47,299 are housewives and 5,235 are persons engaged in housework without fixed compensation. Of the illiterate housewives 31,967 were born in Ireland and 6,558 are of French Canadian birth. For both males and females, the principal industries under "Manufactures" for which the largest numbers of illiterates are returned are shown in detail. Of the illiterate males engaged in manufactures, 1,947 are in the industry called boots and shoes, 2,282 in building, 4,669 in cotton goods, 1,364 in metals and metallic goods, and 1,280 in woollen goods. Of the illiterate females engaged in manufactures, 5,774 are in the industry called cotton goods.

Passing from the consideration of the illiterates as a whole to that part of the illiterate males who are, also, returned as aliens, we first present a table which shows the distribution of the illiterate aliens by degree of illiteracy and by age periods. This table, drawn from the general table on pages 1136 and 1137, is as follows:

DEGREE OF ILLITERACY.	AGE PERIODS			Age Unknown	ALL AGES
	20 to 29	30 to 49	50 and Over		
THE STATE.	6,391	12,422	8,375	11	27,199
Cannot read,	21	21	4	–	46
Cannot write,	851	1,641	909	–	3,401
Neither read nor write,	5,519	10,760	7,462	11	23,752

Of the illiterate aliens shown in this table, 27,199 in number, 23,752 can neither read nor write, 3,401 can read but cannot write, while 46 are returned as being able to write but unable to read. In the Analysis to Part 1 of this volume (page xlvii) a table is presented showing, for each specified place of birth, the percentage of aliens of foreign born males 20 years of age and over. The results there shown are reproduced in this analysis, and an additional statement made showing the percentage of illiterate aliens of illiterate foreign born males 20 years of age and over. The table follows:

PLACE OF BIRTH.	Aliens	Foreign Born Males 20 Years of Age and Over	Percentage of Aliens of Foreign Born Males 20 Years of Age and Over	Illiterate Aliens	Illiterate Foreign Born Males 20 Years of Age and Over	Percentage of Illiterate Aliens of Illiterate Foreign Born Males 20 Years of Age and Over

Great Britain,	13,937	30,323	45.96	685	900	76.11
England,	10,502	23,339	45.00	588	780	75.38
Scotland,	3,262	6,556	49.76	81	95	85.26
Wales,	173	428	40.42	16	25	64.00
Ireland,	35,600	98,199	36.25	12,875	18,757	68.64
Other Countries,	539	1,702	31.67	82	99	82.83

From this table it is seen that the 27,199 illiterate aliens constitute 78.11 per cent of all the illiterate foreign born males 20 years of age and over, while the aliens as a whole constitute 48.07 per cent of all the foreign born males 20 years of age and over. The illiterate aliens who were born in Ireland constitute 68.64 per cent of the illiterate foreign born males 20 years of age and over born in Ireland, while the whole number of aliens who were born in Ireland constitute 36.25 per cent of all the foreign born males 20 years of age and over born in Ireland. The percentages for the other places of birth may be similarly analyzed. The distribution of the illiterate aliens with respect to occupations and place of birth has already been considered in connection with the analysis of the aliens as a whole under "Occupations by Name."

The definition of illiteracy, as comprehended by the Census, includes all persons 10 years of age and over who either cannot read, cannot write, or can neither read nor write in any language. As thus defined, a person is not considered as illiterate, in the Census, if that person is able to read and write some language, but not necessarily the English language. In returning the answers made on the population schedule concerning illiteracy, the Enumerators were instructed to specify for all persons who were able to read and write as to those persons who were able to read and write the English language, and for those persons who were not able to read and write the English language to give the language which they could read and write. As the result of the answers made to these inquiries, in accordance with these instructions, there appears to be in the whole State 30,883 persons 10 years of age and over who cannot read and write the English language but who can read and write some language other than English, 13,173 being males and 17,710 being females. The classification of these persons by age periods is shown in the following table:

AGE PERIODS.	Males	Females	Both Sexes
THE STATE.	13,173	17,710	30,883
10 to 13 years,	324	517	841
14 to 19 years,	1,955	2,914	4,869
20 to 29 years,	4,246	5,695	9,941
30 to 49 years,	5,056	6,330	11,386
50 years and over,	1,590	2,252	3,842
Age unknown,	2	2	4

From this table it is seen that 841 are from 10 to 13 years of age, 4,869 are from 14 to 19 years of age, 9,941 are from 20 to 29 years of age, 11,386 are from 30 to 49 years of age, and 3,842 are 50 years of age and over, 25,169 being 20 years of age and over. The distribution of these persons by place of birth is presented as follows:

PLACE OF BIRTH.	Males	Females	Both Sexes
THE STATE.	13,173	17,710	30,883

Turkey,	19	2	21
Other Foreign Countries,	10	7	17

As naturally would be the case, the greater part of these persons are foreign born, although a few are reported as being native born. The whole number returned as native born is 653, of which 230 are males and 423 are females. The foreign born number in all 30,230, of which 12,943 are males and 17,287 are females. Of the foreign born without regard to sex, 16,988 are French Canadians, 5,786 were born in Germany, 891 in Italy, 841 in Portugal or in the Western Islands, 392 in Austria, 246 in China, 162 in Denmark, 400 in France, 367 in Russia, 3,111 in Sweden, 257 in Norway, 122 in Nova Scotia, 315 in Poland, and 120 in Switzerland. The languages which these persons read and write are specified in the following table, being reproduced from pages 1138 and 1139:

Specified Languages.	Males	Females	Both Sexes
The State.	13,173	17,710	30,883
Armenian,	13	–	13
Chinese,	245	1	246

Portuguese,	396	454	850
Russian,	87	42	129
Spanish,	19	12	31
Swedish,	1,516	1,630	3,146
Turkish,	17	1	18

Considering the results by specified languages, we find that out of the total of 30,883 persons 10 years of age and over who cannot read and write the English language, there are 18,231 persons who read and write French (including the French Canadians), 6,525 who read and write German, 898 who read and write Italian, 850 who read and write Portuguese, and 3,146 who read and write the Swedish language.

The general tables relating to this class of persons are contained on pages 1138–1142 and comprise many valuable points concerning them. In the table on page 1142 showing a distribution by percentages of the number of persons for each place of birth who either read and write English, who read and write other than English, or who are illiterate, the details by number being given on pages 1140 and 1141, the facts brought out are not only interesting but extremely valuable. By way of illustration as to the uses of the table, a few of the percentages shown therein may be briefly summarized. Taking the population 10 years of age and over as a whole, it is seen that 90.32 per cent read and write English, 1.95 per cent read and write other than English, while 7.73 per cent are wholly or partially illiterate, as has been previously shown. For the native born persons 10 years of age and over, it is seen that, with the exception of the very small percentage who are illiterate, all practically are able to read and write the English language, there being less than one-tenth of one per cent (0.06) who read and write other than English. For the foreign persons 10 years of age and over, however, it is seen that 72.50 per cent only can read and write English, 21.50 per cent being illiterate persons and 6.00 per cent being persons who read and write other than the English language. Of the foreign born who are French Canadians but 29.55 per cent can read and write English, 41.39 per cent being illiterate, while 29.06 per cent read and write other than English. The results shown in the table as regards persons born in China, Italy; Poland, Portugal, Russia, and other countries are similarly suggestive.

The last two tables for illiteracy (page 1143) relate to a distribution of the illiterates as regards color and race, with percentages of the illiterates of the population 10 years of age and over for each class. For white persons 10 years of age and over, the percentages of illiterates are the same practically as for all the population 10 years of age and over, the white persons constituting over 99 per cent of all the persons in the State. For the black persons, however, we find that 2,087 are illiterate, representing 19.47 per cent of all the black persons 10 years of age and over, while for the mulatto persons 426, or 10.44 per cent, are illiterate. Of the Chinese 23.72 per cent are illiterate, but none of the Japanese, of whom there are 20 in the State 10 years of age and over, are illiterate. Of the Indian population who are foreign born, 76.47 per cent are returned as illiterate, or 13 out of 17 persons.

MARRIED WOMEN AND MOTHERS (page 1145). The relative fecundity of women of different nationalities, involving, as it does, in its consideration the question as to the comparative growth of the native and foreign born population, is a subject of vital importance and one concerning which a great deal of information may be obtained by means of the Census. In the Census of 1875 a beginning was made in the direction of securing information bearing on this point, so far as this State was concerned, but to a limited extent only. In that Census an inquiry was made concerning "the number of children borne by women" and the results were printed in the Census reports and were further considered in the report of the Bureau for 1878. In the Census of 1885, also, a similar inquiry was made concerning wômen, the form of the inquiry being "Mother of how many children," and this inquiry was supplemented by another inquiry as to the "Number of these children now living," that is, on May 1, 1885. This second inquiry as to children living was not comprehended by the Census of 1875, so that the results as returned for 1885 have an added value, in that they supply information of an authoritative character and of the greatest value in the scientific determination of a much mooted problem. The statistics presented in the Census of 1885 concerning married women and mothers not only afford confirmatory information as to the relative fecundity of women, as demonstrated in the Census of 1875, but supply data in the nature of vital statistics, this information bearing directly upon the question often raised as to whether it is better to have small families well reared as opposed to large families of children not always brought up under the best and most healthful conditions.

The tabular presentations relating to married women and mothers contained in this Part cover in great detail the subject under consideration, and the results are. so fully presented in the tables themselves, not only as regards number but by averages and percentages, that but little is needed by way of analysis. It will be our purpose, however, to indicate in a general way some of the conclusions which may be derived from the tables and make comparisons with the results for 1875, so far as ascertained in that Census. The explanatory text given on page 1147 should be read carefully in connection with the use of the information presented in the tables.

In all the presentations devoted to this subject the term "married women" includes all the women who are either married, widowed, or divorced.

In the first place, it is necessary to know the distribution of the married women as to the number who have had children and the number who have had no children. Such a distribution is shown for 1885 and 1875 in the following table:

NATIVE AND FOREIGN BORN.	1885			1875		
	Total Married Women	Married Women without Children	Married Women having Children	Total Married Women	Married Women without Children	Married Women having Children
Number.	470,206	82,561	387,645	398,759	89,239	309,520
Native born, ...	291,554	58,850	232,704	254,531	64,220	190,311
Foreign born, ...	178,652	23,711	154,941	144,228	25,019	119,209
Percentages.	100.00	100.00	100.00	100.00	100.00	100.00
Native born, ...	62.01	71.28	60.03	63.83	71.96	61.49
Foreign born, ...	37.99	28.72	39.97	36.17	28.04	38.51

Analyzing this table, we find that of the 470,206 married women in 1885, 291,554, or 62.01 per cent, are native born and 178,652, or 37.99 per cent, are foreign born. In 1875 there were 398,759 married women, of whom 254,531, or 63.83 per cent, were native born and 144,228, or 36.17 per cent, were foreign born. Of the married women without children, in 1885, the native born number 58,850 and constitute 71.28 per cent, while the foreign born number 23,711 and constitute 28.72 per cent. In 1875 there were 71.96 per cent native born and 28.04 per cent foreign born. Of the 387,645 married women having children, in 1885, the native born number 232,704, or 60.03 per cent, and the foreign born 154,941, or 39.97 per cent. In 1875 the native born women having children represented 61.49 per cent and the foreign born women 38.51 per cent.

Considering the relative proportions of married women in 1885 who have children or no children, for the native and foreign born, we find of the married women who are native born that 79.82 per cent have had children and 20.18 per cent have had no children, while of the married women who are foreign born 86.73 per cent have had children and 13.27 have had no children. The married women in 1875 who had had children represented 74.77 per cent of all the married women who were native born and 82.65 per cent of those who were foreign born. Taking the married women as a class, without regard to whether native born or foreign born, we find in 1885 that 82.44 per cent have had children and 17.56 per cent have had no children. In 1875 there were 77.62 per cent of all the married women who had had children and 22.38 per cent who had had no children. These percentages are shown as follows:

NATIVE AND FOREIGN BORN.	1885			1875		
	Total Married Women	Married Women without Children	Married Women having Children	Total Married Women	Married Women without Children	Married Women having Children
THE STATE.	100.00	17.56	82.44	100.00	22.38	77.62
Native born, ...		20.18	79.82		25.23	74.77
Foreign born, ...		13.27	86.73		17.35	82.65

The distribution of the married women in 1885 and 1875 by age periods, according as they are native or foreign born, is shown in the following table:

AGE PERIODS.	TOTAL MARRIED WOMEN		MARRIED WOMEN WITHOUT CHILDREN		MARRIED WOMEN HAVING CHILDREN	
	Native Born	Foreign Born	Native Born	Foreign Born	Native Born	Foreign Born

22 to 30 years, ...	56,055	34,914	16,812	6,894	39,243	28,020
31 to 45 years, ...	84,637	60,310	14,269	6,701	70,368	53,609
Above 45 years, . . .	103,873	45,715	28,106	9,957	75,767	35,758

A similar table showing the distribution by age periods for all the married women and mothers, without regard to whether native or foreign born, is presented as follows:

AGE PERIODS.	Total Married Women	Married Women without Children	Married Women having Children
1885.	470,206	82,561	387,645
10 to 13 years,	1	1	–
14 to 19 years,	4,381	2,599	1,782
20 to 29 years,	90,720	26,838	63,882
30 to 39 years,	116,738	19,980	96,758
40 to 49 years,	101,039	14,409	86,630
50 to 59 years,	74,535	9,276	65,259
60 to 79 years,	74,073	8,498	65,575
80 years and over,	8,687	949	7,738
Age unknown,	32	11	21
1875.	398,759	89,239	309,520
Under 18 years,	765	561	204
18 to 21 years,	12,490	5,939	6,551
22 to 30 years,	90,969	23,706	67,263
31 to 45 years,	144,947	20,970	123,977
Above 45 years,	149,588	38,063	111,525

The difference in the age classification for the two Census years makes any comparisons by age periods of little value. The tables are presented, however, as a part of the general consideration of the subject. As regards the place of birth of married women and mothers, comparison tables showing the distribution by number and by percentages may be made. The first table comprehends number only.

Other Countries,	2.01	1.90	2.04	1.08	1.10	1.08

Referring briefly to this percentage table, it seems that 45.83 per cent of the married women in 1885 who have had no children were born in Massachusetts, 19.50 per cent in the other New England States, and 13.30 per cent in Ireland. Of the married women in 1885 who have had children 39.71 per cent were born in Massachusetts, 15.68 per cent in the other New England States, and 21.66 per cent in Ireland. The general distribution by native and foreign born for each of these classes has previously been considered.

We have already shown the percentages of native and foreign born married women having children or no children, and it is interesting to note, also, the distribution in these respects by place of birth in detail. Such a table for 1885 is presented on page 1173 and is reproduced as follows:

PLACE OF BIRTH.	PERCENTAGES OF MARRIED WOMEN	
	Having Children	Without Children
THE STATE.	82.44	17.56
Native Born.	79.82	20.18
Massachusetts,	80.27	19.73
New England States, Other	79.06	20.94
Other States,	78.52	21.48
Foreign Born.	86.73	13.27
Ireland,	88.43	11.57
Canada (English),	80.55	19.45
Canada (French),	88.34	11.66
Great Britain,	85.58	14.42
British Possessions,	81.13	18.87
Germany,	88.84	11.16
Other Countries,	83.42	16.58

Of the married women born in Massachusetts, 80.27 per cent have had children and 19.73 per cent have had no children. Of those born in Ireland, in Canada (of French parentage), and in Germany, over 88 per cent have had children, while of those born in Great Britain over 85 per cent have had children.

We have thus far shown in tables and by analysis the general composition as to ages and place of birth of the married women who have had children or no children, for 1875 and 1885. We can still further compare the results for the two Censuses as to the total and average number of births to native and foreign born mothers, respectively, and the number reporting specified numbers of children. The first table presented shows the number of native and foreign born mothers in 1885 and 1875 having the specified numbers of children, together with the total number of children, as follows:

Specified Number of Children.	Native Born Mothers		Foreign Born Mothers		Total Mothers	
	Number of Mothers	Total Number of Children	Number of Mothers	Total Number of Children	Number of Mothers	Total Number of Children

24 children,	1	24	1	24	2	48
25 children,	1	25	3	75	4	100

The average number of children for native and foreign mothers, and for the mothers as a whole, is shown in the following statement, to which is added the averages for mothers born in Massachusetts, Ireland, Canada, and other foreign countries.

Nativity of Mothers.	Average Number of Children	
	1885	**1875**
Native born mothers,	3.37	3.52
Foreign born mothers,	5.22	4.91
All mothers,	4.11	4.05
Massachusetts mothers,	3.37	3.55
Irish mothers,	5.63	5.03
Canadian mothers,	–	4.78
Canada (English) mothers,	3.98	–
Canada (French) mothers,	6.19	–
British Possessions mothers,	4.04	–
Other British mothers,	–	4.40
Great Britain mothers,	4.72	–
German mothers,	4.74	4.23

Considering the results shown in these two tables, we find for 1885 that 232,704 native born mothers have had 784,499 children, or an average of 3.37 children to each native born mother; that 154,941 foreign born mothers have had 809,548 children, or an average of 5.22 children to each foreign born mother, and that all the mothers, 387,645 in number, have had 1,594,047 children, or an average of 4.11 children to each mother, whether native or foreign born. The average number of children in 1875 was 3.52 for native born mothers, 4.91 for foreign born mothers, and 4.05 for all mothers. These results indicate a relative decrease in ten years in the average number of children of native born mothers and a relative increase in that of foreign born mothers, the average for all mothers being, also, slightly more in 1885 than in 1875, owing to the greater increase for foreign born mothers. The average number of children for Massachusetts mothers in 1885 is 3.37 as against 3.52 in 1875, while for Irish and German mothers there is a marked increase in 1885 as compared with 1875; the average number of children in 1885 is 5.63 for Irish mothers and 4.74 for German mothers as compared with 5.03 for Irish mothers and 4.23 for German mothers in 1875.

The second part of the analysis relating to married women and mothers deals with the results for 1885 only and is a consideration of information gathered in the Census of 1885 concerning the married women who have had children as to the number of children living and children not living. This inquiry did not form a part of the Census for 1875 and no further comparisons, therefore, are possible.

The general results as to children and children living, for the State, are shown on page 1169, in the recapitulation to the presentation by towns, giving by native and foreign born the total number of married women, the number of married women without children, the number of married women having children, and for these women the total and average number of children, children living, and children not living, this information being presented in detail for each city and town in the State. The information covering these facts for married women having children, as regards the whole State, is shown in the following table:

Native and Foreign Born.	Married Women having Children						
	Number of Women	Total Number of—			Average Number of—		
		Children	Children living	Children not living	Children	Children living	Children not living
The State.	387,645	1,594,047	1,097,920	496,127	4.11	2.83	1.28
Native born, . .	232,704	784,499	560,890	223,609	3.37	2.41	0.96
Foreign born, . .	154,941	809,548	537,030	272,518	5.22	3.46	1.76

The total number of married women having children is, for the State, 387,645 and this number of women have had 1,594,047 children, or an average of 4.11 children to each mother. Of this number of children 1,097,920 are living and 496,127 are not living, the average number of children living to each mother being 2.83 and the average number not living 1.28. For the native born mothers, of whom there are 232,704, the results show that they have had 784,499 children, of whom 560,890 are living and 223,609 are not living. The average number of children to each native born mother is 3.37, of whom, on the average, 2.41 are living and 0.96 are not living. For the foreign born mothers, also, it is seen that they number 154,941 and have had 809,548 children, 537,030 of whom are living and 272,518 are not living. Reduced to averages, each foreign born mother has had 5.22 children, 3.46 of whom are living and 1.76 not living. From the recapitulation by percentages on page 1170, it is seen that 60.03 per cent of the married women having children are native born and 39.97 per cent are foreign born. Of the total number of children 49.21 per cent are the children of native born mothers and 50.79 per cent are the children of foreign born mothers; 51.09 per cent of all the children living are the children of native born mothers and 48.91 per cent are the children of foreign born mothers, while of the children *not* living 45.07 per cent were the children of native born mothers and 54.93 per cent were the children of foreign born mothers. Expressing in numbers the results for the native born mothers as compared with the results for foreign born mothers, we find that there is an excess of 77,763 native born mothers over the foreign born mothers; that the native born mothers, however, have had 25,049 fewer children than the foreign born mothers but have 23,860 more children living and 48,909 fewer children not living.

The comparative percentages of children living and children not living are shown for native and foreign born mothers, as follows:

Nativity of Mothers.	Percentages of — Children living	Percentages of — Children not living
Native born mothers,	71.50	28.50
Foreign born mothers,	66.34	33.66
All mothers,	68.88	31.12

The percentages shown in this table are entirely indicative of the general results arrived at through the Census as to the comparative growth of the native and foreign born population. These percentages show that, while 68.88 per cent of the children of all the mothers are living and 31.12 per cent are not living, 71.50 per cent of the children of native born mothers are living and 28.50 per cent are not living, and of the children of foreign born mothers that 66.34 per cent are living and 33.66 per cent are not living, or a difference in favor of native born mothers of 5.16 per cent.

The number of native and foreign born mothers of specified ages having certain numbers of children, with the number of these children living, is presented in complete detail on pages 1174–1183, by number and percentages, and is followed on pages 1184 and 1185 by a table of percentages of native and foreign born mothers having specified numbers of children and children living. From this table it is possible to derive a table which will show briefly the percentages of native and foreign born mothers for each specified number of children. This table is as follows:

Specified Number of Children.	Percentages of— Native Mothers	Percentages of— Foreign Mothers
The State.	60.03	39.97
1 child,	73.40	26.60
2 children,	73.28	26.72
3 children,	69.33	30.67
4 children,	62.86	37.14
5 children,	54.83	45.17
6 children,	47.43	52.57
7 children,	40.27	59.73
8 children,	35.71	64.29
9 children,	31.82	68.18
10 children,	28.45	71.55
11 children,	26.14	73.86
12 children,	23.88	76.12
13 children,	22.08	77.92
14 children,	19.39	80.61
15 children,	19.45	80.55
16 children,	17.95	82.05
17 children,	17.19	82.81
18 children,	19.48	80.52
19 children,	14.29	85.71
20 children,	21.43	78.57
21 children,	40.00	60.00
22 children,	20.00	80.00
23 children,	50.00	50.00
24 children,	50.00	50.00
25 children,	50.00	50.00
26 children,	66.67	33.33
27 children,	100.00	-

The large percentages of native mothers having one to four children, as shown in this table, are particularly noticeable, as well as the constantly decreasing percentage of native mothers having the larger numbers of children and the corresponding increase in the percentages for foreign mothers. Of the mothers who have had one child, 73.40 per cent are native mothers and 26.60 per cent are foreign mothers. The mothers who have had two children, also, show a similar distribution, 73.28 per cent being native mothers and 26.72 per cent foreign mothers. Of the mothers who have had three children 69.33 per cent are native mothers and of the mothers who have had four children 62.86 per cent are native mothers. Of the mothers who have had five and six children, respectively, there is a more even distribution, 54.83 per cent of the mothers of five children being native mothers and 45.17 per cent foreign mothers, whereas of the mothers of six children 47.43 per cent are native mothers and 52.57 per cent foreign mothers. Beginning with mothers having seven children, the percentages of foreign mothers show a steady increase until the percentages for mothers of nineteen children are reached, the percentage of foreign mothers for this number of children being 85.71.

The relative percentages of children living and not living for native and foreign mothers by specified numbers of children are as follows:

SPECIFIED NUMBER OF CHILDREN.	NATIVE MOTHERS		FOREIGN MOTHERS		TOTAL MOTHERS	
	Percentages of—		Percentages of—		Percentages of—	
	Children living	Children not living	Children living	Children not living	Children living	Children not living
THE STATE.	71.50	28.50	66.34	33.66	68.88	31.12

27 children, ...	18.52	81.48	–	–	18.52	81.48

Considered as regards specified numbers of children in detail, the relative percentages of children living for native and foreign born mothers do not show materially different results, there being a variation one way or the other of but about one per cent or even less in the percentages for mothers of from one to fourteen children. For the larger numbers of children, however, that is, fifteen children and over, the variations are much more marked, these numbers of children being, of course, unusual and not common to many mothers, and especially native born mothers.

Many other valuable points are contained in the tables showing the distribution by averages and percentages for specified numbers of children and children living, but cannot be considered in an analysis limited to general results only. We next present a table which gives the percentages of children living and children not living, by place of birth of mothers. This table is drawn from a summary on page 1199, showing the total number, average number, and percentages of children living and children not living, by place of birth of mothers, being preceded on pages 1190–1199 by a table giving the place of birth and parent nativity of mothers by age periods, in detail.

PLACE OF BIRTH OF MARRIED WOMEN HAVING CHILDREN.	PERCENTAGES OF —	
	Children living	Children not living
THE STATE.	68.88	31.12
Native Born.	71.50	28.50
Massachusetts,	71.92	28.08
New England States, Other	70.63	29.37
Other States,	70.77	29.23
Foreign Born.	66.34	33.66
Ireland,	64.35	35.65
Canada (English),	72.93	27.07
Canada (French),	69.04	30.96
Great Britain,	65.69	34.31
British Possessions,	71.47	28.53
Germany,	70.38	29.62
Other Countries,	71.27	28.73

The native born mothers as a class have 71.50 per cent of their children living, the Massachusetts mothers 71.92 per cent, the mothers born in the other New England States 70.63 per cent, and the mothers born in other States 70.77 per cent. The foreign born mothers as a class have 66.34 per cent of their children living, the mothers born in Ireland 64.35 per cent, those born in Great Britain 65.69 per cent, those born in Canada of English parentage 72.93 per cent, those born in British Possessions 71.47 per cent, and those born in Germany 70.38 per cent.

The table on pages 1200–1207 gives the parent nativity of mothers for each place of birth, together with the total number of children living and not living, and is succeeded by a table on pages 1208 and 1209 which presents these results by the parentage of the mothers. From the "aggregate" results shown for all mothers, without regard to place of birth, we derive the following table of percentages:

PARENTAGE OF MOTHERS.	PERCENTAGES OF —	
	Children living	Children not living
All Mothers.	68.88	31.12
Massachusetts parentage,	70.70	29.30
Other New England States parentage,	71.29	28.71
Other States parentage,	68.61	31.39
Other native parentage,	73.27	26.73
Ireland parentage,	65.53	34.47
Canada (English) parentage,	73.69	26.31
Canada (French) parentage,	69.28	30.72
Great Britain parentage,	67.01	32.99
British Possessions parentage,	73.26	26.74
Germany parentage,	71.34	28.66
Other Countries parentage,	71.69	28.31
Other foreign parentage,	70.86	29.14
Mixed parentage,	72.27	27.73
Unknown parentage,	69.45	30.55

By "Massachusetts parentage," as used in this table, is meant that the parentage of the mothers represented by this designation is purely Massachusetts, that is, both parents were so born; by "other New England parentage," that both parents were born in the other New England States; by "other native parentage," that both parents are native born, but were not both born in Massachusetts, other New England States, or other States; by "Ireland parentage," that both parents were born in Ireland; by "mixed parentage," that one parent is native born and one parent foreign born, and by "unknown parentage," that the place of birth of one or both parents is unknown. Comparing results on this basis, we find that mothers of purely Massachusetts parentage have 70.70 per cent of their children living as against 71.50 per cent for native born mothers as a class. The mothers of Ireland parentage have 65.53 per cent of their children living, those of Canada (English) parentage 73.69 per cent, those of Canada (French) parentage 69.28 per cent, those of Great Britain parentage 67.01 per cent, those of British Possessions parentage 73.26 per cent, and those of Germany parentage 71.34 per cent.

Of the 387,645 mothers, 188,793 have both parents native born and 182,083 have both parents foreign born, the balance having either mixed or unknown parentage.

The distribution by percentages of the native and foreign mothers, according to parent nativity, is shown as follows:

PARENT NATIVITY OF MOTHERS.	PERCENTAGES OF MOTHERS	
	Native Born	Foreign Born
THE STATE.	60.03	39.97
Both parents, *n*,	99.67	0.33
Father, *n*, mother, *f*,	86.69	13.31
Father, *n*, mother, *unk*,	99.32	0.68
Father, *f*, mother, *n*,	91.73	8.27
Both parents, *f*,	16.02	83.98
Father, *f*, mother, *unk*,	64.29	35.71
Father, *unk*, mother, *n*,	99.43	0.57
Father, *unk*, mother, *f*,	64.34	35.66
Both parents, *unk*,	92.17	7.83

In this table, italic designations are used as follows: — *n*, for native born; *f*, for foreign born, and *unk*, for unknown. From this table it is seen that 99.67 per cent of the mothers having both parents native born are native mothers, while of those having both parents foreign born 16.02 per cent are native mothers and 83.98 per cent are foreign mothers.

The total number of children, children living, and children not living, with percentages of children living and not living, by parent nativity of mothers, is presented as follows:

Parent Nativity of Mothers.	Total Mothers	Total Number of —			Percentages of —	
		Children	Children living	Children not living	Children living	Children not living
The State.	387,645	1,594,047	1,097,920	496,127	68.88	31.12
Both parents, *n*,	188,793	636,993	453,136	183,857	71.14	28.86
Father, *n*, mother, *f*,	3,486	10,618	7,893	2,725	74.34	25.66
Father, *n*, mother, *unk*,	1,316	4,574	3,271	1,303	71.51	28.49
Father, *f*, mother, *n*,	5,695	19,481	13,859	5,622	71.14	28.86
Both parents, *f*,	182,083	900,044	604,342	295,702	67.15	32.85
Father, *f*, mother, *unk*,	182	642	492	150	76.64	23.36
Father, *unk*, mother, *n*,	1,568	5,760	3,936	1,824	68.33	31.67
Father, *unk*, mother, *f*,	143	545	385	160	70.64	29.36
Both parents, *unk*,	4,379	15,390	10,606	4,784	68.92	31.08

The general result as to the number of children living for native and foreign mothers has already been shown, the percentages of children living being 71.50 for native mothers and 66.34 for foreign mothers. For the mothers having purely native parentage, it is seen from this table that 71.14 per cent of their children are living, and for the mothers having purely foreign parentage that 67.15 per cent of their children are living. Considered on broad grounds, then, it appears that the mothers having purely native parentage have relatively a slightly increased proportion of their children living than the mothers having purely foreign parentage. There may be and undoubtedly are limitations and exceptions in special cases to the general results as shown, but considered on the premises outlined the conclusion is as stated.

Prisoners and Convicts (page 1213). The results concerning these two classes of persons are presented in detail by towns separately, but under the same general classification. Prisoners, in the Census of 1885, include those persons who on May 1, 1885, were awaiting trial for an alleged offence, who were held as witnesses, or who were serving out fines, while convicts include those persons who on May 1, 1885, had been tried, convicted, and sentenced to imprisonment for a specified term or to suffer the death penalty. In the Census of 1875 this distinction was not observed and both prisoners and convicts were returned as "convicts." The printed results for this class of persons in the Census of 1875 was supplemented by a more detailed consideration concerning them in the report of the Bureau for 1877, and in making comparisons with the returns for that Census use will be made of the results as printed in both the Census and Bureau reports. It is the intention to make in a future report of the Bureau a detailed analysis of the returns for prisoners and convicts as regards the nature of alleged offence or crime, length of sentence, residence when at home, and other features requiring text explanation in connection with the tabular presentation of this information. In this analysis, therefore, we present the general results only for those points included in this Part. For convenience, the results for prisoners and convicts are considered together.

The whole number of prisoners and convicts returned in 1885 is as follows:

Classification.	Males	Females	Both Sexes
Prisoners.	558	107	665
Number able-bodied,	552	97	649
Number defective,	6	10	16
Convicts.	2,836	590	3,426
Number able-bodied,	2,775	550	3,325
Number defective,	61	40	101

As shown by this table, there are 665 prisoners, 558 males and 107 females, and 3,426 convicts, 2,836 males and 590 females, returned in the Census of 1885. The number of convicts returned in 1875 was 4,340, of which 3,578 were males and 762 were females. Of the prisoners and convicts in 1885, but 16 prisoners and 101 convicts are returned as being defective, that is, having some defective physical condition, the greater part of them being, as is seen, able-bodied. A special consideration of those having defective physical conditions is made under "PHYSICAL CONDITION."

The presentation of prisoners and convicts by towns is one of convenience only, the locating of the penal and correctional institutions in a few cities and towns making the town showing of little actual value beyond convenience in presentation. The following statement recapitulates the results, for the State, which are presented by towns:

Classification.	Prisoners			Convicts		
	Males	Females	Both Sexes	Males	Females	Both Sexes
Residence.	558	107	665	2,836	590	3,426
Town named,	369	63	432	929	201	1,130
Other towns, etc.,	189	44	233	1,907	389	2,296
Native and Foreign Born.	558	107	665	2,836	590	3,426
Native born,	339	56	395	1,895	268	2,163
Foreign born,	219	51	270	941	322	1,263
Conjugal Condition.	558	107	665	2,836	590	3,426
Single,	337	52	389	1,921	260	2,181
Married, etc.,	221	55	276	915	330	1,245
Number of Illiterates.	76	32	108	252	198	450
Native born,	19	9	28	82	55	137
Foreign born,	57	23	80	170	143	313

The residence when at home for 432 prisoners and 1,130 convicts is said to be in town named, that is, they claim a residence in the town in which the institution where confined is located, while the residence of 233 prisoners and 2,296 convicts is given as "other towns, etc.," that is, in other towns in the State, in other States, or in foreign countries. Briefly stated, very nearly two-thirds of all the prisoners and about one-third of all the convicts claim a residence when at home in the town where confined.

Considered as regards native and foreign born, it is seen that of the prisoners 395, or 59.40 per cent, are native born and 270, or 40.60 per cent, are foreign born, while of the convicts 2,163, or 63.13 per cent, are native born and 1,263, or 36.87 per cent, are foreign born. Analyzed as regards sex we find that 60.75 per cent of all the male prisoners are native born and that 66.82 per cent of all the male convicts are native born, while for females we find that 52.34 per cent of all the female prisoners are native born and that 45.42 per cent of all the female convicts are native born. In 1875 there were 57.21 per cent of all the convicts who were native born. Of the native born prisoners in 1885 those born in Massachusetts number 259, those born in Maine 35, those born in New Hampshire 17, and those born in New York 25, the remaining 59 being born in other parts of the United States, as stated in the table on page 1220. Of the foreign born prisoners, 161 were born in Ireland, 32 in England, and 24 in Nova Scotia. Indicating the principal places of birth of the convicts, in the same way, we find from the table on page 1225, for the native born convicts, that 1,467 were born in Massachusetts, 46 in Connecticut, 127 in Maine, 74 in New Hampshire, 155 in New York, 59 in Rhode Island, and 54 in Vermont. For the foreign born convicts, we find that 703 were born in Ireland, 171 in England, 62 in Canada of English parentage, 49 in Canada of French parentage, 53 in New Brunswick, 55 in Nova Scotia, and 45 in Scotland.

The conjugal condition of 389 prisoners and 2,181 convicts is given as single and of 276 prisoners and 1,245 convicts as "married, etc.," that is, either married, widowed, or divorced.

There are 108 prisoners who are illiterate, of which 28 are native born and 80 foreign born. Considering these figures as regards the whole number of prisoners, we find that, as a whole, 16.24 per cent of the prisoners are illiterate, the native born illiterates representing 7.09 per cent of the native born prisoners and the foreign born illiterates 29.63 per cent of the foreign born prisoners. Analyzing the illiteracy among the convicts, we find that 450 are returned as being illiterate, 137 being native and 313 foreign born. The illiterate convicts constitute 13.13 per cent of all the convicts, the native born illiterates 6.33 per cent of the native born convicts, and the foreign born illiterates 24.78 per cent of the foreign born convicts. In 1875, 6.81 per cent of the native born convicts were illiterate and 15.89 per cent of the foreign born convicts.

The distribution of the prisoners and convicts in 1885 by age periods is shown in the following table:

Age Periods.	Prisoners			Convicts		
	Males	Females	Both Sexes	Males	Females	Both Sexes
The State.	558	107	665	2,836	590	3,426
14 to 19 years, ...	50	14	64	294	65	359
20 to 29 years, ...	211	38	249	1,177	218	1,395
30 to 39 years, ...	140	29	169	664	165	829
40 to 49 years, ...	98	18	116	434	92	526
50 to 59 years, ...	44	5	49	175	31	206
60 to 69 years, ...	14	2	16	65	15	80
70 to 79 years, ...	–	1	1	19	2	21
80 years and over, . . .	–	–	–	5	2	7
Age unknown, ...	1	–	1	3	–	3

As seen by this table, 64, or 9.62 per cent, of the prisoners are under 20 years of age and 249, or 37.44 per cent, from 20 to 29 years of age, while of the convicts 359, or 10.48 per cent, are under 20 years of age and 1,395, or 40.72 per cent, are from 20 to 29 years of age.

The following table shows the general distribution by parent nativity for both prisoners and convicts, the italic abbreviations used to denote parent nativity being as follows: — *n*, for native born; *f*, for foreign born, and *unk*, for unknown.

Parent Nativity.	Prisoners			Convicts		
	Males	Females	Both Sexes	Males	Females	Both Sexes
The State.	558	107	665	2,836	590	3,426
Both parents, *n*, . . .	85	28	113	579	96	675
Father, *n*, mother, *f*, . .	12	–	12	39	6	45
Father, *n*, mother, *unk*, . .	–	–	–	10	1	11
Father, *f*, mother, *n*, . .	8	–	8	48	8	56
Both parents, *f*, . . .	335	66	401	1,322	430	1,752
Father, *f*, mother, *unk*, . .	1	–	1	4	–	4
Father, *unk*, mother, *n*, . .	2	–	2	17	–	17
Father, *unk*, mother, *f*, . .	–	–	–	3	–	3
Both parents, *unk*, . . .	115	13	128	814	49	863

Of the whole number of prisoners, 113, or 16.99 per cent, have both parents native born, 401, or 60.30 per cent, have both parents foreign born, while for 128 prisoners the parent nativity is returned as unknown, these representing 19.25 per cent of all the prisoners. Taking the convicts in the same way, we find that 675, or 19.70 per cent, have both parents native born, 1,752, or 51.14 per cent, have both parents foreign born, and for 863, or 25.19 per cent, the parent nativity is unknown.

The details for prisoners and convicts as regards ages, place of birth, and parent nativity are given in a series of tables following the town presentations.

HOMELESS CHILDREN AND PAUPERS (page 1229). In the Census of 1885, for the first time in Massachusetts, a distinction is made in the classification of paupers between those persons who by disease, intemperance, misfortune, lack of thrift, or disinclination to labor, become dependent upon public beneficence and those persons not of adult age (under 21) who are dependent upon public or private beneficence from no fault of their own. This latter class of persons have not yet had an opportunity to support themselves and it is misleading and unjust to class them with those who have tried and have failed, or those who have no inclination, to support themselves. For these reasons the Census of 1885 recognizes two classes of persons, one called homeless children and the other paupers, which in previous Censuses have been classed together as paupers, with nothing but the age classification to distinguish them. The definition of homeless children and paupers, considered on this basis, is given in detail in the explanatory text on page 1231, which also covers other information of value in the consideration of the tables.

The whole number of homeless children, May 1, 1885, as returned in the Census, was 5,232 and the whole number of paupers was 8,394. The number who are able-bodied and the number who are defective, that is, have some defective physical condition, is shown for both homeless children and paupers, as follows:

CLASSIFICATION.	Males	Females	Both Sexes
Homeless Children.	3,005	2,227	5,232
Number able-bodied,	2,704	2,001	4,705
Number defective,	301	226	527
Paupers.	4,129	4,265	8,394
Number able-bodied,	1,108	1,282	2,390
Number defective,	3,021	2,983	6,004

From this table, also, we may determine the sex of homeless children and paupers. Of the homeless children 3,005 are males and 2,227 are females, while of the paupers 4,129 are males and 4,265 are females. The number of paupers returned in 1875 was 4,342, these figures representing, however, only those receiving *full* support on the census day, May 1, 1875; of the number so returned 2,388 were males and 1,954 were females. In the Census of 1885, paupers include all persons twenty-one years of age and over who were partially or wholly supported by public charity, May 1, 1885, so far as ascertained, although it is not assumed that the number of paupers returned in 1885 represents the whole number of persons relieved at public expense.

The number of able-bodied homeless children is given as 4,705 and the number defective 527. For paupers, on the other hand, 2,390 only are able-bodied, while 6,004 have some defective physical condition. The detailed consideration of the defective homeless children and paupers is presented under "PHYSICAL CONDITION."

From the subjoined table we may determine for homeless children and paupers, respectively, the results as regards residence, nativity, conjugal condition, and illiteracy.

CLASSIFICATION.	HOMELESS CHILDREN			PAUPERS		
	Males	Females	Both Sexes	Males	Females	Both Sexes
Residence.	3,005	2,227	5,232	4,129	4,265	8,394
Town named, ...	1,589	1,134	2,723	2,211	2,323	4,534
Other towns, etc., . . .	1,416	1,093	2,509	1,918	1,942	3,860
Native and Foreign Born.	3,005	2,227	5,232	4,129	4,265	8,394
Native born, ...	2,800	2,079	4,879	2,575	2,123	4,698
Foreign born, ...	205	148	353	1,554	2,142	3,696
Conjugal Condition.	3,005	2,227	5,232	4,129	4,265	8,394
Single, ...	3,005	2,219	5,224	2,121	1,800	3,921
Married, etc., ...	–	8	8	2,008	2,465	4,473
Number of Illiterates.	178	107	285	962	1,580	2,542
Native born, ...	162	93	255	412	429	841
Foreign born, ...	16	14	30	550	1,151	1,701

Considered as regards residence, we find that 2,723 homeless children and 4,534 paupers, or more than one-half in each case, claim a residence in the town in which they are returned (town named), the number whose residence is in other towns, etc., meaning other towns in the State, other States, or foreign countries, being 2,509 for homeless children and 3,860 for paupers.

Comparing native and foreign born, it is seen that of the homeless children 4,879, or 93.25 per cent, are native born and 353, or 6.75 per cent, are foreign born, while for paupers there are 4,698, or 55.97 per cent, who are native born and 3,696, or 44.03 per cent, who are foreign born. Considered as regards principal places of birth in detail, we find for homeless children that 4,134 were born in Massachusetts, 249 in the other New England States, 496 in other parts of the United States, 112 in Ireland, and 61 in England. For paupers, we find that 3,714 were born in Massachusetts, 81 in Connecticut, 227 in Maine, 166 in New Hampshire, 108 in New York, 73 in Rhode Island, 95 in Vermont, 2,829 in Ireland, 270 in England, and 120 in Germany. The homeless children in 1885 who were born in Massachusetts constitute 79.01 per cent of all the homeless children, and the paupers in 1885 who were born in Massachusetts constitute 44.25 per cent of all the paupers. In 1875 the native born paupers constituted 70.54 per cent of all the paupers, and those born in the State 61.54 per cent.

The conjugal condition of homeless children is practically single, with the exception of eight females who are married. In the case of paupers 3,921 are single and 4,473 are returned as married, etc., that is, either married, widowed, or divorced.

Of the whole number of homeless children in the State, 285 are returned as being illiterate, of which 255 are native born and 30 foreign born. Eliminating from the whole number of homeless children those under 10 years of age, we find that 10.54 per cent of the homeless children 10 years of age and over are illiterate, being mostly native born. The illiterate paupers number 2,542, of which 841 are native born and 1,701 are foreign born. Of the whole number of paupers the illiterates constitute 30.28 per cent, the native born illiterates of this class representing 17.90 per cent of the native born paupers and the foreign born illiterates 46.02 per cent of the foreign born paupers. The native born illiterate paupers in 1875 were estimated to be 30 + per cent of all the native born paupers above 10 years of age and the foreign born illiterate paupers 59 + per cent of all the foreign born paupers above 10 years of age.

The classification by age periods of the homeless children returned in 1885 is shown in the following table:

AGE PERIODS.	Males	Females	Both Sexes
THE STATE.	3,005	2,227	5,232
Under 1 year,	99	117	216
1 to 4 years,	342	286	628
5 to 9 years,	899	784	1,683
10 to 13 years,	989	607	1,596
14 to 19 years,	636	383	1,019
20 years,	30	31	61
Age unknown,	10	19	29

The distribution by years in detail is given on page 1244. Of those under 1 year of age there are 216, and of those 1 to 4 years of age 628.

The age period classification for paupers in 1885 is as follows:

AGE PERIODS.	Males	Females	Both Sexes
THE STATE.	4,129	4,265	8,394
21 to 29 years,	513	468	981
30 to 39 years,	684	758	1,442
40 to 49 years,	738	840	1,578
50 to 59 years,	644	693	1,337
60 to 69 years,	659	652	1,311
70 to 79 years,	611	535	1,146
80 years and over,	262	308	570
Age unknown,	18	11	29

From this table it is seen that there are 981 paupers from 21 to 29 years of age and 570 who are 80 years of age and over. The greatest age returned for paupers is 106 years, for which there is one female. There are, also, two females 100 years of age, one male and one female 103 years of age, one female 104 years of age, and one female 105 years of age. The detailed showing by years is given on page 1264.

The parent nativity of homeless children and paupers is shown, in brief form, in the following table. In this table, parent nativity is denoted by the use of italic abbreviations, as follows: — *n*, for native born; *f*, for foreign born, and *unk*, for unknown.

PARENT NATIVITY.	HOMELESS CHILDREN			PAUPERS		
	Males	Females	Both Sexes	Males	Females	Both Sexes
THE STATE.	3,005	2,227	5,232	4,129	4,265	8,394
Both parents, *n*,	640	492	1,132	1,201	1,001	2,202
Father, *n*, mother, *f*,	107	62	169	15	16	31
Father, *n*, mother, *unk*,	43	37	80	60	39	99
Father, *f*, mother, *n*,	95	81	176	13	26	39
Both parents, *f*,	936	701	1,637	1,297	1,704	3,001
Father, *f*, mother, *unk*,	22	15	37	7	1	8
Father, *unk*, mother, *n*,	83	77	160	32	38	70
Father, *unk*, mother, *f*,	50	47	97	–	2	2
Both parents, *unk*,	1,029	715	1,744	1,504	1,438	2,942

Considering these results, we find that 1,132, or 21.64 per cent of all the homeless children, have both parents native born, 1,637, or 31.29 per cent, both parents foreign born, and for 1,744, or 33.33 per cent, the parent nativity is unknown. Of the paupers, 2,202, or 26.23 per cent, have both parents native born, 3,001, or 35.75 per cent, have both parents foreign born, and for 2,942, or 35.05 per cent, the parent nativity is unknown.

The various habitations of the homeless children are classified as follows:

CLASSIFICATION OF RESIDENCE.	Males	Females	Both Sexes
THE STATE.	3,005	2,227	5,232
City and town almshouses,	478	347	825
City institutions,	645	135	780
State institutions,	482	228	710
Private families,	508	479	987
Private institutions,	892	1,038	1,930

A description of the various institutions included under these designations is given in the explanatory text on page 1231. The following table states the means of support of homeless children, irrespective of their residence as just shown.

Means of Support.	Males	Females	Both Sexes
The State.	3,005	2,227	5,232
Public charity,	1,792	868	2,660
Partially public charity,	104	65	169
Private charity,	754	970	1,724
Partially private charity,	158	72	230
Public and private charity,	37	42	79
Supported by parents,	91	127	218
Supported by relatives,	9	13	22
Self-supporting,	45	33	78
Support not given,	15	37	52

Analyzing this table, it is seen that about one-half of the homeless children, or 2,660, are wholly supported by public charity, 169 also being partially supported by public charity. Those supported wholly by private charity number 1,724 and those partially by private charity number 230. There are 218 who are returned as being supported by parents, 22 by relatives, and 78 are self-supporting.

The distribution of homeless children in private families according to the number returned as living with parents, relatives, or having no relationship other than that of inmate, is as follows:

Residence and Means of Support.	Males				Females				Both Sexes			
	With Parents	With Relatives	No Relationship	Total	With Parents	With Relatives	No Relationship	Total	With Parents	With Relatives	No Relationship	Total
Private Families.	69	34	405	508	74	40	365	479	143	74	770	987
Public charity,	13	6	173	192	25	6	129	160	38	12	302	352
Partially public charity,	53	12	34	99	32	10	21	63	85	22	55	162
Private charity,	2	10	131	143	16	19	157	192	18	29	288	335
Partially private charity,	–	–	4	4	–	–	–	–	–	–	4	4
Public and private charity,	–	–	1	1	–	1	1	2	–	1	2	3
Supported by parents,	1	1	9	11	–	2	8	10	1	3	17	21
Supported by relatives,	–	3	1	4	–	–	1	1	–	3	2	5
Self-supporting,	–	1	40	41	1	–	30	31	1	1	70	72
Support not given,	–	1	12	13	–	2	18	20	–	3	30	33

Of the 987 homeless children in private families 143 are with parents and 74 with relatives, the support of all but 20 of those with parents being wholly or partially by public charity.

The paupers are found both in institutions and private families, and are supported by public or partially public charity. The number receiving each of these means of support is shown as follows:

MEANS OF SUPPORT.	Males	Females	Both Sexes
THE STATE.	4,129	4,265	8,394
Public charity,	3,721	3,872	7,593
Partially public charity,	408	393	801

A very large part of all the paupers returned in the Census of 1885 receive full public support, the number being 7,593 as against 801 who are partially supported by public charity.

A more detailed consideration of the subject of homeless children and paupers will be made in a future report of the Bureau, involving many features not comprehended by the Census reports.

PHYSICAL CONDITION (page 1269). Under this general head is presented the information contained in the Census reports relating to the blind, deaf, dumb, deaf and dumb, insane, idiotic, maimed, lame, bedridden, paralytic, and deformed. The facts called for in the Census were enumerated by means of a special schedule devoted to these persons, and great care has been taken in the preparation of the results obtained concerning them, so far as made use of in the Census report. An attempt was made in this Census, also, to secure an approximation, if nothing more, to the number of persons in the Commonwealth suffering with acute and chronic diseases, and the results for this class of complaints are considered in connection with the general subject of physical condition. The inquiries made in the Census concerning all persons having defective physical conditions were carefully drawn and much valuable information was obtained. The nature of this information is such, however, as to preclude an exhaustive and critical presentation and analysis in a volume of this character, requiring, as it does, text explanation and analytical treatment in conjunction with the tabular presentations devoted to this subject. For this reason, the results contained in this Part are simple statements only, comprehending number, sex, conjugal condition, native and foreign born, etc., as shown in the tables. The more systematic treatment of the data collected, involving expert knowledge as to form of disease or nature of defect, cause, length of time afflicted, and other collateral information, will be made a part of a future report of the Bureau, where limitations as to space or time in its preparation and proper presentation need not be considered necessarily, as would be the case if undertaken at this time. The information contained in the Census, however, is complete in its way and, as showing the general condition of these classes of people, most satisfactory.

Two towns, namely, Gosnold, in the county of Dukes, and Monroe, in the county of Franklin, make no return of persons having defective physical conditions.

The explanatory text on page 1271 relating to the tabular presentations for "Physical Condition" should be carefully read, as affording information needed in the proper understanding of the subject under consideration.

The whole number of persons in the State, May 1, 1885, having defective physical conditions was 39,213, of which 21,794 are males and 17,419 are females. The following summary, for the State, presents a classification of these persons, according as they are prisoners, convicts, homeless children, paupers, or other persons, having defective physical conditions.

Classification of Persons.	Males	Females	Both Sexes
The State.	21,794	17,419	39,213
Prisoners,	6	10	16
Convicts,	61	40	101
Homeless children,	301	226	527
Paupers,	3,021	2,983	6,004
Other persons,	18,405	14,160	32,565

From this table, we find, then, that this total of 39,213 persons comprises 16 prisoners, 101 convicts, 527 homeless children, 6,004 paupers, and 32,565 other persons. Turning to the classification of defective physical conditions in detail (page 1282), we find, for instance, that of the 16 prisoners, 3 have acute diseases and 10 have chronic diseases, while 1 is maimed and 2 are lame. Of the 101 convicts, 4 have acute diseases and 55 chronic diseases, 9 are blind, 1 dumb, 2 insane, 14 maimed, 12 lame, and 4 paralytic. Of the 527 homeless children, 12 have acute diseases only, 55 chronic diseases only, and 8 have chronic diseases in combination with other conditions. There are, also, for homeless children 31 who are blind only, 15 deaf only, 10 dumb and idiotic only, 75 deaf and dumb only, 57 insane only, 164 idiotic only, 10 maimed only, 48 lame only, 13 paralytic only, and 8 deformed only.

The paupers who have defective physical conditions number 6,004 and constitute 71.53 per cent of all the paupers returned in the Census. Of these 6,004 paupers, 36 have acute diseases only, 2 acute diseases and other defective conditions, 860 chronic diseases only, 42 chronic diseases and are also insane, 224 are blind only, 41 deaf only, 5 dumb only, 19 deaf and dumb only, 3,639 insane only, 369 idiotic only, 80 maimed only, 233 lame only, 30 bedridden only, 182 paralytic only, and 24 deformed only, the remainder having a combination of two or more of these conditions, as shown in the table.

In a similar way, it is seen that of the 32,565 other persons in the State having defective physical conditions, 1,097 have acute diseases only and 12,379 chronic diseases only, while 2,887 are blind only, 2,510 deaf only, 69 dumb only, 698 deaf and dumb only, 1,360 insane only, 921 idiotic only, 2,120 maimed only, 4,404 lame only, 135 bedridden only, 1,895 paralytic only, and 566 deformed only.

The aggregates for each of these various conditions, singly and in combination, are also given in the table and represent a detailed classification of the defective physical conditions returned for the entire 39,213 persons considered, without regard to whether they are prisoners, convicts, homeless children, paupers, or other persons, the number having the principal defective physical conditions for each of these classes having been already referred to in detail in this analysis. As explained on page 1271, the first table gives the *number* of persons having defective physical conditions, whereas the second presentation showing defective physical conditions, by towns, presents the number having the specified condition, as acute diseases, as opposed to those having chronic diseases, or are blind, deaf, insane, etc. In this second presentation, some of the persons presented under "Acute Diseases" are also included under "Chronic Diseases" or are numbered, also, with the "Blind" or "Deaf," as the case may be, according as they are returned as having acute or chronic diseases, or both, and are also blind, deaf, etc. The totals given in the second presentation may be said to be *condition* totals as distinguished from the *true* totals of persons having defective conditions, as shown in the first table. Considering the results as regards *conditions*, then, as shown in the second table beginning on page 1288, and making use of the detailed classification of *persons*, under "AGGREGATES," on pages 1285–1287, we can present an analysis table which will show for each condition the number of persons so affected and what proportionate part have in addition to the condition named some other defective condition or conditions. This table follows:

DEFECTIVE PHYSICAL CONDITIONS.	Males	Females	Both Sexes
Acute Diseases.	575	609	1,184
Acute diseases only, ...	555	597	1,152
Acute diseases and otherwise defective, . . .	20	12	32
Chronic Diseases.	7,519	6,845	14,364
Chronic diseases only, ...	6,925	6,434	13,359
Chronic diseases and otherwise defective, . . .	594	411	1,005
Blind.	2,086	1,496	3,582
Blind only, ...	1,834	1,317	3,151
Blind and otherwise defective, ...	252	179	431
Deaf.	1,255	1,718	2,973
Deaf only, ...	1,043	1,523	2,566
Deaf and otherwise defective, ...	212	195	407
Dumb.	74	60	134
Dumb only, ...	43	33	76
Dumb and otherwise defective, ...	31	27	58

Defective Physical Conditions.	Males	Females	Both Sexes
Deaf and Dumb.	438	390	828
Deaf and dumb only,	423	369	792
Deaf and dumb and otherwise defective,	15	21	36
Insane.	2,344	2,919	5,263
Insane only,	2,237	2,821	5,058
Insane and otherwise defective,	107	98	205
Idiotic.	987	651	1,638
Idiotic only,	879	575	1,454
Idiotic and otherwise defective,	108	76	184
Maimed.	2,205	177	2,382
Maimed only,	2,067	158	2,225
Maimed and otherwise defective,	138	19	157
Lame.	3,454	1,682	5,136
Lame only,	3,156	1,543	4,699
Lame and otherwise defective,	298	139	437
Bedridden.	135	298	433
Bedridden only,	44	121	165
Bedridden and otherwise defective,	91	177	268
Paralytic.	1,437	1,103	2,540
Paralytic only,	1,188	906	2,094
Paralytic and otherwise defective,	249	197	446
Deformed.	399	281	680
Deformed only,	348	250	598
Deformed and otherwise defective,	51	31	82
Aggregates.	21,794	17,419	39,213
One condition only,	20,742	16,647	37,389
Two or more conditions,	1,052	772	1,824

As shown by this table, but a very small number of persons have more than one defective physical condition, or 1,824 only out of 39,213 persons. The number of persons having specified conditions only and of those who are also otherwise defective is presented in detail under each condition. Taking the figures by conditions, we find that there are 1,184 persons returned as having acute diseases, 32 of these persons being also defective in other respects, while 14,364 persons have chronic diseases, of whom 1,005 are otherwise defective. The blind in 1885 number 3,582, of whom 431 are otherwise defective; in 1875 there were 2,806 persons returned as blind. The number of deaf persons returned in 1885 is 2,973 as against 7,255 in 1875, the number in 1875 including probably many slightly hard of hearing only; of the number returned in 1885, 407 are otherwise defective. Of the dumb there are 134 returned in 1885 and 129 in 1875, a good part of those so returned in 1885 being otherwise defective. The deaf and dumb number 828 in 1885, mostly deaf and dumb only; in 1875 there were 654 returned for this condition. The insane returned in the Census of 1885 number 5,263, of whom 205 are otherwise defective, while the idiotic number 1,638 in 1885, of whom 184 have some other defective physical condition. In 1875 there were returned 3,637 insane and 1,326 idiotic. The maimed in 1885 number 2,382, mostly males, of whom 157 are otherwise defective; the lame 5,136, of whom 437 are otherwise defective; the bedridden 433, of whom 268 are otherwise defective; the paralytic 2,540, of whom 446 are otherwise defective, and the deformed 680, of whom 82 only are otherwise defective. In 1875 there was no return made concerning the number of maimed, lame, bedridden, paralytic, or deformed persons.

From the third presentation (page 1312), we bring forward the general results for each condition in detail, as follows:

CLASSIFICATION.	DEFECTIVE PHYSICAL CONDITIONS					
	Acute Diseases	Chronic Diseases	Blind	Deaf	Dumb	Deaf and Dumb
Total Persons.	1,184	14,364	3,582	2,973	134	828
Prisoners, ...	3	10	–	–	–	–
Convicts, ...	4	55	9	–	1	–
Homeless children, . . .	12	63	34	17	11	76
Paupers, ...	38	967	282	75	7	29
Other persons, ...	1,127	13,269	3,257	2,881	115	723
Institutions or Private Families.	1,184	14,364	3,582	2,973	134	828
Number in institutions, . .	243	1,212	422	66	21	128
Number in private families, .	941	13,152	3,160	2,907	113	700
Residence.	1,184	14,364	3,582	2,973	134	828
Town in which returned, . .	1,102	13,755	3,305	2,907	116	696

The results shown in this table, for each condition, as to the number of persons so affected located in institutions or in private families, their residence when at home, the number native or foreign born, the number single or married, etc., the number illiterate, and finally, their means of support, are so plainly set forth that an extended analysis does not seem necessary. In the consideration or use of the results above shown, it should be remembered that these are *condition* totals and not *true* totals of persons, as explained on page 1271. From the recapitulation to the fourth presentation (pages 1330 and 1331), we can derive a table showing similar results for persons having defective physical conditions, without regard to particular conditions, these results representing the true number of persons considered under "Physical Condition." The table follows :

Classification.	Prisoners	Convicts	Homeless Children	Paupers	Other Persons	Aggregates
Institutions or Private Families.	16	101	527	6,004	32,565	39,213
Number in institutions, . .	16	100	444	5,138	1,864	7,562

Self-supporting, ...	2	15	–	–	22,899	22,916
Support not given, . . .	–	12	2	–	373	387

An analysis of this table shows in the first place that 31,651 out of a total of 39,213 are in private families and 7,562 are in institutions, 5,138 of this number being defective paupers and 444 homeless children. The residence of 33,954 is given as being in the town from which returned, the larger part of these being, of course, other persons living at home and being, also, residents of the town where enumerated. Of the defective paupers 2,634 claim a residence in the town from which returned and 3,370 in other towns, etc., meaning in other towns in the State, in other States, or in foreign countries. Considered as regards native and foreign born, we find that 29,273 are native born and 9,940 are foreign born; of the native born 25,262 are other persons, 3,462 are paupers, and 480 are homeless children, the remainder being defective prisoners and convicts. The conjugal condition of 15,706 is returned as single and of 23,507 as married, etc., that is, either married, widowed, or divorced; of the single persons 3,104 are paupers, 525 homeless children, and 12,011 other persons. Of the whole number of defective persons, 5,455 are returned as illiterate, 2,208 being native born illiterates and 3,247 foreign born illiterates. About one-fourteenth of the native born are illiterate and very nearly one-third of the foreign born are illiterate. Of the native born illiterates 136 are homeless children, 649 are paupers, and 1,417 other persons, while for the foreign born illiterates 993 are paupers and 2,230 are other persons. Taking the means of support, it is seen that 22,916 are self-supporting, 22,899 of these being other persons. There are also 2,374 other persons supported by private charity, 812 partially by private charity, 3,406 are supported by parents, 2,701 by relatives, and for 373 the support is not given. The support of the paupers is either wholly or partially by public charity, 5,505 being supported wholly at public expense.

In the consideration of the maimed and lame it is a valuable point to know the causes of these conditions, particularly as regards the number who have become maimed or lame as the results of battle or exposure while in the service of the country in time of war. The causes for these two conditions are presented as follows:

Causes.	Maimed			Lame		
	Males	Females	Both Sexes	Males	Females	Both Sexes
The State.	2,205	177	2,382	3,454	1,682	5,136
Accident, ...	1,622	112	1,734	1,967	1,095	3,062
Accident and disease, . .	7	–	7	13	3	16
Battle, ...	423	–	423	586	–	586
Disease, ...	148	63	211	772	511	1,283
From birth, ...	–	1	1	69	49	118
Not given, ...	–	1	1	16	3	19
Unknown, ...	5	–	5	31	21	52

Of the maimed who are males, 423 were made so by battle, 148 by disease, 1,622 by accident, 7 by accident and disease, and for 5 the cause is unknown. For the maimed females 112 became so through accident, 63 by disease, 1 has been so from birth, and for 1 the cause was not given.

Of those who are returned as lame, 1,967 males became lame as the result of accident, 13 by accident and disease, 586 by battle, 772 by disease, 69 were lame from birth, while for 47 the cause is either not given or is unknown. Among the females who are lame, 1,095 were made so by accident, 511 by disease, and 49 have been lame since birth.

The presentations in detail concerning the several defective physical conditions afford most interesting data, the value of which in a more extended analysis could be easily demonstrated. It is sufficient for our purpose to have indicated the general results, and leave the more detailed consideration for other hands.

The tabular presentations contained in Parts 1 and 2 of Volume I. of the Census of 1885 have been prepared by Mr. William C. Hunt, the second clerk of the Bureau and chief of the Census division of results, and to the ability and experience which he has brought to the work of the Commonwealth in this direction is due, more than to anyone else, the complete presentations which have just been analyzed. Careful and painstaking in every respect, faithful in his devotion, working in season and out, he has enabled me to bring to public attention combinations and results of combinations not only novel in themselves but novel and valuable in the conclusions to be drawn from them. The whole work of the office has been under the general supervision of Mr. Charles F. Pidgin, the chief clerk, but the labor of this particular volume has fallen principally upon Mr. Hunt. The office has furthermore had the services of Miss Adelle M. Carter, who, as assistant to the chief of the division of results, has been charged especially with the verification of results and the proof-reading of the volume, and the execution and supervision of the more intricate and difficult tabular work in connection with the presentation of results. Her constant and unremitting attention to duty, not having been absent an hour during her connection with the Bureau since 1884, as well as her faithful and intelligent services, call for special commendation, and it is a pleasure to acknowledge my deep obligation to her in this respect, such obligation being second only to that which I am glad to acknowledge as due to Mr. Hunt.

CLASSIFIED OCCUPATIONS.

BY TOWNS.

CLASSIFIED OCCUPATIONS.

The classified showing of occupations presents by counties, cities, and towns, and for the State, a division of the people into 22 classes, which, for Census purposes, are considered as occupations. The division into classes is as follows:

GOVERNMENT. — Persons engaged in the service of the national, state, city, and town governments, and persons in the service of the United States army and navy.

PROFESSIONAL. — Persons connected with religion, law, medicine, literature, art, music, amusements, education, and science.

DOMESTIC SERVICE. — Persons engaged in hotel, boarding, and lodging service, housewives, persons engaged in housework (without remuneration), housekeepers, and domestic servants.

PERSONAL SERVICE. — Persons (not otherwise classified) who render personal service, as barbers, bootblacks, carpet cleaners, clerks and copyists (for professional people, etc.), companions, janitors, matrons, nurses, stewards, ushers, valets, washerwomen, watchers, watchmen, etc.

TRADE. — Merchants and dealers, salesmen and saleswomen, accountants, bookkeepers, clerks, agents, bankers, brokers, messengers, porters, etc.

TRANSPORTATION. — Carriers on roads, steam railroads, and seas and rivers.

AGRICULTURE. — Farmers, farm laborers, gardeners, market gardeners, etc., and persons engaged in the care of animals (on farms), etc.

THE FISHERIES. — Persons engaged in the fisheries.

MANUFACTURES. — Persons engaged in the various manufacturing and mechanical industries.

MINING. — Persons engaged in mining, quarrying, etc.

LABORERS. — General day laborers, city and town laborers, etc.

APPRENTICES. — Persons learning trades or branches of business.

CHILDREN AT WORK. — Children of legal school age (10 to 13 years, both inclusive) who both work and go to school or who work only.

SCHOLARS. — Persons attending public and private schools.

STUDENTS. — Persons at college, or studying special branches, as law, dentistry, medicine, etc.

RETIRED. — Persons not engaged in active business pursuits, but who are possessed of a competency, inherited or acquired.

NOT GAINFUL, ETC. — Persons having occupations which in their nature are not gainful, or which cannot be classified.

NOT PRODUCTIVE. — Afflicted persons, homeless children, paupers, prisoners, and convicts, who by reason of their disabilities, etc., have no productive occupations.

UNEMPLOYED TWELVE MONTHS. — Persons not employed at all during the Census year at their accustomed occupations.

DEPENDENTS. — Persons (mostly in private families) more or less dependent upon relatives or friends for their support.

AT HOME. — Children too young to go to school.

NOT GIVEN. — Young persons or adults, of working age, who, for some reason, have no occupation, or for whom no occupation was returned.

For a complete showing of occupations by exact detail, see the presentation, for the State, of "OCCUPATIONS IN DETAIL, BY SEX," page 413.

PRINCIPAL OCCUPATIONS.

BY TOWNS.

PRINCIPAL OCCUPATIONS.

The presentation of principal occupations by towns is intended to show the occupations of the people resident therein, classified as to age periods and place of birth, in such detail as space will permit and, so far as practicable, with due regard to the diversified industries of each particular city and town.

For this purpose, expressive lines of occupation have been taken, so as to show, in a general way, the principal things done by the people, by way of occupation, in each city and town in the State. And in this connection, it should be borne in mind that, for Census purposes, all the people are considered as being occupied and have been so classified, as has been previously described (see page 3, *ante*).

The occupations in this showing are not arranged in alphabetical order, but by related or similar occupations; that is to say, they are presented by sex in the order of "classified occupations," subdivision and classification under their respective sub-titles not being represented in print to secure economy in space.

As has been stated, the designations of occupations have been chosen to represent for each sex, so far as possible, the leading occupations in each city and town, and have been made to include all persons engaged in the same kind of work or work related thereto. For instance, "tailors," in the case of males, and "tailoresses," in the case of females, include coat, vest, and pantaloons makers, as well as all other persons engaged in this line of work, unless by reason of their importance, so far as number is concerned, they are shown in detail as "coat makers," "vest makers," "pantaloons makers," etc. This statement applies with equal force to such lines as "box makers," "carriage makers," "furniture makers," "stone workers," "woodworkers," etc., which taken collectively represent classes of people, but which are oftentimes shown by their respective details, as "paper box makers" or "wooden box makers," or as "carriage painters," "carriage trimmers," etc., all other persons engaged in related work not shown in detail being returned as "box makers, *n. s.*" (not specified), or "carriage makers, *n. s.*," as the case may be.

In the same way, bookkeepers and clerks, gardeners and assistants, steamboat officials and employés, and similar lines, are shown in detail, as "bookkeepers," "clerks," or in combination, as "bookkeepers and clerks," according to the respective numbers of such persons.

In other cases, certain classes of occupations are uniformly represented by a single designation, as "boot and shoe makers" or "cotton mill operatives," meaning thereby all persons occupied in the work of production in the boot and shoe or cotton industry.

The designations, "housekeepers" and "servants," when followed by the words, "in families," in parenthesis, apply only to those persons engaged in such service in private families, housekeepers and servants in hotel, boarding, lodging, or institution service being always included with the employés of hotels, boarding-houses, etc., respectively. In a similar way, the designation, "nurses," when not otherwise described, means nurses who render personal and temporary service only, and does not include nurses regularly employed in institutions.

The designation, "other occupations," represents for each sex those persons not shown in detail as being engaged in the distinctive or leading occupations of the city or town considered. In this total for "other occupations" are included always the inmates of almshouses, houses of correction, jails, and such similar institutions, as may be therein located. A complete showing for these classes of persons is presented by towns, however, under their respective subdivisions, as "PRISONERS AND CONVICTS," "HOMELESS CHILDREN AND PAUPERS," and "PHYSICAL CONDITION."

OCCUPATIONS BY NAME.

FOR THE STATE.

OCCUPATIONS BY NAME.

The presentation of occupations by name is for the State only and comprises four divisions, the first two of which relate to the occupations of the entire population and the last two to the occupations of aliens. These divisions are as follows:

Occupations in Detail, by Sex.
Occupations by Age Periods and Place of Birth.
Occupations of Aliens, in Detail.
Occupations of Aliens, by Place of Birth.

The showing of "Occupations in Detail, by Sex," represents an extended presentation of the occupations of the people, giving in addition to the class, as already shown (see CLASSIFIED OCCUPATIONS), the specific occupation, or branch of an occupation, followed, so far as ascertained. In this showing, the importance of the occupation in itself, as affected by the number of persons so returned, has not been considered, the object being to obtain rather as minute and detailed a classification as possible. The suppression of detail, therefore, when given, has not been intended, if such detail constituted a legitimate subdivision of an occupation, however trivial such subdivision might seem when considered only as regards the number of persons represented thereby. In a word, a classification of all occupations was desired, and not a classification merely of occupations representing large aggregations of people. Where general designations are used to denote occupations or the details for large numbers of persons are not given, the occupation being marked *n. s.* (not specified), it is the fault of the enumeration and not in the presentation of results. In the consideration of this classification of occupations, or any of its branches, it should be borne in mind that the names of occupations used are those returned by the people, that is, the occupations are based upon the returns for individuals, and not establishments, and no attempt has been made to bring them to a uniform, or classified establishment basis, except only so far as to avoid manifest duplications of occupations.

The showing of "Occupations by Age Periods and Place of Birth" is a presentation of occupations, for each sex, on a somewhat condensed basis, as compared with the preceding showing of occupations in detail. That is, it is a presentation by age periods and place of birth of the larger or more important divisions of occupations without regard to the specific details of occupations, unless the number of persons represented by any particular branch of work warranted a special presentation in detail. This showing by age periods and place of birth follows closely the classification of occupations used in the preceding table, and the component parts of any occupation division used in this showing can be easily ascertained by reference to the detailed showing of occupations by sex only. In addition to the recapitulations to the table proper, recapitulations are given for "Other Countries" in detail, together with a special showing of occupations for each of these countries.

The two presentations relating to the occupations of aliens constitute a detailed showing of occupations by number and by place of birth for the aliens as a whole, and for illiterate aliens.
